Rationale and key rating drivers

CARE Ratings Limited (CareEdge Ratings) has been seeking information from Shree Mahalakshmi Enterprises (SME) to monitor the rating vide e-mail communications dated September 03, 2025, September 11, 2025, and September 19, 2025, among others and numerous phone calls. However, despite our repeated requests, the company has not provided the requisite information for monitoring ratings. In line with the extant SEBI guidelines, CARE Ratings Limited (CareEdge Ratings) has reviewed ratings based on the best available information, which in CareEdge Ratings opinion is not sufficient to arrive at a fair rating. SME has not paid the surveillance fees for the rating exercise as agreed to in its rating agreement. **Ratings on SME's bank facilities will now be denoted as 'CARE B+; Stable; ISSUER NOT COOPERATING/ CARE A4; ISSUER NOT COOPERATING. Users of this rating (including investors, lenders and public at large) are hence requested to exercise caution while using above rating(s).**

Ratings assigned to bank facilities of SME remain tempered by thin profitability margins given the trading business in a highly fragmented and competitive industry, leveraged capital structure marked by the company's low net worth base and moderate debt coverage indicators, exposure to commodity price and foreign currency fluctuation risks, and constitution of SME as a proprietorship firm. However, ratings derive comfort from experienced promoters, growing scale of operations, and the company's long-standing and diversified client base.

Analytical approach: Combined

CareEdge Ratings combined financials of two entities of the Shree Mahalakshmi group, SME, and SSME (referred to Shree Mahalakshmi group), since these entities are engaged in similar activity, have common promoters, and demonstrate financial and operational linkages.

Outlook: Stable

CareEdge Ratings believes that the group will continue to benefit from the extensive experience of promoters and management in the industry.

Detailed description of key rating drivers:

Key weaknesses

Thin profitability margins

Margins continue to remain thin owing to trading business. The group's profit before interest, lease rentals, depreciation and taxation (PBILDT) margins stood at 2.36% in FY24 (PY: 0.73%). Profit after tax (PAT) margins improved marginally by 77 bps from 0.37% in FY23 to 1.14% in FY24 due to better PBILDT.

Leveraged capital structure and moderate debt coverage ratios

The Shree Mahalakshmi group's financial risk profile is marked by leveraged capital structure and moderate debt coverage indicators. The group mainly depends on bank borrowings to fund its working capital requirements. Overall gearing ratio is moderate and continues to remain high at 9.62x as on March 31, 2024, against 8.08x as on March 31, 2023, primarily due to low net worth base and funds of ~₹9.38 crore brought in by promoters to support operations through unsecured loans in FY24 despite increased working capital borrowings. Interest coverage ratio deteriorated to 1.94x in FY24 (PY: 2.01x) led by higher interest costs on increased bank borrowings while total debt to gross cash accruals (TD/GCA) also remained high at 20.97x as on March 31, 2024, compared to 40.57x as on March 31, 2023, considering increase in GCA level. The group is also supported by its partners through infusion of fund from promoters by capital or unsecured loans to support working capital requirements.

¹Complete definition of ratings assigned are available at www.careratings.com and other CARE Ratings Limited's publications.

Exposure to government policies and foreign exchange fluctuation risk

Regulatory decisions play a crucial role in the sugar industry. Government policies regarding sugar trade, pricing of sugarcane, and sugar realisation (the price at which sugar is sold) can significantly impact profitability for sugar businesses. For instance, policies that fix higher cane prices can squeeze margins, while export incentives can boost profitability.

Government regulations on land use, including restrictions on deforestation and land conversion, can impact land availability for palm oil cultivation. Policies promoting sustainable practices can influence production costs and supply. Government policies on export taxes and subsidies can affect profitability of palm oil businesses. High export taxes can reduce competitiveness in the global market, while subsidies can provide financial support and enhance profitability. Regulations aimed at reducing environmental impact, such as limits on greenhouse gas emissions and requirements for sustainable certification can influence production practices and costs.

Profitability susceptible to cyclical industry

Profitability of the sugar and palm oil business is significantly influenced by the cyclicity of both industries. This cyclicity can be attributed to several key factors such as agro-climatic conditions, where sugarcane production highly depends on favourable climatic conditions, variations in weather patterns, such as droughts or excessive rainfall, can adversely affect crop yields, leading to fluctuations in sugar supply. Similarly, palm oil production is highly sensitive to weather conditions. Favourable weather, with adequate rainfall and sunshine, promotes healthy palm tree growth and high yields. Conversely, adverse weather conditions such as droughts or excessive rainfall can lead to reduced yields.

Proprietorship firm

The firm has inherent risk of withdrawal of capital by the proprietor for personal contingencies. It restricts access to external borrowings where net worth and creditworthiness of the promoter are key factors affecting credit decision of lenders. Hence, limited funding avenues and limited financial flexibility restricts growth in the firm's scale of operations.

Key strengths

Growing scale of operations

Scale of operations of the Shree Mahalakshmi group improved and remained comfortable with total operating income (TOI) of ₹97.46 crore in FY24, owing to improvement of 26.38% from ₹76.88 crore in FY23. Improvement was primarily led by increase in volume of sales for sugar and better realisation.

Experienced promoters

The group is a closely held family business. The promoter family has been in wholesale and retail trading sugar and edible oils for nearly two decades. The group's current promoter, P Krishna has over a decade of experience in trading sugar and edible oils, who is ably assisted by P Sudhakar and D Sandeep. The group's operations and strategic decisions are entirely overseen by the promoter and other management persons, P Sudhakar and D Sandeep, who have experience of over a decade in sugar and oil trading, logistics, quality control, and customer service and have been associated with the business since 2022.

Established relationship with customers and suppliers with a diversified procurement network

Over the years, the Shree Mahalakshmi group has established a diversified procurement network, engaging with over 327 distributors of sugar and edible oils across key regions, such as Karnataka, Maharashtra, Andhra Pradesh, and Tamil Nadu. Notably, top 10 suppliers collectively contribute over 50% to the overall procurement. Top 10 customers of SME contribute 65.08% of total sales amounting to ₹29.73 crore, which was 11.92% over FY23 (PY: ₹33.55 crore). The group has also established overseas supplier base spanning Southeast Asian countries.

Liquidity: Stretched

The group's liquidity profile is stretched marked by modest GCA of ₹1.11 crore for the last year with no major scheduled repayment obligations. Promoters continue to provide liquidity support to the firm when required, through unsecured loans that stood at ₹9.38 crore as on March 31, 2024. The current ratio stood at a satisfactory level of 1.74x, as on March 31, 2024 (PY:1.37x). Unencumbered cash and bank balance stood at ₹0.47 crore on March 31, 2024. Average monthly utilisation of its fund-based working capital limits remained moderate at ~90% for 12-months ended March 31, 2024.
