### Rationale and key rating drivers

Reaffirmation of long-term and short-term ratings of CESC Limited (CESC) factors in the company's status as a monopoly licensee for distribution of power in the licensed area of Kolkata and Greater Noida (through its joint venture [JV] - Noida Power Company Limited [NPCL]) and cost-plus nature of its business with assured returns subject to operational performance meeting normative parameters. The transmission and distribution (T&D) losses for its distribution business in Kolkata and Greater Noida have consistently remained better than regulatory norms leading to significant incentive income. Ratings also factor in strong integration of its generation and distribution business with 1,721 MW of the group's 2,143 MW operational generation capacity, supplying power to Kolkata and Greater Noida licensee areas. The operational performance of these projects has been satisfactory as evident from high plant availability factor (PAF) and plant load factor (PLF) in the recent past with actual PAF remaining above normative PAF.

Ratings also derive strength from the presence of long-term/medium-term power purchase agreement (PPA) for majority its total generation capacity and visibility in fuel supply due to the presence of long-term fuel supply agreement (FSA) and captive mine. Ratings also factor in improvement in financial profile of 600 MW Chandrapur thermal power plant (under Dhariwal Infrastructure) in the last three years and turnaround of input distribution franchisee businesses in Rajasthan in recent years, leading to no incremental support requirement to these business in the near term.

However, ratings are constrained by persisting unfavourable regulatory environment for its Kolkata distribution business with no tariff hikes allowed by the West Bengal Electricity Regulatory Commission (WBERC) in the recent past and delay in issuance of true up orders, which impacted the company's financial performance on a standalone basis. The WBERC has released the tariff order for FY25-26, where the tariff remained the same as in previous years. The company started recovering additional ₹0.5 per unit since June 2024 and ₹0.62 per unit since November 2024 to compensate for increase in power purchase costs under the FPPCA mechanism, which resulted in incremental revenue of ~₹450 crore in FY25 and is envisaged to generate incremental revenue of ~₹750 on an annualised basis and bridge the under recovery in fuel cost to a large extent.

CESC acquired Chandigarh distribution licensee with initial payout of ₹871 crore in FY2025 and expects no further support from CESC or group companies for its operations. Ratings are also constrained by execution and financing risk associated with the renewable energy plans of the group. The group has investment plans, under its newly formed subsidiary Purvah Green Power Private Limited (which will set up 1 GW in the next 3-4 years, PPA for 900 MW as on date). While debt requirement for these investments shall be met via term loans, equity requirement is expected to be partly met by incremental debt availed at its operating subsidiaries. Hence, debt levels on a consolidated basis are expected to be remain elevated in the medium term. CARE Ratings Limited (CareEdge Ratings) notes that while implementation of its renewable energy (RE) projects will result in increased

<sup>1</sup>Complete definition of ratings assigned are available at [www.careratings.com](http://www.careratings.com) and other CARE Ratings Limited's publications.

debt levels, it will also help it in meeting power requirements at a reasonable rate and meet its RE purchase obligations. Dividend payment by the company has been consistently high in each of the preceding three years and CareEdge Ratings expects it to continue in the medium term, leading to material cash outflows. CareEdge Ratings also notes that the distribution franchisee business in Malegaon is incurring operating losses as on date and requires support of ₹150-200 crore on an annual basis, which is expected to continue in the medium term. CESC's elevated leverage and marginal coverage metrics driven by sizable capital expenditure (capex), dividend and overhead expenses constrain its rating strengths. Bulky repayments in the medium-term necessitating refinancing and under-recoveries arising from use of coal from its captive coal mine due to negative bid are other credit weaknesses.

CareEdge Ratings has also withdrawn the outstanding rating for the non-convertible debenture having ISINs INE486A07283, as the company has repaid the amount there is no outstanding as on date.

## **Rating sensitivities: Factors likely to lead to rating actions**

### **Positive factors**

- Improvement in operational profile of Kolkata distribution licensee with material reduction in under recoveries.
- Improvement in the profitability with the consolidated return on net worth (RONW) ~15% on a sustained basis.
- Improvement in the consolidated overall gearing ratio below 0.6x and total debt to profit before interest, lease rentals, depreciation and taxation (TD/PBILDT) of below 2.5x.

### **Negative factors**

- Material delay and/or significant disallowances in receipt of tariff orders/ true up orders.
- Deterioration in consolidated overall gearing ratio above 1.50x.
- Weakening liquidity profile with free cash balance dipping below ₹1,000 crore on a standalone basis.
- Deterioration in operating parameters or significant tightening of normative parameters.

### **Analytical approach:** Consolidated.

Considering that CESC Limited has strong linkages with subsidiaries being in similar line of operations. Entities getting consolidated is listed under Annexure-6.

### **Outlook:** Negative

This is considering persisting unfavourable regulatory environment with no tariff hikes and delayed issuance of true up orders by WBERC, which is adversely impacting its Kolkata distribution business. The outlook may be revised to stable if the company receives favourable regulatory orders, which may reduce under recoveries to a large extent and improves the company's debt coverage indicators.

## **Detailed description of key rating drivers:**

### **Key strengths**

#### **Established group with presence across diverse business verticals**

CESC is part of the RP-Sanjiv Goenka group. The group has interests across diverse business segments, such as power, infrastructure, carbon black, retail, education, BPO, and media & entertainment. CESC has a highly qualified and experienced employee pool having large experience in their related fields. CESC's improvement in operational efficiency over the years can be attributed to its experienced management team.

### **Long track record**

Incorporated in 1899, CESC is an integrated power utility engaged in generation, transmission and distribution (T&D) of electricity to the consumers in its licensed area, covering Kolkata and Howrah. The company has been distribution licensee of Great Noida region since 1994. Apart from distribution licensee business, the company has input distribution franchisee businesses in Bharatpur, Kota and Bikaner in Rajasthan and Malegaon in Maharashtra.

### **Fair operational diversity, strong business integration with a large share of revenue from regulated business**

The T&D business is spread across Kolkata, Greater Noida, Rajasthan, Maharashtra and recently awarded Chandigarh. Its 2.1 GW thermal capacity are in West Bengal, Maharashtra and Tamil Nadu. While 750 MW Budge Budge, 600 MW Haldia, 135 MW Southern and 40 MW Crescent supply power to Kolkata licensee area, 196 MW of 600 MW Chandrapur plant is supplied to Greater Noida licensee area reflecting the integration of power generation and T&D business. CareEdge Ratings notes that over the

years, revenue from regulated business has been over 85%, while 78% of thermal capacity has regulated tariff with fixed return on equity, which imparts the company's cash flow stability.

### **Regulated monopolistic operation in distribution licensee businesses**

CESC and NPCL (72.73% JV of CESC) are the sole power distributing licensees for the Kolkata and Greater Noida region, respectively, with validity upto September 2038 and June 2029, respectively. Operations are on cost-plus tariff regime with recovery of cost incurred subject to approval from regulator and return on equity on achieving normative parameters. The T&D losses for Kolkata business at 6.5% in FY25 were lower than normative T&D losses of 8%. The T&D losses for NPCL at 7.5% in FY2025 were also within normative parameters.

### **Distribution licensee business have favourable consumer mix with strong operational performance**

Major consumers of the Kolkata operation are based in the city with diversified consumer mix. The Greater Noida operation has superior high tension (HT): low tension (LT) mix. Both regions derive considerable collection through digital channel. The T&D loss for the Kolkata region and Greater Noida region is lower than norms by WBERC and UPERC respectively, leading to incentive income.

The newly acquired Chandigarh discom has a consumer mix of 48% domestic, 30% commercial and 20% other category while the T&D loss reported for FY25 is 10.17%.

### **Healthy operational performance of power generating business**

Operational performance of CESC's power generation business was healthy in FY25 marked by higher-than-normative PAF and weighted average PLF higher than the national average for each of the last five years. PLF for FY25 stood at 76%, which was higher than the national average thermal PLF of 69%. The PAF for entire operational capacity was above 90% in the last four years (except 87% for Titagarh in FY22) compared to normative PAF of 85% leading to recovery of fixed charges.

The plant availability and generation of Haldia Energy Limited (HEL) and Crescent Power Limited (CPL) continued to be strong in FY25. Generation from its own plants Budge Budge plant and Southern plant has been lower than the previous years in FY25 resulting in procurement of power at higher prices in the year.

The plants continued to remain insulated from fuel supply risk through the presence of FSA of 15.95 million tonne per annum with subsidiaries of Coal India Limited and captive mine (Sarisatoli) operations.

### **Key weaknesses**

#### **Unfavourable changes in regulatory norms and accumulation of regulatory assets**

The company witnessed delay in receipt of tariff order and true up order from WBERC (the regulator) for its Kolkata licensee business in the past. Last true-up order was released on October 05, 2024, for FY19-20. The adjusted regulatory assets (regulatory assets less deferred tax), per CESC's consolidated books of account, stood elevated at ₹4,353 crore as on March 31, 2025 (PY: ₹3,385 crore). This was due to under recovery of fuel and power purchase cost. There has been no hike in the tariff rate for 2024-25 and 2025-26 per WBERC's tariff order rolled out. To mitigate this to some extent, CESC started collecting fuel cost adjustment surcharge from its retail consumers of Kolkata from June 2024 at ₹0.5 per unit, which increased to ₹0.62 per unit from November 2024. This has resulted in incremental revenue of ~₹450 crore in FY25 and is envisaged to generate incremental revenue of ~₹750 on an annualized basis.

Vide earlier regulations, WBERC reduced the normative transmission and distribution (T&D) loss from 14.3% to 9% in FY24, 8.5% in FY25 and 8% in FY26, which would lower the incentive income earned by the company. While there is some allowance in repair and maintenance cost, the overall incentive income of the company has been adversely affected.

#### **Elevated leverage and marginal coverage metrics, marked by consistently higher dividends**

Overall gearing and TD/PBILDT stood high at 1.55x as on March 31, 2025 (PY: 1.23x) and 6.69x (PY: 6.39x) as on March 31, 2025. This is due to higher debt on consolidated basis considering incremental debt in subsidiaries and CESC Standalone for part funding of the acquisition of the Chandigarh discom and renewable business under Purvah Green. The projected debt service coverage ratio (DSCR) is weak considering bulky repayments with sizable internal accrual commitments for regular capex. The GCA in the last was also impacted by higher overhead expenses. Dividend payment by the company has been consistently high in each of the preceding three years. Debt levels are expected to remain elevated in the medium term considering expansion plans of the group in renewable segment.

The group has investment plans, under its renewable energy business under its newly formed subsidiary Purvah Green Power Private Limited (which will set up 1 GW in next 3-4 years, PPA for 900 MW as on date).

### Profitability partially offset by negative bid in Sarisatolli captive coal mine

Of the total coal used by CESC in FY25, 28% (PY: 29%) was sourced from its captive mine (Sarisatolli). CareEdge Ratings notes that the group won this mine in February 2015 at negative bid of ₹470/ton and under-recovery in terms of fuel cost continues to offset the company's profitability.

### Funding support envisaged for distribution franchisee business

In the past on a standalone basis, CESC extended support to weaker entities in its group to meet short-term liquidity mismatch/capex requirements. Although credit profiles of DIL and Rajasthan distribution franchisee improved recently, support is envisaged for the loss-making distribution franchisee of Malegaon.

### Liquidity: Adequate

The company's cash and cash equivalent (on a consolidated basis) stood at ₹4,042 crore as on March 31, 2025. Fund-based limit utilisation was 81% in FY25, while non-fund-based limit utilisation was 37%. The company has articulated its stand regarding carrying out refinancing whenever required with lower interest rate debt and has also articulated its liquidity policy, where it plans to maintain liquidity of ₹1,000 crore on standalone basis in the medium term. The company depends on refinancing part of its scheduled repayments. The company has maintained a successful track record of refinancing its existing debt at relatively competitive rates, which provides comfort.

### Environment, social, and governance (ESG) risks

CESC has a large portion of its installed capacity in the thermal segment, which has adverse impact on the environment due to emissions, waste generation among others. The use of coal as fuel in the said thermal plants causes emissions and impacts health of the people. However, CESC is attempting to mitigate the ESG risks by 2030 by following:

- 100% of operational fleet will be replaced by green technology such as electric vehicles.
- Reducing water intensity of thermal plants below 2.25 KL/Mwh.
- Achieving zero waste to landfill through value-added utilisation.
- Providing pre-primary, primary and secondary education to at least 15,000 children.
- Skill development training and employment opportunities to at least 7,500 under-privileged youth.
- Representation of women in its board to 30%.
- Implementation of anti-bribery certification such as ISO 37001 across operations.

CESC is expected to benefit from its leadership in green buildings (currently at 3 million sq ft.) and certifications from organisations such as LEED and IGBC. CESC is focused on education, healthcare, clean drinking water and sanitation for strengthening communities in the society through their CSR spends. CESC strives to maintain highest standards of corporate governance through their core values, including sustainability, customer first, execution excellence, credibility, agility and risk taking.

### About the company and industry

#### Industry classification

Macroeconomic indicator	Sector	Industry	Basic industry
Utilities	Power	Power	Integrated power utilities

CESC belongs to the RP-Sanjiv Goenka group, which is a vertically integrated power utility engaged in generation, transmission and distribution of electricity to the consumers in its licensed area, covering Kolkata and Howrah. As on March 31, 2025, the company has three thermal (coal-based) power stations with total generating capacity of 1,125 MW (operating capacity: 885 MW) serving 3.4 million consumers in its 567-sq km licensed area. The combined installed capacity (thermal) of the group is 2,143 MW, with power plants operating under the subsidiaries in Haldia, WB (600 MW) under HEL, Chandrapura, Maharashtra (600 MW) under DIL and 40 MW in Asansol, WB, under Crescent Power Limited (CPL). The group also operates solar power plant of 15 MW in Tamil Nadu under CPL.

### About us:

Established in 1993, CareEdge Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the Reserve Bank of India. With an equitable position in the Indian capital market, CareEdge Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CareEdge Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CareEdge Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit. ### Disclaimer:

This disclaimer pertains to the ratings issued and content published by CARE Ratings Limited ("CareEdge Ratings"). Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. Any opinions expressed herein are in good faith and are subject to change without notice. The rating reflects the opinions as on the date of the rating. A rating does not convey suitability or price for the investor. The rating agency does not conduct an audit on the rated entity or an independent verification of any information it receives and/or relies on for the rating exercise. CareEdge Ratings has based its ratings/outlook on the information obtained from reliable and credible sources. CareEdge Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. The users of the rating should rely on their own judgment and may take professional advice while using the rating in any way. CareEdge Ratings shall not be liable for any losses that user may incur or any financial liability whatsoever to the user of the rating. The use or access of the rating does not create a client relationship between CareEdge Ratings and the user.

CAREEDGE RATINGS DISCLAIMS WARRANTY OF ANY KIND, EXPRESS, IMPLIED OR OTHER WARRANTIES OR CONDITIONS, TO THE EXTENT PERMITTED BY APPLICABLE LAWS, INCLUDING WARRANTIES OF MERCHANTABILITY, ACCURACY, COMPLETENESS, ERROR-FREE, NON-INFRINGEMENT, NON-INTERRUPTION, SATISFACTORY QUALITY, FITNESS FOR A PARTICULAR PURPOSE OR INTENDED USAGE.

Most entities whose bank facilities/instruments are rated by CareEdge Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CareEdge Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. CareEdge Ratings does not act as a fiduciary by providing the rating. The ratings are intended for use only within the jurisdiction of India. The ratings of CareEdge Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades. CareEdge Ratings has established policies and procedures as required under applicable laws and regulations which are available on its website.
