Rationale and key rating drivers

CARE Ratings Ltd. has been seeking information from Sachdev Food Products Private Limited (SFPPPL) to monitor the ratings vide e-mail communications dated July 31, 2025, and September 23, 2025, and numerous phone calls. However, despite our repeated requests, the company has not provided any information for monitoring the ratings. In line with the extant SEBI guidelines, CARE Ratings Ltd. has reviewed the rating on the basis of the best available information which however, in CARE Ratings Ltd.'s opinion is not sufficient to arrive at a fair rating. Further, SFPPPL has not paid the surveillance fees for the rating exercise as agreed to in its Rating Agreement. The ratings on SFPPPL's bank facilities will now be denoted as **CARE B+; Stable/ CARE A4 ISSUER NOT COOPERATING***

Users of this rating (including investors, lenders and the public at large) are hence requested to exercise caution while using the above rating.

The ratings assigned to the bank facilities of SFPPPL have been revised on account of lack of clarity on future growth strategy and inability to monitor the performance of the company which is critical for assessing the credit profile of the company. The ratings continue to remain constrained by its small scale of operations albeit improving operating margin in FY24 (refers to the period April 01 to March 31), leveraged capital structure, exposure to vagaries of nature and regulated and fragmented nature of the industry. The aforesaid constraints are, however, partially offset by the experienced promoters and proximity to raw material sources.

Analytical approach: Standalone

Outlook: Stable

Detailed description of key rating drivers:

At the time of last rating on September 23, 2024, the following were the weaknesses and strengths (updated for information received from the company):

Key weaknesses

Small scale of operations albeit improving operating margin

The scale of operations of the entity witnessed moderation and continued to remain small marked by total operating income (TOI) of ₹58.25 crore in FY24 as against ₹70.34 crore in FY23. The TOI witnessed de-growth of around 17% y-o-y in FY24 compared with FY23 on account of increase in volume of rice processing for custom milling rather than processing rice and selling under own brand. The tangible net worth of SFPPPL stood at ₹3.26 crore while the total capital employed stood at ₹16.31 crore as on March 31, 2024. However, PBILDT margin witnessed improvement from 3.58% in FY23 to 5.07% in FY24.

Leveraged capital structure

The capital structure of the company remained leveraged despite improvement in overall gearing ratio from 2.41x as on March 31, 2023, to 2.16x as on March 31, 2024. Majority of the loan comprises of unsecured loans from promoters amounting to ₹9.85 crore as on March 31, 2024. The debt coverage indicators of the company though witnessed improvement marked by TDGCA improving from 11.82x as on March 31, 2023, to 10.56x as on March 31, 2024, the same continues to remain high.

Regulated nature of the industry and exposure to vagaries of nature

The Government of India (GOI), every year decides a minimum support price (MSP) to be paid to paddy growers which limits the bargaining power of rice millers over the farmers. The Centre hiked the minimum support price for kharif crops by 7% for the 2023-24 crop year, with paddy MSP being raised by ₹143 to ₹2,183 per quintal, a move aimed at encouraging farmers to bring more area under cultivation and boost their income. The sale of rice in the open market is also regulated by the government through levy of quota, depending on the target laid by the central government for the central pool. Given the market determined prices for finished product vis-à-vis fixed acquisition cost for raw material, the profit margins are highly vulnerable. Also, paddy cultivation is highly dependent on monsoons, thus exposing the fate of the company's operation to vagaries of nature. Further, for FY25, the government hiked the minimum support price for kharif crops with common paddy (Common) MSP being raised to ₹2300 per quintal from ₹2183 per quintal and ₹2320 per quintal from ₹2203 per quintal for Grade A paddy for FY25.

Fragmented and competitive nature of the industry

Rice milling industry is highly fragmented and competitive due to presence of many players operating in this sector owing to its low entry barriers, due to low capital and technological requirements. This has resulted in intense competition which is also fuelled by low entry barriers. High competition restricts the pricing flexibility of the industry participants and has a negative bearing on the profitability.

Key Strengths

Experienced promoters

SFPPL is engaged in milling of rice since 2003 and has two decades of track record of operations in the industry. Ashok Sachdev, Tarun Sachdev, Arun Sachdev and Mukesh Sachdev having long experience in similar line of business, looks after the day-to-day operations of the company along with a team of experienced professionals who have rich experience in the similar line of business.

Proximity to raw material sources

SFPPL's plant is located in Raipur, Chhattisgarh, which is in close proximity to the paddy growing areas of the state. The entire raw material requirement is met locally from the farmers (or local agents) which helps the company to save on substantial amount of transportation cost and also procure raw materials at effective prices. Further, rice being a staple food grain along with India's position as one of the largest producers and consumers, the demand prospects for the industry is expected to remain healthy
