Details of instruments/facilities in Annexure-1.
*Issuer did not cooperate; based on best available information.

Rationale and key rating drivers

CARE Ratings Limited (CareEdge Ratings) has been seeking information from Pune Polymers Private Limited (PPPL) to monitor the rating vide e-mail communications dated December 22, 2025, January 13, 2026, February 02, 2026, March 02, 2026, and letter dated March 11, 2026, etc. and numerous phone calls. However, despite our repeated requests, PPPL has not provided the requisite information for monitoring the rating. In line with the extant SEBI guidelines, CareEdge Ratings has reviewed the rating on the basis of the best available information which however, in CareEdge Ratings' opinion is not sufficient to arrive at a fair rating. The rating on PPPL's bank facilities will now be denoted as CARE BB+; Stable; ISSUER NOT COOPERATING*.

Users of this rating (including investors, lenders and the public at large) are hence requested to exercise caution while using the above ratings.

Rating has been revised on account of insufficient information to conduct a detailed review. The rating assigned to the bank facilities of Pune Polymers Private Limited (PPPL) remained constrained by moderate scale of operations, susceptibility of profitability to volatility in raw material prices and moderate debt coverage indicators. The rating is further constrained by customer concentration risk, moderate working capital cycle and cyclical automobile industry.
The rating, however, derive strength from experienced promoters, strategic location of manufacturing units and established relationships with reputed customers. The rating further derives strength from the company's comfortable capital structure and adequate liquidity position.

Analytical approach: Standalone

Outlook: Stable

Detailed description of key rating drivers:

At the time of last rating on April 07, 2025, the following were the rating strengths and weaknesses (updated for the information received from PPPL).

Key weaknesses

Customer concentration risk
PPPL derives majority of its revenue from the automotive segment, majorly 2W and 3W segment. Though the company has long association with its reputed clientele, revenue base remains concentrated with top three customers contributing ~75% of its total operating income (TOI) and a single customer, BAL, contributing to ~65-70% of TOI.

Growing yet moderate scale of operations
PPPL's scale of operations marked by total operating income increased by 30.92% y-o-y from ₹148.03 crore in FY24 (refers to April 01 to March 31) to ₹193.80 crore in FY25. Despite improvement, the scale continues to remain moderate.

Moderate profitability that is susceptible to raw material price volatility
PPPL's primary raw materials are derivatives of crude oil, making them susceptible to price volatility. However, presence of price escalation clause in most of its contracts offsets the risk to a certain extent. Profitability continues to remain moderate marked by PBILDT margin of 7.83% in FY25, compared to 9.61% in FY24. PAT margin remained thin at 0.68% in FY5, owing to high depreciation and interest expense.

Moderate debt coverage indicators
Debt coverage indicators remained moderate with TD/GCA and interest coverage of 5.69x and 4.01x respectively in FY25 (3.73x and 3.83x respectively in FY24).

[1]Complete definition of ratings assigned are available at www.careratings.com and other CARE Ratings Limited's publications.

Moderate working capital cycle
The company's operations are working capital intensive with gross current asset of 147 days and operating cycle of 79 days in FY25 (PY: 68 days). PPPL has to maintain sufficient inventory to ensure uninterrupted production and timely execution of orders. PPPL generally grants a credit period of 30 to 45 days to its customers, while it receives a credit period of 45 days from its suppliers.

Cyclical auto industry
The automobile industry is cyclical and automotive component suppliers' sales are directly linked to sales of auto OEMs, which are linked with economic activity. The auto industry is inherently vulnerable to economic cycles, industrial growth, investments in infrastructure, and regulatory changes (emission norms, scrappage policy, and overloading norms). The auto-ancillary industry is also competitive with a large number of players in the organised as well as unorganised sector.

Key strengths

Experienced promoters
The promoter, Sanjay Gupta has an experience of more than three decades in the auto components industry. He is supported by Yashi Gupta (Managing Director), who has more than a decade of experience in the industry. Their industry experience and strong understanding of market dynamics has enabled PPPL to maintain healthy relations with customers and suppliers and entail repeat orders from them. They are supported by a team of qualified professionals with significant expertise in their respective fields.

Established clientele and strategic location of manufacturing facilities
With over three decades of operations in the industry, PPPL has developed long-standing and well-established relationships with its clients, particularly Bajaj Auto Limited (BAL). The company is gradually expanding its customer base with diversification in the household appliances segment. The company has two manufacturing units: one in Chakan, Pune and another in Waluj, Aurangabad, which are in the vicinity of its key customers. These regions being auto hubs, enables the company to cater to major original equipment manufacturers (OEMs).

Comfortable capital structure
PPPL's debt profile primarily consists of term loans, unsecured loans from promoters and working capital borrowings. The capital structure of PPPL continues to remain comfortable marked by overall gearing of 0.97x with the net worth base of ₹63.18 crore as on March 31, 2025 (considering unsecured loans of ₹13.08 crore from promoters as quasi equity as the same have been subordinated to bank borrowings), compared to 0.59x as on March 31, 2024.

Liquidity: Adequate

Liquidity factors remained satisfactory marked by current and quick ratio of 1.20x and 0.74x respectively as on March 31, 2025 (1.13x and 0.68x as on March 31, 2024). Working capital cycle remained moderate at 79 days in FY25, compared to 68 days in FY24. Cashflow from operations remained negative in FY25 (₹7.66 crore in FY24).
