

## Rajputana Industries Limited

January 24, 2025

Facilities	Amount (₹ crore)	Rating <sup>1</sup>	Rating Action
Long Term Bank Facilities	26.77	CARE BBB+; Stable	Assigned
Long Term / Short Term Bank Facilities	17.03	CARE BBB+; Stable / CARE A3+	Assigned
Short Term Bank Facilities	26.20	CARE A3+	Assigned

Details of facilities in Annexure-1.

### Rationale and key rating drivers

The ratings assigned to the bank facilities of Rajputana Industries Limited (RIL) derives strength from strong operational and financial linkages with its parent, Shera Energy Limited (SEL), vast experience of its promoter along with the group's long track record of operations in the metal industry and its diversified product portfolio. The ratings also factor in volume driven growth in scale of operations and adequate liquidity of the company, further aided by receipt of IPO proceeds during H1FY25.

The rating further factors in expected benefits from the on-going product diversification capex which is expected to commence operations from April 2025.

The above rating strengths, however, are partially offset by RIL's moderate profitability which is further susceptible to volatility in input prices, its moderate financial risk profile and prevalent competition in the non-ferrous metal industry.

### Rating sensitivities: Factors likely to lead to rating actions

#### Positive factors

- Volume driven growth in scale of operations leading to TOI above Rs.650 crore and PBILDT margin above 4.50% on a sustained basis
- Improvement in debt coverage indicators and liquidity cushion marked by PBILDT interest coverage above 3x on a sustained basis and Total Debt / PBILDT below 4x on a sustained basis
- Improvement in overall gearing below 1x on a sustained basis

#### Negative factors

- Any large size debt funded capital expenditure or higher than envisaged increase in working capital intensity leading to deterioration in overall gearing above 2x on a sustained basis and stress on debt coverage indicators and liquidity position of the company
- Deterioration in PBILDT interest coverage below 1.75x on a sustained basis

**Analytical approach:** Standalone, factoring in linkages with the parent company i.e. Shera Energy Limited (SEL)

### Outlook: Stable

Stable outlook reflects CARE Ratings expectations that RIL will continue to benefit from it being a part of Shera group and its established relationship with various clientele. Furthermore, expansion of product portfolio shall support growth in its scale of operations going forward.

### Detailed description of key rating drivers:

#### Key strengths

##### Part of Shera group having an established track record of operations with diversified product portfolio

RIL is a subsidiary of SEL, collectively referred to as Shera group, which was promoted by Mr. Sheikh Nasseem, who has over two decades of experience in the non-ferrous metal industry. RIL specializes in the scrap recycling of non-ferrous metals, such as copper, aluminium, and brass. RIL is engaged in manufacturing of copper, aluminium and brass extruded and drawn products like billets/ingots, Tubes/pipes, Hollow/solid rods, sections and profiles etc.

Though initially, it sold majority of its output to group companies, the portion of third-party sales has increased from FY24 onwards. RIL benefits from it being a part of Shera group and its established relationship with various clientele.

<sup>1</sup>Complete definition of ratings assigned are available at [www.careedge.in](http://www.careedge.in) and other CARE Ratings Limited's publications.

### **Continuous increase in capacity utilizations leading to volume driven growth in TOI**

RIL's TOI grew at a CAGR of 16% over the last five years, ending FY24 (Standalone). In FY24, RIL's TOI grew by 28% year-on-year to Rs.326.52 crore, driven by a 29.44% growth in sales volumes to 6,594 MTPA in FY24 from 5,094 MTPA in FY23. RIL's capacity utilisation stood healthy at 89% in H1FY25 as against 49% in FY20. During FY24, RIL's sales to third parties (other than group companies) has increased to 45% of TOI as against 9% in FY23.

In H1FY25 (provisional), RIL reported a TOI of Rs.258 crore, compared to Rs.143 crore in H1FY24, supported by higher sales volume and increase in sales realisation. CARE Ratings expects RIL to sustain its volume growth and achieve a TOI of around Rs.500 crore in FY25.

### **Expansion of value-added product portfolio, albeit healthy off-take from the same shall remain key monitorable**

RIL is undertaking a capex to manufacture nickel-based alloys, copper cables and wires, and aluminium conductors with an installed capacity of approximately 2700 MTPA. The total cost of the capex is estimated at Rs.18.65 crore, to be funded through a mix of debt and internal accruals.

Scaling up of operations, along with achievement of envisaged TOI and profitability as well as effective management of incremental working capital requirements, will be key monitorable from the credit perspective

### **Key Weaknesses**

#### **Low value-added products leading to moderate profitability**

RIL's PBILDT margin have ranged from 3.30% to 5.40% over the past five years, influenced by raw material price fluctuations and product mix changes.

In FY24, the PBILDT margin improved to 5.39% from 4.87% in FY23 owing to improved gross realizations. However, the operating margin declined to 3.39% in H1FY25 as the company offering cash discounts to boost sales volume, gain market share and reduce its reliance on bank borrowings for working capital requirements. Nevertheless, the PAT margin remained stable at 1.58% in H1FY25, (FY24: 1.57%), due to reduced interest costs.

#### **Improving financial risk profile, albeit continues to remain moderate**

RIL's financial risk profile has improved over the last three years, with overall gearing reducing from 2.03x at FY22-end to 1.82x at FY24-end.

The company's net worth increased to Rs.59.67 crore as on September 30, 2024 (FY24-end: Rs.32.58 crore) due to receipt of IPO proceeds of ~Rs.23.88 crore in August 2024. This led to improvement in overall gearing and TOL/TNW ratio of 1.06x (FY24: 1.82x) and 2.02x (FY24: 3.47x), respectively as on September-end. However, with planned debt-funded expansion in Q4FY25, leverage is expected to remain moderate during the projected period.

Debt coverage indicators remained moderate, with PBILDT interest coverage at 2.02x and TD/GCA at 6.31x in FY24 owing to moderate profitability and GCA levels. The interest coverage ratio improved to 3.62x in H1FY25 due to reduced interest costs.

#### **Profitability vulnerable to volatility in raw material prices**

RIL's profitability is exposed to sharp fluctuations in raw material prices (mainly copper), which forms ~95-96% of total cost of sales for the company. SEL at a group level procures inventory on a back-to back basis against confirmed order of the customers. Nevertheless, as RIL has a longer production time and hence maintains an inventory of around 80-90 days, a portion of which is not order-backed.

#### **Presence in fragmented and competitive industry with low bargaining power**

RIL operates in a highly competitive and fragmented winding wire / conductor industry characterised by the presence of numerous organised and unorganised players, given the low technical expertise requirement and value addition in manufacturing winding wires / rods and ingots. Due to intense competition in the industry, the bargaining power of the group remains low.

#### **Liquidity: Adequate**

RIL's liquidity remained adequate characterized by healthy cash flow from operations, moderate cushion available in cash accruals vis-à-vis term loan repayment obligations along with its modest capex requirements. Liquidity of the company is partly aided by receipt of IPO proceed in H1FY25 supporting company's incremental working capital requirement and capex plans.

Average utilisation of fund-based limits and non-fund-based limits remained moderate at 54% and 80% respectively for the trailing 12 months ended October 2024. Furthermore, access to RXIL and bill discounting facility helps the company to bridge the gap in working capital requirement.

Operating cycle of company remained satisfactory 34 days owing to adequate funding support from the creditors. Gross cash accruals during the projected period shall be adequate to fund the debt repayment obligation, which is expected to remain in the range of Rs.5.50 crore - Rs.7.50 crore during FY25-FY27. RIL has free cash and bank balance of Rs.0.07 crore as on March 31, 2024 apart from lien marked FD's of Rs.1.85 crore.

### About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

### Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
