Long Term Bank Facilities	-	-	Reaffirmed at CARE BB (RWN) ; Continues to be on Rating Watch with Negative Implications and Withdrawn

Details of instruments/facilities in Annexure-1.

Rationale and key rating drivers

CARE Ratings Ltd. (CARE Ratings) has reaffirmed the ratings assigned to the bank facilities of Vikas EcoTech Limited (VEL) at 'CARE BB / CARE A4 (RWN)' and simultaneously withdrawn it with immediate effect. The above action has been taken at the request of Vikas EcoTech Limited and post receipt of 'No Objection Certificates' (NOCs) from the banks that have extended the facilities rated by CARE Ratings.

The ratings were under rating watch with negative implications (RWN) on account of appointment of forensic auditor by SEBI (Securities and Exchange Board of India) with respect to the financial statements of the company for the period commencing from FY 2018-19 to FY 2021-22 as SEBI believes that the business transactions of the company have not been properly dealt with in the financial disclosures. Further, CARE had also taken the cognizance of the search operations, which were initiated by the Income Tax Department in connection with some other assessee on the company premises. Additionally, VEL had acquired Shamli Steel Private limited (SSPL) at the Enterprise Value (EV) of Rs. 160 crores through share swap deal.

The reaffirmation of the ratings of VEL factor inworking capital intensive nature of operations resulting in high working capital utilisation, moderate and fluctuating profitability margins, volatility in the raw material prices and foreign exchange price fluctuation risk. Further, the ratings are also constrained with the company's venturing into the real estate segment with substantial investment made in FY24 (refers to the period from April 01, 2023, to March 31, 2024). The ratings, however, derive strength from wide range of products, reputed customer base, comfortable capital structure and debt coverage indicators. The ratings also draw comfort from long track record of operations of the company in the chemical business along with a wide variety of products.

Analytical approach: Consolidated

CARE Ratings Limited has taken a consolidated approach for analysing VEL which has one wholly owned subsidiary namely Vikas Organics Private Limited (VOPL) which is into similar line of business along with common management. The list of entities consolidated is given in **Annexure-6**.

Detailed description of key rating drivers:

Key weaknesses

Working capital intensive nature of operations:

The operations of the company at consolidated level are working capital intensive as reflected by high operating cycle of 171 days in FY24 (PY: 166 days). The same was largely on account of due to elongated collection period of 158 days (PY:129 days). The company has significant dependence on working capital borrowings for its day-to-day operations resulting in average working capital utilisation of about 85%-90% for the last 12 months ended October 31, 2024.

Volatility in raw material prices and foreign exchange fluctuation risk:

The company at consolidated level is engaged in manufacturing of polymers and special additives. Major raw material used are crude derivatives, which are actively traded thereby making the price vulnerable to fluctuations. Adverse movement in raw material prices can affect the firm's margin adversely. Though less, the company(standalone) imported raw material of about 11% in FY24 exposing it to foreign exchange price fluctuation risk. The company does not have policy to hedge the forex exposure. Moreover, the company is involved in trading of steel, TMT bars and coal and even going forward, as the company aims to enter the manufacturing segment of TMT Bars and Billets, the risk of price fluctuation still pertains. Steel and Coal are also actively traded leading to fluctuation in prices and thereby impacting the margins of the company.

Decline in scale of operations with fluctuating profitability margins

The total Operating Income (TOI) of the company at consolidated level fell from Rs 402.67 crores in FY23 to Rs 258.73 crores in FY24 on account of reduced income from trading activity due to limited value addition from the segment. The income in the

¹Complete definition of ratings assigned are available at www.careedge.in and other CARE Ratings Limited's publications.

manufacturing segment of chemical also fell marginally in FY24 on account of subdued demand from the market. The revenue from Infra & Energy (Trading) fell from Rs 254.91 crores in FY23 to Rs 121.76 crores in FY24 as the company aims to focus on manufacturing of both the polymers segment and steel segment. To implement the same, Vikas Ecotech Ltd has acquired 100% of the shares of Shamli Steels Private Limited (SSPL) in Q1FY25 (refers to the period from April 01, 2024 to June 30, 2024), which is in the manufacturing of steel bars and billets. The PBILDT margin improved from 5.44% to 6.31% in FY24 on account of improved realisations from the chemical and additives segment. The company's TOI at consolidated level though has improved in H1FY25 to Rs 192.31 crore with PBILDT and PAT margin of 4.68% and 6.88%.

Substantial Investment in the Real Estate Segment:

The company in FY24 have utilised the proceeds from liquidation of debtors and other current assets along with funds raised from capital market to venture into the real estate segment which is relatively new at the promoters' end. VEL has invested Rs Rs 199 crores as on March 31, 2024 (~55% of tangible net-worth as on March 31, 2024) for the same. The estimated cost of project is yet to be ascertained. After conducting comprehensive assessments and feasibility studies to establish a precise project cost and accordingly remaining contribution of the company shall be decided at appropriate stages in the project development as required from time to time and development over these projects will be a key factor for VEL.

Key Strengths

Comfortable financial risk profile and moderate debt coverage indicators

The company has a comfortable financial risk profile at consolidated level characterised by comfortable overall gearing and debt coverage indicators. The capital structure of the company at consolidated level remained comfortable marked by an overall gearing of 0.05x as on March 31, 2024 (PY:0.26x). The interest coverage of the company stood moderate at 2.38x as on March 31, 2024, as against 2.06x as on March 31, 2023. The total debt to GCA stood at 1.88x as on March 31, 2024, as against 4.58x as on March 31, 2023.

Wide range of products:

VEL is engaged in manufacturing of a variety of high-end speciality chemical products which includes Organotin Stabilizers, Plasticizers, Dimethyl Tin Dichloride, Ethylene Vinyl Acetate (EVA) Compounds, Thermoplastic Rubber (TPR) Compounds, Thermoplastic Elastomer (TPE) Compounds among others. It caters to varied clients across industries. The end-user industries which use the products manufactured by VEL are agriculture, automotive, cables and electrical, healthcare and hygiene, polymers, packaging, footwear, and infrastructure. This reduces the risk associated with a decline in demand from any one industry segment. Moreover, the company is also involved into trading to TMT bars, HR Coils and Coal which further add to diversification of revenue profile.

Long term association with customers and suppliers with reputed customer base

VEL sells its products to various industries. Around 61% of the sales of the company(standalone) is derived by top 10 customers of the company (PY:73%). Further, the company was able to mitigate the customer concentration risk as compared to previous year where 58% of the revenue came from two customers. Also, the clientele of the company(standalone) is diversified and reputed, which helps mitigate the counterparty credit risk to an extent.

Liquidity: Stretched

The liquidity position of the company(consolidated) remains stretched owing to high average utilization in the working capital limits ~85-90% for past 12 months ending October 31, 2024. Further, the operating cycle of the company(consolidated) is elongated with 171 days during FY24(PY:166 days) due to high collection period of 158 days in FY24 (PY:129 days). The Company at consolidated level has an expected GCA of Rs 29.54 crore in FY25 against repayment obligations of Rs. 6.16 crore. The company at consolidated level is not planning to incur any major capex in the near to medium term.

About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
