Rationale and key rating drivers

CARE Ratings Ltd. had, vide its press release dated March 12, 2024 placed the rating of Alchemist Hospitals Limited under the 'issuer non-cooperating' category as Alchemist Hospitals Limited had failed to provide information for monitoring of the rating. Alchemist Hospitals Limited continues to be non-cooperative despite repeated requests for submission of information through emails, phone calls and email dated April 02, 2025, February 15, 2025, February 05, 2025, etc. In line with the extant SEBI guidelines, CARE Ratings Ltd. has reviewed the rating on the basis of the best available information which however, in CARE Ratings Ltd.'s opinion is not sufficient to arrive at a fair rating.

Users of this rating (including investors, lenders and the public at large) are hence requested to exercise caution while using the above rating.

While arriving at the rating of Alchemist Hospitals Limited (AHL), CARE has taken a consolidated view of AHL and Ojas Medical Services Pvt Ltd (OMS), as both companies have common promoters, common management and operational linkages. The rating is revised on account of non-availability of requisite information due to non-cooperation by Alchemist Hospitals Limited with CARE'S efforts to undertake a review of the rating outstanding. CARE views information availability risk as a key factor in its assessment of credit risk. Further, the ratings continue to remain constrained on account of modest scale of operations and fluctuating profitability margins, limited geographical reach and competition from established players in the region, risks in the healthcare industry associated with the availability and attrition of medical professionals as-well-as the treatments done and stretched liquidity position. The rating, however, continue to derive comfort from established track record of operations, regulatory approvals in place, wide range of specialty services offered & established infrastructure, moderate financial risk profile, healthy occupancy levels and growing demand for healthcare services in India.

Analytical approach: Consolidated. The financial and business risk profiles of Alchemist Hospitals Limited (AHL) and Ojas Medical Services Private Limited (OMS) have been consolidated since both the entities are engaged in a similar line of business, have operational linkages, guarantee given to its subsidiary (OMS), common promoters and common management personnel.

Outlook: Stable

Detailed description of the key rating drivers:

At the time of last rating on March 12, 2024 the following were the rating strengths and weaknesses (updated for the information available from Registrar of Companies)

Key weaknesses

Modest scale of operations and fluctuating profitability margins

The scale of operations of the company remained modest with a total operating income of Rs.279.99 Cr. in FY24. The same, however, increased by 17% on account of increase in the rates of various services offered, leading to revenue growth. Further, the PBILDT margins stood 16.99% in FY24 (PY: 17.72%). The PAT margins stood at 7.72% (PY: 6.09%) as on March 31, 2024.

¹Complete definition of the ratings assigned are available at www.careedge.in and other CARE Ratings Ltd.'s publications

Risks in the healthcare industry associated with the availability and attrition of medical professionals as-well-as the treatments done

Presence of qualified medical professionals such as doctors, paramedical staff and support staff is one of the important requisites of any hospital to be successful and to get continued patronage from the local population. There is an increasing level of competition and the scarcity of medical specialists in the domestic healthcare industry. Furthermore, healthcare is a highly sensitive sector where any mishandling of a case or negligence on the part of any doctor and/or staff of the unit can damage the reputation of the hospital to a large extent. In such an industry scenario, operations of hospitals like AHL are also therefore, highly dependent on the availability of qualified medical professionals and its ability to retain its current pool.

Limited geographical reach and competition from established players in the region

The company is operating a single hospital in Panchkula (Haryana). This limits the ability to tap opportunities and revenue. Further, though the hospital has an established oncology and cardiology department, it faces stiff competition from several other private hospital chains. This leads to competition not only in acquiring patients, but also in attracting medical professionals.

Key strengths

Established track record of operations, regulatory approvals in place and healthy occupancy levels

The company was originally incorporated in 1994 as Kaiser Hospital Limited and operated the single hospital in Panchkula under the name 'Kaiser Hospital'. It was subsequently acquired by the current promoters in 2006 and rechristened as Alchemist Hospitals Limited. The operations of the company are being looked after by its current director, Mr. Karan Deep Singh (son of Mr. Kanwar Deep Singh, Member of Parliament and the founder promoter of the Alchemist Group). He holds an industry experience of more than ten years and is supported by an experienced management team. The hospital has been operational for around two and a half decades now leading to an established track record in the Panchkula, Haryana region. The occupancy levels in the hospital remained healthy and almost at the same level in H1FY22 at ~83%. The hospital holds accreditations from National Accreditation Board for Hospitals and Healthcare Providers (NABH) as well as National Accreditation Board for Testing and Calibration Laboratories (NABL). This leads to an advantage to the company in terms of attracting patients as well as medical professionals. The hospital derives most of its income each year from private patient inflow (~70% in FY21). The hospital also has tie ups with several reputed Third-Party Administrators and private & public institutions. Further, the hospital is also empanelled under the CGHS (Central Government Health Scheme) and ECHS (Ex Servicemen Contributory Health Scheme) schemes of the government.

However on account of absence of latest information; CARE is unable to comment on the current scenario.

Established infrastructure and wide range of services offered

The 200 bedded multi-specialty hospital has medical professionals and associated infrastructure and equipment for various departments like oncology, neurology, cardiology, gynaecology etc. The hospital facilities are equipped with OPD (out-patient department) facilities, operation theatres, pathological lab, catheterization lab etc. along with technologically sound medical equipment and supporting infrastructure like Intensive Care Units, general wards, luxury rooms, blood bank, pharmacy etc. The hospital is associated with several reputed doctors as well as consultants who are supported by a qualified and experienced staff. Most of the doctors are working with the hospital are working exclusively for it, though on consultancy basis.

Moderate financial risk profile

The overall gearing slightly improved and stood 0.82x in FY24 (PY: 1.06x) mainly on account of repayment of loans.

Further coverage indicators as marked by interest coverage and Total debt/GCA improved and stood 2.69x (PY: 3.65x) and 4.89x (PY: 4.28x) respectively on account of improvement in profitability and GCA levels of the company.

Growing demand in the healthcare sector

The long-term prospect of the industry remains positive and continue to grow backed by an increase in demand for modern healthcare facilities, a rise in awareness about diseases, health consciousness among people, increase in per capita income, changing lifestyle, transition in disease profile etc. Although there is increasing competition in the sector, comfort is drawn from the sizeable presence and established position of AHL. Going forward, AHL's prospects would depend upon its ability to achieve the revenue and profitability as envisaged and will remain a key rating sensitivity.

Liquidity: Stretched

The current ratio and quick ratios of the company stood at 1.14x and 0.91x respectively, as on March 31, 2024. The company had free cash and bank balance of Rs.9.89 crore as on March 31, 2024.

About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
