Rationale and key rating drivers

CARE Ratings Limited (CareEdge Ratings) had, vide its press release dated March 26, 2018, placed the ratings of Royal Castor Products Limited (RCPL) under the 'issuer non-cooperating' category as RCPL had failed to provide information for monitoring of the rating and had not paid the surveillance fees for the rating exercise as agreed to in its Rating Agreement. RCPL continues to be non-cooperative despite repeated requests for submission of information through emails dated January 22, 2025, February 01, 2025 and February 11, 2025. In line with the extant SEBI guidelines, CareEdge Ratings has reviewed the rating on the basis of the best available information which however, in CareEdge Ratings' opinion is not sufficient to arrive at a fair rating. Rating has been revised on account of non-availability of requisite information.

Users of this rating (including investors, lenders and the public at large) are hence requested to exercise caution while using the above rating(s).

Analytical approach: Standalone

Outlook: Stable

Detailed description of key rating drivers:

At the time of last rating on March 08, 2024, the following were the rating strengths and weaknesses:

Key weaknesses

RCPL's exposure to agro-climatic risks for its castor oil based products along with volatility in castor oil prices and forex rates

Refined castor oil which is the major raw material (~50-60% of total cost) for RCPL is an agri-commodity produce, hence vulnerable to agro-climatic risks. Further, the castor seed market has also witnessed volatility in recent years, with increase in its applications in various chemicals, including industrial and automotive lubricants, pharmaceuticals and cosmetics. This exposes RCPL to the volatility in prices of castor oil. Further, RCPL earns around half of its revenue from exports, both for bulk products and value added products, which exposes it to fluctuation in forex rates. However, RCPL has a natural hedge to a certain extent by way of imports, although the balance exposure is largely kept un-hedged as per the management policy.

Elongated working capital cycle

The working capital cycle of RCPL marked by gross operating cycle days (inventory and debtors) has inherently remained elongated; albeit some improvement over the past five years from 95 days in FY19 to 77 days in FY23.

Customer Concentration Risk

RCPL's export sales, contribute roughly \sim 50% to its revenue, is concentrated towards few large players. Further, for domestic sales \sim 30% of the revenue is contributed from specific derivatives manufactured under agreement with Mitsui Chemicals India Private Limited (MCIPL). This exposes RCPL to high customer concentration risk.

Key strengths

Experienced and resourceful promoter group

The Standard Greases (SG) Group, one of the promoter groups of RCPL, has a wide experience of more than three decades in the industrial and automotive lubricants business through Standard Greases & Specialties Pvt. Ltd. (SGSPL), which is primarily engaged in contract manufacturing of lubricants apart from selling them under its own private label. SGSPL is also the largest shareholder in Tide Water Oil Limited (TWOL), which has established presence in the domestic lubricants market through its 'Veedol' and 'Eneos' brands.

Established operations in various specialty chemicals that find diverse applications

RCPL has an established track record of operations of more than two decades in the chemical industry which it initiated with castor oil based derivative products used primarily in lubricants, cosmetics, pharmaceuticals and coatings industry. Over the last few years, it has diversified into non-castor oil based chemicals, including polyamides and other specialty chemicals under chemipearl group of chemicals. In FY23, RCPL's TOI witnessed growth of around 8% to ₹697.47 crore as against FY22. However, its PBILDT margin improved to 11.89% in FY23 (FY22: 9.60%) despite volatility in raw material prices.

Long-term arrangements with key customers for off-take of products reducing the saleability risk

RCPL had arrangements with Kusumoto Chemicals Limited, Japan (KCL) for production of polyamides, which KCL sells in the open market. RCPL also had an arrangement with Mitsui Chemicals India Private Limited for manufacturing of specialty chemicals under its Chemipearl brand. These marketing arrangements offset the saleability risk for RCPL to a large extent. In addition to these, RCPL also has established its customer base in India as well as in select overseas markets through direct exports.

Comfortable capital structure and debt coverage indicators

RCPL's capital structure was comfortable with a healthy net-worth base and prudent utilization of working capital bank borrowings. RCPL's net worth stood at ₹269.60 crore as on March 31, 2023, as against total debt of ₹55.68 crore (including fixed deposits of ₹22.83 crore) resulting into an overall gearing of 0.21 times. Moreover, its debt coverage indicators i.e. interest coverage and total debt to GCA remained stable and comfortable as on March 31, 2023.
