Long Term Bank Facilities	145.00	CARE BB-; Stable; ISSUER NOT COOPERATING*	Downgraded from CARE BB+; Stable and moved to ISSUER NOT COOPERATING category

Details of instruments/facilities in Annexure-1.

*Issuer did not cooperate; based on best available information.

Rationale and key rating drivers

CARE Ratings Limited (CARE Ratings) has been seeking information from SRC Ecotex (India) Private Limited (SEIPL) to monitor ratings vide email communications/letters dated January 27, 2026, March 02, 2026, among others and numerous phone calls. However, despite our repeated requests, the company has not provided requisite information for monitoring ratings. In line with the extant Securities and Exchange Board of India (SEBI) guidelines, CARE Ratings has reviewed the rating based on the best available information, which however, in CARE Ratings' opinion is not sufficient to arrive at a fair rating. Ratings on SEIPL's bank facilities will now be denoted as **CARE BB-; Stable; ISSUER NOT COOPERATING***.

Users of these ratings (including investors, lenders, and public at large) are hence requested to exercise caution while using above ratings.

The revision in ratings is on account of non-availability of operational and financial information.

Analytical approach: Standalone

Outlook: Stable

Stable outlook reflects SEIPL's ability to complete the project given the experience of its promoters in similar line of business and commence operations within envisaged revised timelines.

Detailed description of key rating drivers:

At the time of last rating on April 09, 2025, the following were the rating strengths and weaknesses:

Key weaknesses

Delay in project leading to cost and time overrun:

Initially, the project was planned to commence in October 2023 but was delayed to September 2024 due to delays in bank loan disbursements and changes in project structural design on account of initial miscalculation. The COD was further postponed to May, 2025, on account of installation of additional machineries, which increased civil construction and other related work. These additional machineries were installed to enhance operational efficiency and product quality as per the RIL standards. Nevertheless, the project is at the advanced stage of completion.

Advanced stage of project completion albeit stabilization risks:

The project's original cost was estimated at Rs. 215 crores, funded by a Rs. 145 crore term loan and Rs. 70 crore promoter contribution at a D:E ratio of 2.07x. As of the latest TEV report of Dun & Bradstreet dated March 13, 2025, the cost has increased to Rs. 247 crores (including GST) due to expanded civil work to accommodate additional installation of machineries for enhancing productivity and quality of the products. The upgrades in the machineries are implemented post discussions with RIL. The additional cost will be covered by promoter funds and an additional proposed term loan of Rs. 15.70 crore, bringing the final funding structure to Rs. 159.70 crore in term loans and Rs. 87.32 crore from the promoters. As of February 12, 2025, promoters have infused Rs. 63.22 crore in equity and Rs. 21.91 crore in unsecured loans. Financial closure was achieved with a Rs. 144 crore sanctioned loan from Union Bank of India, with the additional Rs. 15.70 crore loan in the final stage with the said bank. The project is at the advance stage of completion and expected to start commercial operations from May 2025. Project stabilization in a timely manner, thereby leading to sustainable increase in the scale of operations would remain key rating monitorable.

Key strengths

Experienced promoters and management in similar line of business:

The Company is promoted by Mr P. V. Ravindra, Mr G. C. Shekar Reddy, Mr Y. Rajashekar and Mr M. Srinivas Chakravarthy. The promoters have been in similar line of business for more than 11 years since they are the promoters of Srichakra Poly Plast India Private Limited which is into end-to-end recycling and plastic waste management company and manufacturer of plastic recycling products for multinational corporations. Furthermore, as of December 31, 2024, Reliance Polyester Limited (a wholly owned subsidiary of RIL) has acquired a 26% stake in SEIPL, indicating RIL's involvement in the business operations.

Successful tie up with RIL on Tolling Agreement basis:

In August 2021, Reliance Industries Limited (RIL) announced plans to double its PET recycling capacity by establishing a recycled polyester staple fiber (PSF) manufacturing facility in Andhra Pradesh. SEIPL will build and operate the facility exclusively for RIL under a Tolling Agreement signed on January 2022.

Under this 10-year contract, SEIPL will design, procure, construct, install, operate, and maintain the plant in consultation with RIL. The tolling agreement ensures SEIPL receives a management fee for processing, covering manufacturing costs, financing expenses, and return on equity, thereby mitigating input cost volatility and off-take risks. RIL will also assist SEIPL in project implementation and participate in key management decisions.

Strong Counter Party risk offtake:

Reliance Industries Limited (RIL) currently recycles PET bottles at its Barabanki, Hoshiarpur, and Nagothane plants, using post consumer PET bottles as raw material for manufacturing recycled polyester fiber. The company already converts over 2 billion PET bottles annually, and with the addition of SEIPL's capacity, this figure is expected to reach 5 billion bottles, contributing significantly to sustainability efforts. RIL also maintains a strong debt servicing record and low credit risk, with a gearing ratio below unity, reflecting its financial stability.

Strategic alliance with shared vision to reduce plastic waste:

RIL aims to build a sustainable, zero-carbon business by supporting entrepreneurs in transforming waste into wealth through recycling initiatives. The collaboration with SEIPL strengthens efforts to reduce plastic pollution and advance India's circular economy for plastic waste. With RIL's industry expertise, technical knowledge, and financial backing, SEIPL will be able to research, innovate, and develop high-quality, sustainable products for RIL's Green Gold portfolio, reinforcing their shared commitment to sustainability.

Major pre-COD approvals in place:

Major pre-construction and pre-COD approvals have been obtained, including Environmental Clearance (EC) from MOEFCC, Factory Plan Approval from the Director of Factories, AP, Provisional Fire NOC, Consent to Establish (CTE) from the State PCB, Power Connection, and EPCG License. Other necessary approvals such as CTO, CEIG approval, Boiler Inspector approval, and Fire NOC for occupancy are also in place for commencing commercial operations. Additionally, key pending approvals include those from the Inspector of Factories, Factory License, and Groundwater Extraction Permit.

Favourable Location:

The location of the plant is ideal for a manufacturing unit considering proximity to ports & highways hence easy logistics for Raw Material procurement & delivery catering to South India. The land is easily accessible from National Highway - NH- 16 (Chennai – Srikakulam – Kolkata Highway). NH- 16 is within Five KM from the project site. The project land is close to Krishnapatnam port and Tirupati Airport. Proposed utilities such as freshwater accessibility, High tension power grid supply, Wastewater treatment facilities are adequate and available to carry out the project.

Stable Industry Outlook:

The global polyester market is expected to reach USD 151.60 billion dollars by 2028 growing at a rapid pace with a CAGR of 8.2%. The global demand is expected to continue growing because of its affordability, durability and versatility. The increasing focus on sustainability is driving the demand for the recycled polyester staple fibre (PSF), polyester fibre fill (PFF) and washed PET flakes. The Indian polyester market is also set to witness a rapid growth. Rising disposable income is leading to increased demand for clothing and other textile products. The demand for synthetic fibre in India is increasing because of its affordability and durability. Indian companies are focusing on adoption of recycled polyester for sustainable productions. Government initiatives such as "Make in India" is also promoting the textile industry and supporting the adoption of recycle polyester.
