

## Bajaj Hindusthan Sugar Limited

March 29, 2025

Facilities/Instruments	Amount (₹ crore)	Rating <sup>1</sup>	Rating Action
Optionally Fully Convertible Debenture	3,483.25	CARE D	Downgraded from CARE B+; Negative

Details of instruments/facilities in Annexure-1.

### Rationale and key rating drivers

CARE Ratings has downgraded the long-term rating for BHSL's long-term instruments to 'CARE D' from 'CARE B+'; Negative, due to the expected default on its upcoming instalment of optionally convertible debentures (OCDs) amounting to ₹268 crore, along with an additional amount for yield to maturity (YTM) premium payment, due on March 31, 2025. This is primarily due to the company's poor liquidity and insufficient accruals. Furthermore, the company has confirmed to CARE Ratings that it has been unable to secure approval from its consortium lenders for the conversion of the OCDs into equity and, as a result, is not in a position to service its debt obligations in a timely manner.

The rating further considers weak business profile with negative profit after taxation (PAT) level of ₹91.53 crore (PY: ₹147.74 crore). In 9MFY25, PAT level was negative at ₹217.09 crore. Total income has also dipped in FY24 to ₹6,076.56 crore compared to ₹6,302.32 crore in FY23. The rating is constrained by BHSL's weak financial profile characterised by its poor liquidity, leveraged capital structure, contingent liabilities due to the YTM payable upon the redemption of the OCDs, substantial investments in group companies, and the cyclical and regulated nature of the sugar business.

The ratings take note of the promoter's long track record of operations in the sugar industry and BHSL's diversified revenue profile.

### Rating sensitivities: Factors likely to lead to rating actions

#### Positive factors

- Successful approval by the consortium lenders regarding the conversion of the OCDs into equity, which would help alleviate liquidity pressure and improve the company's capital structure.
- Improving overall operational performance of the company leading to substantially improving financial risk profile and effective management of its working capital and improvement in its liquidity position.
- Company recouping its advances and investments from the group companies in a timely manner and reducing its overall debt exposure from funds so received.

#### Negative factors: NA

#### Analytical approach: Standalone

### Detailed description of key rating drivers:

#### Key weaknesses

##### Poor Liquidity Position

The liquidity position of the company remains stretched with free cash and bank balance to the tune of ₹56.28 crore as on September 30, 2024. Currently, BHSL is expected to default on its ₹268 crore OCD instalment and YTM premium of Rs 276 crore due on March 31, 2025, due to poor liquidity and insufficient accruals.

##### High repayments considering OCDs and also considering YTM payable at the time of redemption

The total unprovided YTM liability from the date of allotment of OCDs as on March 31, 2024 was ₹2,885.41 crore (PY: ₹2,262.73 crore) and till December 31, 2024, it is ₹3,412.51 crore. YTM premium is payable at the time of redemption of OCDs pursuant to the Scheme for Sustainable Structuring of Stressed Assets (S4A Scheme), which stipulates that the YTM, being the difference between the weighted average interest and coupon rate, is payable as a redemption premium at the time of redemption of OCDs, redeemable in 13 equal instalments commencing from March 31, 2025. The company considers such YTM/redemption premium

<sup>1</sup>Complete definition of ratings assigned are available at [www.careedge.in](http://www.careedge.in) and other CARE Ratings Limited's publications.

as a contingent liability and has not provided for the same in the books of account. The first instalment of ₹268 crore is due on 31 March 2025, and the YTM premium payment.

### **Weak financial profile but some improvement registered in FY24 and 9MFY25**

The company's total operating income (TOI) declined by ~3.58% from ₹6,302 crore in FY23 to ₹6,076 crore in FY24, while net loss reduced from ₹147.74 crore in FY23 to ₹91.53 crore in FY24. As a result, the company reported positive gross cash accruals (GCA) for FY24. The profit before interest, lease rentals, depreciation and tax (PBILDT) improved by ~5% to ₹261 crore in FY24. Owing to improvement in PBILDT and reduction in interest cost, interest coverage of the company (PBILDT/Interest) improved from 1.21x in FY23 to 1.68x in FY24. Total debt decreased from ₹4,245 crore as on March 31, 2023 to ₹3,769 crore as on March 31, 2024. The same comprised long-term loans of ₹275 crore, OCDs of ₹3,483.25 crore, loan from related parties of ₹10 crore and financial lease liability of ₹0.03 crore.

In 6MFY25, the company repaid its entire term loans to the tune of ₹275 crore from the operating cashflows. Overall gearing has improved from 0.94x as on March 31, 2023 to 0.87x as on March 31, 2024, which was mainly due to mark up of prior investments made by the company leading to increase in net worth and also partially due to decrease in total debt.

### **Substantial investment in group companies**

The group has implemented a power project under Bajaj Energy Ltd (BEL) and commissioned a 1,980-MW project under Lalitpur Power Generation Company Limited (LPGCL). BHSL had invested a substantial amount in its group companies by way of investments and loans & advances. As on March 31, 2024, on standalone basis, the company has exposure aggregating to ₹5,383 crore, by way of investments, loans, accumulated interest on these loans (FY23: ₹5,256 crore). The above increase is entirely due to improving fair value of the investments and BHSL has not made further investment in the year. Inability of BHSL to recover these advances in a timely manner in the past has led to its poor liquidity position. Recoverability of these advances shall be crucial to improve BHSL's liquidity position.

### **Cyclical and regulated nature of sugar business**

The industry is cyclical by nature and is vulnerable to the government policies for reasons like its importance in the Wholesale Price Index (WPI) as it classifies as an essential commodity. The government on its part resorts to regulations like fixing the raw material prices in the form of State Advised Prices (SAP) and Fair & Remunerative Prices (FRP). All these factors impact the cultivation patterns of sugarcane in the country and thus affect the profitability of the sugar companies.

## **Key strengths**

### **Long track record of operations and experienced promoters**

The company was incorporated in 1931 under the name - The Hindusthan Sugar Mills Limited (HSML) by Jamnalal Bajaj. Subsequently, HSML was renamed as Bajaj Hindusthan Limited in 1988 and changed to the present one in January 2015. The company gradually increased its capacity over s to become one of the largest sugar producers in the country with aggregate capacity of 1.36 lakh tonne of sugarcane crushed per day (TCD). Kushagra Nayan Bajaj has considerable experience in the sugar industry and is assisted by a team of professionals having significant experience in the industry.

### **Diverse revenue stream**

BHSL is majorly into sugar production. However, it has diversified operations with other business such as manufacturing alcohol and power, which de-risk the core sugar business of the company to some extent. BHSL has 14 sugar factories with an aggregate capacity of 1.36 lakh tonne of sugarcane crushed per day (TCD). It has six distilleries with capacity to produce 800 kilo litre per day (KLPD) of industrial alcohol and owns co-generation plants having power generating capacity of 449 MW.

In FY24, the segment-wise gross contribution to operating income stood at sugar – 77% (PY: 76%), distillery – 10% (PY: 12%) and power segment – 11% (PY:11%). In FY24, the company crushed 12.81 million metric tons (MMT) of sugarcane against 13.84 MMT in the previous year. The sugar recovery was 10.89% against 9.74% in the previous year.

### About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

### Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
