

Clean Max Power Projects Private Limited

January 08, 2026

Facilities/Instruments	Amount (₹ crore)	Rating ¹	Rating Action
Long-term bank facilities	53.98 (Reduced from 62.83)	CARE A; Stable	Reaffirmed

Details of instruments/facilities in Annexure-1.

Rationale and key rating drivers

The rating reaffirmation on long-term bank facilities of Clean Max Power Projects Private Limited (CMPP), which is operating a 24MW (AC)/ 30 MW (DC) solar power plant in Karnataka, factors in healthy operating performance. CMPP's generation stood at 20.8% in FY25 (22.0% in FY24). CARE Ratings Limited (CareEdge Ratings) in its base case assumed some moderation in generation in FY25 considering lower resource availability and actual performance has broadly been around the same. The company reported H1FY26 plant load factor (PLF) of 18.5% (19.6% in H1FY25) and going forward CareEdge Ratings has moderated its assumptions around generation. Coverage metrics are expected to remain comfortable with average debt service coverage ratio (DSCR) being upwards of 1.4x. Collection cycle remained satisfactory with average receivable days of ~50 days in FY25.

CareEdge Ratings notes the Karnataka Electricity Regulatory Commission's (KERC) transition to a multi-year tariff (MYT) framework for FY25-26 through FY27-28, replacing the previous approach of annual tariff revisions. Under this new structure, KERK has rationalised tariff rates, including targeted reductions in energy charges for select High Tension (HT) and Low Tension (LT) industrial and commercial categories and increased components of open access charges. Even though CMPP is exempted from open access charges for 10 years from Commissioning Date (CoD) in accordance with a KERK order dated August 18, 2014, till FY28, post which, open access charges will be incorporated in the landed cost of power from an off-taker's perspective. With expected increase in landed cost of power, tariff competitiveness is bound to reduce and would remain a key monitorable from a credit perspective. CareEdge Ratings in its base case assessment has factored in an expected tariff ~₹3.5 per unit, which is in line with the prevailing renewable energy tariffs for the commercial and industrial (C&I) segment.

The rating continues to factor in the medium-term (10 years from commissioning date) power purchase agreements (PPAs) with multiple reputed C&I counterparties. CareEdge Ratings notes that the company has also been selling a portion of the generation basis either short-term arrangements or to off-takers of the other entities of the CleanMax group, which resulted in variability in the realised tariff. Realised tariff remained above ₹5 per unit in the last few years with FY24, witnessing an uptick by ~30 paise and the trend has reversed in FY25 with tariff moderating by a similar amount. The company's ability to sustain such tariffs would be critical from a credit perspective. This apart, the rating continues to factor in the benefits CMPP derives being a part of CleanMax Group, which is operating 2.0 GW of renewable energy assets as of July 2025.

However, rating strengths are tempered by underlying PPA renewal and tariff renegotiation risks. The company's ability to enter PPAs after the initial tenor of 10 years would be a key credit monitorable. The rating is also constrained due to leveraged capital structure as reflected by total debt to earnings before interest, taxation, depreciation, and amortisation (TD/EBITDA) of 2.9x as FY25 end. CareEdge Ratings also factors in vulnerability of project cash flows to adverse variation in weather conditions given the single part tariff for the project.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors

- Actual generation levels better than P-90 generation on a sustained basis resulting in improvement in average DSCR.
- Extension of prevailing PPAs beyond FY28 at remunerative tariff above ₹4/unit
- Faster-than-expected deleveraging of the asset.

Negative factors

- Significant delays in payments from off-takers leading to accumulation of receivables, adversely affecting the liquidity position.
- Significant underperformance in generation and/or increase in the debt levels of the entity and/or renewal of PPAs at tariff below ₹3/unit weakening the cumulative DSCR on project debt to less than 1.20x, on a sustained basis.

¹Complete definition of ratings assigned are available at www.careratings.com and other CARE Ratings Limited's publications.

- Regulatory changes in state policies in Karnataka, negatively impacting project cash flows.
- Weakening credit profile of parent CMEESPL; or change in linkages/support philosophy between CMEESPL and CMPP.

Analytical approach: Standalone plus parent notch up

CareEdge Ratings expects CMPP's parent, CMEESPL to be willing to extend need-based support to CMPP, given the strategic importance of CMPP for CMEESPL.

Outlook: Stable

The stable outlook on the CARE A rating of CMPP reflects CareEdge Ratings opinion that the company would benefit from its medium-term PPAs. The expectation of satisfactory generation and collection performance supports the outlook.

Detailed description of key rating drivers:**Key strengths****Medium-term PPAs in place with reputed customers**

The company has entered medium-term PPAs with multiple reputed C&I off-takers for the entire capacity for 10 years. CareEdge Ratings notes that the company has also been selling a portion of generation, basis either short-term arrangements or to off-takers of other entities of the CleanMax group, which resulted in variability in the realised tariff. The company has witnessed an increase in realised tariff over the years owing to tariff escalations embedded in the PPAs. The realised tariff has remained above ₹5 per unit in the last few years with FY24, witnessing an uptick by ~30 paise and the trend reversed in FY25 with tariff moderating by a similar amount. The presence of enabling clauses such as compensation to the developer in case of an early exit by the customer is expected to be a strong safeguard.

Operational track record of over seven years with satisfactory generation levels and timely collections

The plant has a generation track record of over six years, and generation performance has been above P-90 estimates in this period. The plant reported a PLF of 20.8% in FY25 and 22.0% in FY24, against the P-90 benchmark of 21.2% (adjusted for annual degradation). The company reported H1FY26 PLF of 18.5% (19.6% in H1 FY25) and going forward CareEdge Ratings has moderated its assumptions around generation. The company has been receiving payments from off-takers within ~50 days.

Comfortable debt protection metrics

Coverage indicators are expected to be comfortable as reflected by average DSCR being upwards of 1.4x for the term debt tenure. CMPP is maintaining DSRA equivalent to two quarters of debt servicing in-line with sanctioned terms.

Benefits derived being part of the Clean Max Group

CMEESPL is into developing ground-mounted (solar, wind, and wind-solar hybrid (WSH)) and rooftop solar power plants across locations under bilateral arrangements, with several C&I customers. The group had an operating capacity of 2.0 GW as on July 2025. The group has investments from BGTF, Augment Infrastructure, UK Climate Investments among others.

Key weaknesses**Risks related to early termination and expiry of PPAs**

CareEdge Ratings analysis notes that the project is exposed to tariff renegotiation risks, as this capacity has a waiver on the open access charges for initial 10 years, the PPA tenure, and these projects will have to incur these charges post FY28, which is likely to result in reduction in the realised tariff. However, CareEdge Ratings in its base case assessment has factored in an expected tariff of ₹3.5 per unit, which is in line with the prevailing renewable energy tariffs for the C&I segment.

Leveraged capital structure and exposure to interest rate risks; Project coverage metrics however remain at comfortable level

The portfolio's capital structure is leveraged as reflected by expected TD/EBITDA multiple remaining range bound between 2.6-2.9x in the next two years. Given the leveraged capital structure, single part nature of the fixed tariff in the PPA and floating interest rates, its profitability remain susceptible to increase in interest rates.

Vulnerability of cash flows to variation in weather conditions

As tariffs are one-part in nature, the company may book lesser revenues from non-generation of power due to variation in weather conditions and/or equipment quality. This would affect its cash flows and debt servicing ability.

Liquidity: Adequate

As on October 2025-end, company had cash and bank balance of ₹18.67 crore. This apart, the company is maintaining DSRA in the form of BG amounting to ₹8.05 crore equivalent to two quarters of debt servicing in line with sanction terms and other reserves amounting to ₹8.51 crore.

As per CARE base case scenario, GCA for FY26 and FY27 is expected to be Rs. 12 crores- 14 crores as against annual repayments of Rs. 8.0 -9.1 crores.

Industry classification

Macroeconomic indicator	Sector	Industry	Basic industry
Utilities	Power	Power	Power generation

CMPP was incorporated in April 2011, is a special purpose vehicle (SPV) formed by CMEESPL. CMPP has set up a 24 MW AC (30 MW DC) solar photovoltaic power project at Ballari, Karnataka. The project was commissioned on March 28, 2018. The company has signed PPAs with nine customers for a period ranging between 10-15 years at a weighted average first year tariff of ₹4.92/unit and escalation ranging between 1% to 2.5% in some of the PPAs.

About us:

Established in 1993, CareEdge Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the Reserve Bank of India. With an equitable position in the Indian capital market, CareEdge Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CareEdge Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CareEdge Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.
