

## THERMAX LIMITED

January 12, 2026

| Facilities/Instruments | Amount (₹ crore) | Rating <sup>1</sup> | Rating Action |
|------------------------|------------------|---------------------|---------------|
| Commercial paper       | 100.00           | CARE A1+            | Assigned      |

Details of instruments/facilities in Annexure-1.

### Rationale and key rating drivers

The rating assigned to the short-term instrument of THERMAX LIMITED (Thermax) derives strength from its established market position in the energy and environment solutions, strong execution capabilities, diversified product portfolio, strong financial risk profile marked by low leverage, comfortable debt coverage indicators, and strong liquidity.

However, the rating strengths are partially tempered by moderate operating profitability due to competitive nature of industry, exposure to economic and investment cycles, which has a bearing on order inflow in capital goods sector and susceptibility of profitability to fluctuation in raw material prices as majority contracts are fixed price contracts.

Thermax's operating performance has witnessed a healthy growth over the last few years supported by growth across all operating divisions. Scale of operations grew at compound annual growth rate (CAGR) of ~19% over FY22-FY25, while operating profit margin also witnessed a sustained increase from 6.42% in FY22 to 9.25% in FY25 supported by improvement in profitability in the industrial product segment and chemicals segment partially offsetting the subdued margin in industrial infra division and green solutions segment, which is currently at the nascent stage. Backed by healthy execution capabilities across domestic and international markets, the company has seen a steady increase in the order inflow, supporting sustained increase in outstanding order book over the years.

Thermax's financial risk profile remains strong marked by comfortable capital structure and strong liquidity. The company's debt has increased primarily for funding for expansion in its green solutions segment, where the company, through its wholly owned subsidiary, First Energy Pvt Ltd (FEPL), has set up 300 MW of renewable projects across locations in the country. The company further has plans to scale up the capacity to 1 GW by FY28, which shall be funded with a mix of debt and equity in line with nature of renewable projects. Notwithstanding the large capex plans, the financials risk profile is expected to continue to remain comfortable over the medium term.

### Rating sensitivities: Factors likely to lead to rating actions

**Positive factors:** Not applicable

#### Negative factors

- Moderation in profit before interest, lease rentals, depreciation and taxation (PBILDT) margin below 7% on a sustained basis.
- Higher-than-envisaged debt-funded capex/acquisition or elongation in its working capital leading to significant deterioration in its leverage and moderation in its return indicators.

### Analytical approach: Consolidated

CARE Ratings Limited (CareEdge Ratings) has taken a consolidated analytical approach owing to strong financial, operational and managerial linkages of Thermax with its subsidiaries/ joint venture (JVs) and associates.

### Detailed description of key rating drivers:

#### Key strengths

##### Strong execution capabilities and business risk profile alongwith diversified product portfolio

Thermax is a leading player in energy and environment solutions space with an established presence. The company has a global footprint, supplying equipment and services to customers both within India and across international markets, supported by

<sup>1</sup>Complete definition of ratings assigned are available at [www.careratings.com](http://www.careratings.com) and other CARE Ratings Limited's publications.

multiple manufacturing locations in India (12) and overseas (4). The company offers a diverse mix of products and services, which finds applications across wide range of end-user industries.

Thermax's business operations span across industrial products, infra services, chemicals and green solutions. Under its industrial products segment, the company provides equipment and services such as boilers, heating systems, cooling solutions, air pollution control systems, and water and wastewater treatment technologies. The company has strong market position in low- and medium-capacity boilers. As a part of the infra services, the company executes large-scale engineering projects—including power plants, flue gas desulphurisation units, and industrial heating installations under engineering, procurement, and construction (EPC) or turnkey projects. The company is also engaged in manufacturing ion exchange resins, performance chemicals, water treatment chemicals, construction chemicals, and oil-field chemicals. The company has steadily expanded its presence in the chemical segment complemented by recent technology-focused acquisitions. The company is investing in its green solutions business to develop offerings in solar, wind, green hydrogen, build-own-operate energy plants, and energy management solutions. Industrial products contributed 43% to the revenue in FY25, while industrial infra contributed 45% with balance being contributed by green solutions and chemicals business.

Thermax's total operating income (TOI) have witnessed a healthy CAGR growth of ~19% over FY22-FY25 supported by growth across all divisions on the back of continued healthy order inflow and strong execution. Backed by focus on profitable order intake and execution, the company's PBILDT margin has witnessed a healthy growth from 6.42% in FY22 to 9.25% in FY25. TOI stood at ₹10,375 crore in FY25; registering 12% y-o-y growth. In H1FY26, the company earned TOI of ₹4,631 (-3% y-o-y) while PBILDT margin stood at 8.57% (H1FY25: 8.74%). Revenue is expected to witness a healthy growth in FY26, while increased focus towards profitable order execution and increasing scale of higher margin chemicals business is expected to support the PBILDT margin going forward.

#### **Healthy order book provides good revenue visibility**

The company has a healthy order book from diversified end user industry. As on September 30, 2025, the outstanding order book of the company stood at ₹12,300 crore (+6% y-o-y), 1.19x of its FY25 TOI. The average execution timeline for these orders ranges between 12 and 18 months, providing healthy revenue visibility for near term. Counterparty risk remains low, as most orders are from leading companies in the power, refinery, and petrochemical sectors, which have strong credit profiles. Additionally, the order book is well diversified across multiple industries: metals and mining, refinery and petrochemical, food and beverages, and cement, engineering, chemicals, and sugar/distillery; reflecting strong customer diversification. The remaining share comes from sectors such as fertilizers, textiles, pharmaceuticals, and paper, among others.

#### **Strong financial risk profile; large capex plans over the medium term**

Thermax has a strong financial risk profile marked by comfortable capital structure in the last four years ended FY25. The company's external borrowings have increased in the past few years primarily for funding expansion in its green solutions segment, under which the company through its wholly owned subsidiary, FEPL, has set up 300-MW renewable energy projects across different locations in the country. Overall gearing (including external debt and customer advances) stood comfortable at 0.67x as on March 31, 2025, while net overall gearing (considering net debt) stood at 0.07x as on same date. Barring customer advances, the company has maintained net debt free status. The debt coverage indicators remained healthy with total outside liabilities to total net worth (TOL/TNW) at less than 1.5x over the years, net debt/gross cash accruals (GCA) below 0.5x for last two years ended FY25 and PBILDT interest coverage above 6x in H1FY26.

Going forward, the company plans to increase the renewable power portfolio to 1 GW from existing 300 MW over next three years ending FY28. The capex outlay is expected to be high at ~₹4,000 crore, to be funded in debt: equity of 75:25. While gross debt would increase to fund the capex, financial risk profile is expected to continue to remain strong. For the power project, Thermax enters into a Power Purchase Agreement (PPA) with strong counterparties including corporate and industrial customers, under group captive mechanism, for a long period of 25 years at a fixed rate. Debt to be availed for the project is expected to have tenure of 20 years. Successful completion and adequate returns from the renewable projects supporting the improvement in credit profile and return metrics shall be key rating monitorables.

#### **Liquidity: Strong**

Liquidity remains strong with expected cash accruals of over ₹900 crore p.a. against modest debt repayment obligation of ~₹40-50 crore p.a. over next two years. The company has over ₹2,500 crore of free cash and liquid investments as on September 30, 2025. Moreover, the average utilisation of fund-based working capital limits remained low at 18% in the last 12 months ended September 30, 2025, providing an additional liquidity cushion. Capex towards the renewable projects shall be funded with a mix of debt and equity, while other group level capex shall be funded through internal accruals. Liquidity profile is anticipated to remain comfortable, underpinned by robust annual accruals.

## Key weaknesses

### Moderate operating profitability and susceptibility to fluctuation in raw material prices

While Thermax's scale of operations more than doubled from ₹4,782 crore in FY21 to ₹10,375 crore in FY25, the PBILDT margins have continued to remain moderate and range bound at ~7%-9% owing to competition in its business segments. Margins remain susceptible to fluctuation in raw material prices, such as copper, aluminium, zinc, and commodities such as steel among others, as majority contracts entered by the company are fixed price in nature. The company operates in project-intensive segments where risks such as cost overruns, execution delays, and margin pressures are inherent which have a bearing on its profitability margin. In past, the company's profit margin had been impacted due to cost overruns in certain projects especially under industrial infra segment.

### Exposure of order inflow to business and investment cycles

Thermax's order inflow is inherently linked to the capital expenditure plans of industries it serves, making it sensitive to broader business and investment cycles. The company operates primarily in energy and environment solutions, catering to sectors such as power, refinery, petrochemicals, metals, cement, and chemicals—industries that are cyclical in nature and heavily influenced by economic conditions. Slowdown in the economic growth could adversely affect the order inflow and operating performance of the company.

## Environment, social, and governance (ESG) risks

| Parameter            | Compliance and action by the company   |
|----------------------|--|
| <b>Environmental</b> | <p>Thermax has achieved a 38% absolute reduction in carbon emissions internally, surpassing our original FY25 target of 25% from the base year of FY 2018-19. Hence, company has revised goal to a 50% reduction by FY30.</p> <p>In FY25, ~49% (FY24:29%) of energy consumed was from renewable source of energy.</p> <p>Four plants (Chinchwad, Savli, Solapur, and Paudh) are zero liquid discharge.</p> <p>In the last year, company has maximised renewable electricity use at key manufacturing facilities in Chinchwad and Shirwal and switched the fuel at the Chinchwad plant's furnace from light diesel oil to piped natural gas. These specific actions have culminated in a notable reduction in absolute emissions.</p> |
| <b>Social</b>        | <p>As on March 31, 2025, Thermax had Lost Time Injury Frequency Rate (LTIFR) (Per One Million-Person Hours Worked) of 0.11 while it was NIL among employees.</p> <p>In FY25, the company spent ~₹11 crore towards CSR projects.</p>  |
| <b>Governance</b>    | <p>The company has nine directors out of which two are women. 67% of the Board comprises of independent directors. To enhance decision making, the Thermax-Care platform educates Board members on sustainability, while the Spree software provides real time data on ESG performance.</p>  |

## About the company and industry

### Industry classification

| Macroeconomic indicator | Sector        | Industry             | Basic industry             |
|-------------------------|---------------|----------------------|----------------------------|
| Industrials             | Capital goods | Electrical equipment | Heavy electrical equipment |

Thermax, founded in 1966 as Wanson India Private Ltd and publicly listed in 1995, has grown from a packaged-boiler manufacturer into a globally recognised engineering solutions provider. Over the decades, the company has expanded its portfolio to include large and packaged boilers, cogeneration systems, air-pollution-control equipment, water and wastewater treatment systems, specialty chemicals, and absorption chillers. Its operations are organised across four strategic business segments—Industrial Products, Industrial Infrastructure, Green Solutions, and Chemicals, serving a wide spectrum of industries such as agriculture, automobile, cement, fast-moving consumer goods (FMCG), oil and gas, metals, mining, pharmaceuticals, power, and textiles. The company has presence in over 90 countries with a network of 16 manufacturing facilities (12 in India and four overseas).

### About us:

Established in 1993, CareEdge Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the Reserve Bank of India. With an equitable position in the Indian capital market, CareEdge Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CareEdge Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CareEdge Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit. ### Disclaimer:

This disclaimer pertains to the ratings issued and content published by CARE Ratings Limited ("CareEdge Ratings"). Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. Any opinions expressed herein are in good faith and are subject to change without notice. The rating reflects the opinions as on the date of the rating. A rating does not convey suitability or price for the investor. The rating agency does not conduct an audit on the rated entity or an independent verification of any information it receives and/or relies on for the rating exercise. CareEdge Ratings has based its ratings/outlook on the information obtained from reliable and credible sources. CareEdge Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. The users of the rating should rely on their own judgment and may take professional advice while using the rating in any way. CareEdge Ratings shall not be liable for any losses that user may incur or any financial liability whatsoever to the user of the rating. The use or access of the rating does not create a client relationship between CareEdge Ratings and the user.

CAREEDGE RATINGS DISCLAIMS WARRANTY OF ANY KIND, EXPRESS, IMPLIED OR OTHER WARRANTIES OR CONDITIONS, TO THE EXTENT PERMITTED BY APPLICABLE LAWS, INCLUDING WARRANTIES OF MERCHANTABILITY, ACCURACY, COMPLETENESS, ERROR-FREE, NON-INFRINGEMENT, NON-INTERRUPTION, SATISFACTORY QUALITY, FITNESS FOR A PARTICULAR PURPOSE OR INTENDED USAGE.

Most entities whose bank facilities/instruments are rated by CareEdge Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CareEdge Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. CareEdge Ratings does not act as a fiduciary by providing the rating. The ratings are intended for use only within the jurisdiction of India. The ratings of CareEdge Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades. CareEdge Ratings has established policies and procedures as required under applicable laws and regulations which are available on its website.
