Long Term Bank Facilities	29.45	CARE BB; Stable	Upgraded from CARE BB-; Stable
Short Term Bank Facilities	3.00	CARE A4	Reaffirmed

Details of instruments/facilities in Annexure-1.

Rationale and key rating drivers

The upgrade in ratings assigned to long term bank facilities of Marbilano Surfaces LLP (MSL) factors in significant increase in scale of operations with improvement in the capital structure and debt coverage indicators. The rating continued to remain constrained on account of moderate scale of operations with moderate profitability margins. Further, the ratings also continue to remain constrained on account of its stretched liquidity, presence in a highly competitive ceramic industry and fortune linked to demand from cyclical real estate sector, susceptibility of operating margins to volatility in raw material & fuel costs and limited liability partnership nature of constitution. The ratings, however, derive strength from experienced promoters and locational advantage and moderate working capital cycle.

Rating Sensitivities: Factors likely to lead to rating actions

Positive Factors

- Increase in the scale of operations marked by Total Operating Income (TOI) exceeding Rs.150 crore or improving PBILDT margin above 11% on sustained basis.
- Sustaining capital structure with below unity overall gearing.
- Improvement in debt coverage indicators marked by TDGCA of 2 x or lower and interest coverage exceeding 3 times on sustained basis

Negative Factors

- Decline in total operating income by more than 30% with significant decline in PBILDT margin leading to lower cash accruals.
- Deterioration in leverage position marked by overall gearing ratio above 1.50x and deterioration in tangible net worth
- Increase in working capital intensity resulting in elongation of operating cycle to above 90 days

Analytical approach: Standalone

Outlook: Stable

The continuation of "Stable" outlook reflects CARE Ratings belief that MSL shall sustain its financial risk profile over the medium term and continue to derive benefits from its experienced promoters.

Detailed description of the key rating drivers:

Key weaknesses:

Moderate scale of operations

MSL has been established in December 2020 and started its commercial operations from January 2022. Since then it has exhibited consistent growth MSL's Total Operating Income (TOI) which has increased by 24.73% in FY24, reaching at Rs.128.47 crore as against Rs.103 crore in FY23 due to stabilization of operations. Further, during 9MFY25 (9M refers to April 1st to December 31st) MSL's TOI remained at Rs. 82.04 crore, the marginal decline in revenue during 9MFY25 due to lower offtake from its customers across real estate industry, led to decline in revenue in tiles section. Additionally for a month in August 2024 the plant was shut for maintenance activity.

Declining operating margins albeit remained moderate in FY24

The profitability of MSL remains susceptible to fluctuation in the raw material prices and fuel cost due to high processing period. The PBILDT margin of the firm has declined from 9.50% in FY23 to 7.12% in FY24 on account of the increase in material cost from 43% in FY23 to 53% in FY24 as well as increase in labour cost from 2.45% in FY23 to 5% in FY24. Further, due to stiff competition, being unable to pass on the increased material cost to its customer led to a reduction in the profit margins; however it remained at moderate level. Further, the PAT margin of the firm improved from 0.74% in FY23 to 0.93% in FY24 on a reduction in interest cost and depreciation.

¹Complete definition of ratings assigned are available at www.careedge.in and other CARE Ratings Limited's publications.

Moderate operating cycle

The operation of the firm is working capital intensive in nature which can be reflected in its gross current assets (GCA) which has improved yet remained high at 101 days in FY24 (PY: 133 day) owing to stretched in collection period from 66 days in FY23 to 81 days in FY24 on account of slower recovery of debtors due to slowdown in construction business lead to liquidity crunch in the market. Thus, the operating cycle elongated yet remained moderate at 38 days in FY24 (PY: 23 days). The average maximum utilization of fund based working capital limits stood at 85.87% in past 12 months ended December 2024.

Presence in a highly competitive ceramic industry and fortune linked to demand from cyclical real estate sector

MSL operates in a highly fragmented and competitive ceramic industry marked by presence of large number of organized and unorganized players and low entry barriers which may result in new entrants. Also, most of the demand for tiles comes from the real estate industry, which, in India is highly fragmented and cyclical. Thus, any negative impact on real estate industry adversely affects the prospects of ceramic tiles industry as well as the firm.

Susceptibility of operating margins to volatility in raw material and fuel costs

Prices of raw material, i.e. clay is market driven and put pressure on the margins of tile manufacturers in case of volatility into the same. Another major cost component is fuel expenses in the gas form to fire the furnace. The profitability of MSL remains exposed to volatile LNG prices, mainly on account of its linkages with the international demand -supply of natural gas. Hence any adverse movement in material and fuel prices may impact on the profitability of the firm.

Limited Liability Partnership nature of constitution

Being a partnership firm, MSL is exposed to inherent risk of partners' capital being withdrawn, and firm being dissolved upon the death/retirement/insolvency of partners which may affect financial flexibility of the firm. During FY24, partners have infused the capital of Rs. 0.58 crore.

Key Strengths

Experienced promoters

MSL started as a limited liability partnership firm by Mr. Arvind Becharbhai Soriya and 16 others partners in the year 2021. The promoters possess about three decades of experience in manufacturing vitrified tiles. Their strong understanding of market dynamics and healthy relationships with suppliers and customers will continue to support the business risk profile.

Location advantage

The manufacturing facilities of MSL is in Morbi, Gujarat which is one of the largest ceramic clusters in India. Further, as major ports (such as Kandla and Mundra) are located in the vicinity of Morbi, it also lowers the transportation cost and helps the exporters of ceramic products from that region.

Comfortable capital structure and moderate debt coverage indicators

The capital structure of MSL's improved in FY24 and remained comfortable marked by overall gearing of 0.89 times as on March 31, 2024 (PY: 1.84 times). Improvement was on account of subordination of unsecured loan from related parties as a quasi-equity amounting to Rs.7.85 crore during FY24 as well as reduction in term loan due to schedule repayment and lower utilisation of working capital borrowings.

Debt coverage indicators improved remained moderate during FY24 marked by total debt (TD) to gross cash accruals (GCA) level of 3.79 times (PY: 5.03 times) and interest coverage stood at 2.82 times in FY24 (PY: 2.82 times). Improvement in debt coverage indicators due to reduction in debt level.

Liquidity Position: Stretched

The liquidity position of MSL remained stretched as marked by low cash and bank balances as well as higher utilization of working capital limits. As on March 31, 2024, cash and bank balance remained at Rs. 0.35 crore, while maximum average utilization of working capital limits remained high at 85.87% for past twelve months ended December 2024. However, the cash flow from operating activities (CFO) stood positive and remained at Rs.2.88 crore in FY24 as against positive of Rs.4.70 crore in FY23. GCA remained modest during FY24 at Rs. 6.76 crore and expected to adequate to meet its repayment obligation of Rs. 3.84 crore for FY25. The current ratio and quick ratio stood at 1.56x and 1.37x respectively as on March 31, 2024 (PY: 1.06x; 0.96x).

About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
