Long Term / Short Term Bank Facilities	60.00 (Reduced from 60.56)	CARE BB+; Stable / CARE A4+	Reaffirmed

Details of instruments/facilities in Annexure-1.

Rationale and key rating drivers

The reaffirmation of the ratings assigned to the bank facilities of Alcon Builders and Engineers Private Limited (ABEPL) continue to factor in the working capital-intensive nature of operations characterized by stretched creditors payment and collection period, project execution risk and tender based and competitive nature of industry. The ratings, however, continue to derive strength from the experienced promoters of ABEPL with long track record of operations in the industry and moderate unexecuted order book position albeit customer concentration risk. The ratings also take continue comfort from the moderate financial risk profile of ABEPL characterized by comfortable overall gearing and debt coverage indicators along with modest scale of operations during FY24 (refers to April 01 to March 31). CARE Ratings Limited (CARE Ratings) believe the company's ability to improve its order book position thus providing revenue visibility in the short to medium term will remain a key credit monitorable.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors

- Increase in scale of operations as marked by the total operating income (TOI) of above ₹200 crore with profit before interest, lease rentals, depreciation and taxation (PBILDT) margin above 9.00% on a sustained basis.
- Improvement in capital structure of the company as marked by the overall gearing below 0.30x on a sustained basis.
- Improvement in total outside liabilities to total net-worth (TOL/TNW) below 1.00x on a sustained basis, supported by reduction in average creditors period below 60 days.
- Growth in unexecuted order book position beyond 3.00x of TOI of FY24 thereby improving revenue visibility over medium term.

Negative factors

- Decrease in scale of operations as marked by the TOI of below ₹100 crore with PBILDT margin below 5.00% on a sustained basis.
- Moderation in unexecuted order book below 1.00x of TOI of FY24 thereby limiting revenue visibility.
- Any delays in project execution impacting the financial performance and liquidity position of the company.

Analytical approach: Standalone

Outlook: Stable

"Stable" outlook reflects the entity will continue to benefit from long track record of operations and the extensive experience of the promoters.

Detailed description of key rating drivers:

Key weaknesses

Modest scale of operations

The operating income of the company moderated by ~14% to ₹108.24 crore during FY24 against FY23 owing to orders stuck from railways (government tenders). As on February 15, 2025, its order book position stood moderate at 1.98x of the TOI for FY24, providing medium term revenue visibility. However, the company's PBILDT margin improved by 187bps to 8.26% in FY24. Further, the profit after tax (PAT) margin stood largely in line with previous year at 7.10% in FY24 (PY: 7.07%). Further, as on February 15, 2025, the company achieved operating income of ₹88.25 crore and is expected to improve during the remaining part of the year driven by execution of orders. CARE Ratings believe the company's ability to improve the operational performance driven by execution of orders in hand in the short to medium term will remain a key credit monitorable.

¹Complete definition of ratings assigned are available at www.careedge.in and other CARE Ratings Limited's publications.

Working capital intensive nature of operations though operating cycle is negative

Under railways projects, company generally raises bills on quantum basis i.e. as soon as work done reaches ₹2-3 crore, the payment from railways is released generally within 15 days while average collection period (inclusive of retention money/ security deposits etc.) is around 11 days as on March 31, 2024, however the company is not exposed to counterparty default risk as all the bills are raised to railways authorities only. Payment to suppliers depends on and is made soon after clearance of company's bills from railways and average creditors period is 132 days as on March 31, 2024 (PY: 125 days). The average inventory holding remains in the range of 5 to 10 days. Thus, operating cycle days comes around negative 116 days as on March 31, 2024 (PY: negative 111 days). As on February 15, 2025, the debtors and creditors stood at ₹27.10 crore and ₹4.98 crore, respectively.

Competitive and tender based nature of industry

ABEPL being engaged into construction/electrification work primarily operates on tender based work received from railways departments. Company's order book and revenues are dependent on successfully bidding and winning the tenders. Owing to high competition in the industry, margins come under pressure and remain volatile. However, the promoters' extensive experience and company's long track record of operations of over five decades mitigates this said risk to some extent.

Execution risks related to projects

The electrification/ supply and installation work projects in railways has inherent risk of delay in execution due to site availability, weather conditions and issues related to availability of labor etc. which may result in time and cost overrun in the projects. However, company's long association with Railways and long-established track of project execution mitigates these risks to some extent. There is no escalation clause in most of the projects for less than 12 months period. However, beyond 12 months, escalation clause is there.

Key strengths

Comfortable capital structure and debt coverage indicators

The capital structure of the company remains comfortable with total debt of ₹5.47 crore against net worth base of ₹36.47 crore as on March 31, 2024. Further, it has comfortable financial risk profile characterized by overall gearing of 0.15x as on March 31, 2024 (PY: 0.06x). The debt coverage indicators also remain comfortable as marked by the interest coverage ratio of 8.82x as on March 31, 2024 (PY: 12.05x) moderation was on account of requirement of external debt to support the operations of the company. Entity's comfortable capital structure provides sufficient gearing headroom in case of exigencies.

Moderate unexecuted order book; albeit customer concentration risk

The company has order book of ₹805.15 crore out of which unexecuted order book stood at ₹214.82 crore as on February 15, 2025. The unexecuted order book is ~1.98x of the TOI of FY24 providing revenue visibility over short to medium term. As per contracts, the project to be executed in 12-24 months, however actual project completion gets extended from Railways from time to time due to delay in site availability from Railways Authorities only. No penalty is levied on delays as the company is not liable for the causes of delays. Actual execution time lies around 3-4 years on average basis. The order book mainly based on supply and installation work of telecommunication work, electrification, signaling etc. for Indian Railways thereby exposing to high customer concentration risk. CARE Ratings believe the company's ability to improve its order book position thus providing revenue visibility in the short to medium term will remain a key credit monitorable.

Experienced promoters with long track record of operations

ABEPL's operations are managed by Ajit Kumar Vaswani, Managing Director of the company having over five decades of relevant experience in the industry and operations of the company are also supported by a team of qualified engineers, technicians etc. The company has an established track record of execution of numerous signaling projects for Indian Railways and has steady orders flow.

Liquidity: Adequate

ABEPL has gross cash accruals (GCA) of ₹7.92 crore during FY24 and is expected to be ₹9-10 crore during FY25 against debt repayment obligations of ₹0.19 crore. The company has cash and liquid investments of ₹15.17 crore as on March 31, 2024, include cash and bank balance of ₹0.17 crore and remaining ₹15 crore are term deposit with State bank of India (SBI). Punjab National Bank (PNB) bank guarantees (BGs) are ~₹40 crore utilized out of sanctioned amount of ₹60 crore with no instance of invocation of BG. The current ratio was at 1.02x, its quick ratio remained comfortable at 1.01x as on March 31, 2024.

About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
