

Vivekanand Cotspin Limited

June 05, 2026

Facilities/Instruments	Amount (₹ crore)	Rating ¹	Rating Action
Long-term bank facilities	10.90 (Reduced from 15.78)	CARE BB+; Stable	Reaffirmed
Long-term / Short-term bank facilities	48.00 (Enhanced from 28.00)	CARE BB+; Stable / CARE A4+	Reaffirmed

Details of instruments/facilities in Annexure-1.

The list of facilities / instruments falling under the purview of various financial sector regulators (FSRs), along with the names of respective FSRs has been disclosed under Annexure-7.

Rationale and key rating drivers

For arriving at ratings of Vivekanand Cotspin Limited (VCL), CARE Ratings Limited (CareEdge Ratings) has considered a combined analytical view of Vivekanand group (VG) entities, Vivekanand Industries (VI), VCL (formerly known as Vivekanand Cotspin Private Limited) and Ambica Cotseeds Limited (ACL), considering common management and promoter group, presence in similar line of business and operational linkages.

Ratings assigned to bank facilities of VG continue to remain constrained considering its moderate profitability and modest net worth base. Ratings are also constrained by VG's presence in a highly fragmented and competitive textile industry, and its profitability susceptible to fluctuation in cotton prices.

However, ratings take cognisance of sustained growth in its scale of operations in FY26 (refers to April 01 to March 31) resulting in adequate liquidity position. Ratings continue to derive strength from promoters' vast experience with established track record of operations in the textile industry, and locational advantage being present in the cotton-growing state of Gujarat.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors

- Significant improvement in scale of operations and improvement in profit before interest, lease rentals, depreciation, and tax (PBILDT) margin above 7% on a sustained basis leading to improved liquidity for the company.
- Improvement in debt coverage indicators with PBILDT interest coverage above 5x and total debt to gross cash accruals (TD/GCA) below 7x on a sustained basis.

Negative factors

- Moderation in scale operations or profitability resulting in deterioration in liquidity of the company.
- Deterioration in capital structure marked by overall gearing above 2.5x on a sustained basis.

Analytical approach: Combined

CareEdge Ratings has considered combined financial and operational risk profile of VI, VCL and ACL as entities are engaged in similar line of business, promoted by same promoter group, are under common management and have operational linkages. Entities combined are shown in Annexure-6.

Outlook: Stable

Stable outlook reflects CareEdge Ratings' expectation that the group is likely to sustain its business risk profile considering its experienced promoters and integrated operations.

Detailed description of key rating drivers:

Key weaknesses

Moderate profitability

Operating profitability of the entity has remained modest over the years up to FY26, with PBILDT margins in the range of 1%-4%, constrained by the inherently low value addition in the cotton ginning business and intense competition in the textile industry. In FY26, the PBILDT margin declined by 112 basis points to 2.56% (FY25: 3.68%), primarily due to a higher proportion of trading sales in the overall revenue mix, which typically yields lower margins compared to core ginning and spinning operations.

¹Complete definition of ratings assigned are available at www.careratings.com and other CARE Ratings Limited's publications.

Leveraged capital structure and moderate debt coverage indicators

VG's capital structure improved though remained moderate, as reflected in an overall gearing of 1.97x as on March 31, 2026 (2.19x as on March 31, 2025). Improvement in gearing was primarily supported by repayment of unsecured loans aggregating to ₹7.20 crore, and equity infusion in VCL to the tune of ₹8.00 crore, resulting in an augmentation of the net worth to ₹67.68 crore in FY26 (PY: ₹58.70 crore).

The debt coverage indicators continue to remain moderate with PBILDT interest coverage at 1.85x and TD/GCA at 11.74x, respectively, in FY26 (PY: 2.09x and 11.36x, respectively).

Profitability susceptible to volatile raw material prices

The margins are highly susceptible to changes in the cotton prices. The cotton price is fixed by the government through the minimum support price (MSP). However, the purchase price depends on the prevailing demand-supply situation, which restricts bargaining power with suppliers as well. The profitability depends largely on the cotton prices, which are governed by factors such as area under cultivation, monsoon, and international demand-supply situation, among others. Any adverse movement of cotton prices further impacts profitability. However, VG tries to forecast the demand in the market and endeavours to keep inventory of 25-30 days. VG is able to partly pass on significant change in raw material prices to its customers.

Foreign currency risk associated with export business

ACL, group company of VCL, is engaged in export of cotton bales and cotton yarn. ACL primarily exports to China, Bangladesh, Taiwan, Vietnam, Thailand, Europe, and America. ACL provides credit period of 90 to 120 days (against LC) to its clients and thus it is exposed to adverse movement in foreign currency. However, to counter currency risk, ACL enters forward contract, which mitigates the fluctuation risk to large extent.

Key strengths

Long track record with integrated operations

VG, through VI has a long and established track record of operations of over four decades in the textile industry; being operational since 1983. VI is engaged in cotton ginning and manufacturing cotton oil cakes. The group also ventured into spinning via ACL and started selling in export market. In 2015, the group enhanced its facilities by incorporating VCL, which is engaged in both ginning and spinning. Since FY23, ACL has limited only to trading cotton bales and cotton yarn, primarily to export market. Thus, the group is vertically integrated from procurement of raw materials to sales of cotton yarn and cotton oil cakes.

Location advantage

VG's plant is in Mehsana (Gujarat), which has raw cotton available within the proximity. Gujarat is the largest cotton producer in India. VG's presence in textile manufacturing region results in benefit derived from lower logistic cost (both on transportation and storage), easy availability, and procurement of raw materials at effective prices.

Growth in scale of operations

The total operating income of VG witnessed a significant year-on-year growth of 56.78% to ₹933.48 crore in FY26 from ₹595.38 crore in FY25, driven by higher export volumes of cotton bales/yarn and oil cake through ACL across multiple geographies, supported by improved capacity utilisation in the cotton ginning and spinning segments. The export sales have contributed ~30% of the total sales in FY26 (PY: ~28%).

As on May 09, 2026, VCL has order book of ₹54 crore.

Liquidity: Adequate

The liquidity profile of VG remains adequate, supported by moderate utilisation of working capital limits and sufficient cash and bank balances, amounting to ₹15.82 crore as on March 31, 2026 (PY: ₹3.83 crore).

The average utilisation of fund-based working capital limit of VG remained moderate in the range of 56% to 82% in the trailing 12 months ended March 31, 2026.

The textile segment remains inherently working capital intensive, primarily due to the seasonality in raw material procurement and inventory holding requirements. However, the operating cycle improved to 40 days in FY26 from 67 days in FY25, considering lower inventory holding days, supported by improved inventory management, faster inventory turnover, and stable raw material availability, resulting in reduced stocking requirements during the year.

VG generated cash flow from operations (CFO) of ₹15.59 crore in FY26 (FY25: ₹39.86 crore), the moderation was primarily attributable to lower working capital release compared to FY25. The current ratio and quick ratio stood at 1.38x and 0.80x as on March 31, 2026, respectively (FY25: 1.47x and 0.62x).

Going forward, VG is expected to generate GCA of ₹11-14 crore, which are adequate to meet its debt repayment obligations of ~₹4.50-5.50 crore and capex requirement over the projected period, providing a sufficient cushion in liquidity.

Annexure-7: List of Facilities/Instruments and FSRs

As required by SEBI Circular dated February 10, 2026 to Credit Rating Agencies (CRAs), the list of activities or instruments falling under the purview of various FSRs, along with the names of respective FSRs, is being disclosed below:

Sr. No.	Facilities/Instruments Name	Regulator of the Instruments ²
1.	Listed / Proposed to be Listed Bonds / Debentures / Preference Shares (All Securities)	SEBI
2.	Unlisted / Proposed to be Unlisted Bonds / Debentures / Preference Shares (All Securities)	MCA
3.	Listed PTCs / Securitisation Notes (Originated by Entities Regulated by RBI) *	SEBI
4.	Listed PTCs / Securitisation Notes (Originated by Entities Not Regulated by RBI) *	SEBI
5.	Unlisted PTCs / Securitisation Notes (Originated by Entities Regulated by RBI) *	RBI
6.	Listed Commercial Paper and NCDs with Original Maturity Less Than 1 Year	RBI
7.	Unlisted Commercial Paper and NCDs with Original Maturity Less Than 1 Year	RBI
8.	Loan Facilities (Fund / Non-Fund Based) From Banks / NBFCs / NHB / FIs ^	RBI
9.	External Commercial Borrowings and Other Similar Borrowings	RBI
10.	Certificates of Deposit	RBI
11.	Fixed Deposits Raised by Banks, NBFCs, HFCs, FIs	RBI
12.	Fixed Deposits Raised by Corporates Other Than Banks, NBFCs, HFCs, FIs	MCA
13.	Inter Corporate Deposits / Loans Extended by Corporates	MCA
14.	Borrowing Programme ~	-
15.	Issuer Ratings #	-
16.	Credit Ratings for Capital Protection Oriented Schemes (By Mutual Funds and AIFs)	SEBI
17.	Credit Quality Ratings (CQRs) for Mutual Fund Schemes and Schemes of AIFs	SEBI
18.	Listed Security Receipts	SEBI
19.	Unlisted Security Receipts	RBI
20.	Independent Credit Evaluation (ICE)	RBI
21.	Expected Loss Ratings (For Loan Facilities (Fund / Non-Fund Based) from Banks / NBFCs / NHB / FIs)	RBI
22.	Expected Loss Ratings (Listed / Proposed to be Listed Bonds / Debentures / Preference Shares (All Securities))	SEBI
23.	Expected Loss Ratings (Unlisted / Proposed to be Unlisted Bonds / Debentures / Preference Shares (All Securities))	MCA
24.	Unlisted PTCs / Securitisation Notes (Originated by Entities Not Regulated by RBI) *	Investor-side regulator such as IRDAI, PFRDA @

* Includes securitisation transactions involving assignee payout, acquirer's payout.

~ The rated instrument may involve issuance of different instruments such as debt securities (listed or otherwise), bank loans, commercial paper (listed or otherwise), among others. The regulator of the instrument may accordingly be SEBI, RBI or MCA and can only be determined upon

²SEBI: Securities and Exchange Board of India; RBI: Reserve Bank of India; MCA: Ministry of Corporate Affairs; IRDAI: Insurance Regulatory and Development Authority of India; PFRDA: Pension Fund Regulatory and Development Authority

issuance. In the rating notes subsequent to issuance(s), CARE Ratings Limited shall separately capture the rated quantum details and names of respective regulators.

^ Includes bank facilities such as liquidity facility, second loss facility that are part of securitisation transactions.

There is no instrument being rated and hence, Regulator of the Instrument is not applicable. The rating scale and definitions are being followed as stipulated in SEBI Master Circular for CRAs.

@ These ratings were assigned in regulatory regime prior to introduction of SEBI CRA Circular dated February 10, 2026 and the investor side regulators have accordingly been included.

Note: For facilities / instruments falling under the purview of FSRs other than SEBI, the grievance / dispute redressal mechanisms and investor protection mechanisms provided by SEBI shall not be available.
