

Primo Chemicals Limited

June 29, 2026

Facilities/Instruments	Amount (₹ crore)	Rating ¹	Rating Action
Long-term bank facilities	102.71	CARE BBB-; Stable	Reaffirmed
Long-term / Short-term bank facilities	75.00	CARE BBB-; Stable / CARE A3	Reaffirmed

Details of instruments/facilities in Annexure-1.

The list of facilities / instruments falling under the purview of various financial sector regulators (FSRs), along with the names of respective FSRs has been disclosed under Annexure-7.

Rationale and key rating drivers

Reaffirmation in ratings assigned to bank facilities of Primo Chemicals Limited (PCL) continues to derive strength from its experienced promoters with a long track record of operations, favourable plant location, and moderate diversification of the clientele across end-user industries. Reaffirmation also factors in the marginal improvement in the company's operational and financial performance in FY26 (FY refers to April 01 to March 31), supported by better electrochemical unit (ECU) realisations. With improved profitability and lower debt levels, PCL's capital structure remained comfortable, with an improvement in debt coverage metrics in FY26. However, the company has proposed to acquire the remaining 51% stake in Flow Tech Chemicals Private Limited (FTCPL), by March 31, 2027, pending valuation and due diligence, which may exert pressure on the company's debt protection metrics, particularly if funded through debt which shall remain monitorable.

However, ratings continue to remain constrained by the inherent volatility in ECU realisations of caustic soda, leading to volatile scale and margins over the last five years ending FY26. PCL's profitability remains susceptible to adverse movements in power costs (accounting for ~45-50% of total input costs), and exposure to competitive pressures from cheaper imports and established integrated players in the inherently cyclical caustic soda industry.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors

- Increase in the total operating income (TOI) above ₹600 crore while maintaining its profit before interest, lease rentals, depreciation, and taxation (PBILDT) margins above 14% and debt coverage metrics.
- Improvement in total debt to PBILDT below 1.25x.

Negative factors

- PBILDT margin falling below ~7% and/or revenue from operations below ₹400 crore, impacting PCL's financial profile on a sustained basis.
- Higher-than-envisaged debt-funded investment/acquisition leading to deterioration of overall gearing above 1x and affecting its liquidity.
- Tightening of prevailing pollution control/ environmental norms and/or regulatory ban on production and sales of major products significantly impacting its business and profitability.

Analytical approach: Standalone

Outlook: Stable

The "Stable" outlook reflects CARE Ratings Limited's (CareEdge Ratings') expectation that PCL is expected to sustain its operating performance while maintaining comfortable debt protection metrics, despite planned debt-funded capex in the near-to-medium term.

Detailed description of key rating drivers:

Key strengths

Experienced promoters and management

The company was originally promoted by Punjab State Industrial Development Corporation (PSIDC) in 1975. PSIDC subsequently divested its 33% stake in Q3FY21 (Q3 refers to October 01 to December 31). In October 2020, promoters of the Flow Tech Group acquired a stake in PCL from the open market. Established in 1993, the Flow Tech Group is a pioneer in manufacturing chlorinated

¹Complete definition of ratings assigned are available at www.careratings.com and other CARE Ratings Limited's publications.

paraffin and hydrochloric acid. Post the change in ownership, the company's management has transitioned from PSIDC-nominated directors to an experienced leadership team comprising Sukhbir Singh Dahiya, Jagbir Singh Ahlawat, and Naveen Chopra, who collectively bring extensive experience in the chemical industry.

Comfortable financial risk profile; debt metrics may moderate going forward

With improved ECU realisations, the company witnessed an improvement in its overall operational performance reflected through improved TOI and profitability margins in FY26. Reduction in debt levels led to a marginal improvement in debt protection metrics in FY26. Overall gearing ratio stood at 0.41x in FY26, compared to 0.51x in FY25, while interest coverage ratio (PBILDT/interest cost) improved to 4.58x in FY26 from 3.01x in FY25. The company's capital structure is expected to remain comfortable, supported by adequate internal accruals and healthy net worth.

CareEdge Ratings notes PCL's plan to acquire the remaining 51% stake in FTCPL, in which it currently holds 49% stake. The proposed acquisition is expected to be completed on or before March 31, 2027, subject to valuation and completion of due diligence. CareEdge will continue to monitor the valuation amount and funding structure of the proposed transaction. The company has planned capital expenditure of ₹60–70 crore over FY27 and FY28 with fresh debt of ~₹30 crore. The resultant increase in leverage may lead to moderation in PCL's debt protection metrics and remains a key monitorable.

Moderate scale of operations with improved profitability

The company's TOI marginally improved to ₹578.11 crore in FY26 from ₹556.54 crore in FY25, mainly driven by improvement in ECU sales realisation to ₹42,698/- metric tonne (MT) in FY26 from ₹41,505/- MT in FY25. With improved ECU sales realisation, PCL's PBILDT margin also improved to 14.67% in FY26 from 12.46% in FY25. Profitability is expected to marginally improve over the medium term, supported by power saving cost measures. Elevated power costs in FY26, driven by higher discom tariffs, are likely to moderate with sustained benefits from the operational 35-MW captive plant and incremental support from the proposed 50-megawatt (MW) solar project under a captive structure. The latter, with contracted tariffs of ₹4.20 per unit, is expected to yield annual savings of ₹10–15 crore, supporting margin expansion, subject to timely implementation and stabilisation.

Locational advantage of the plant with moderate client diversification across end-user industries

PCL's units are located at Naya Nangal in Ropar, Punjab. PCL has locational advantage owing to easy access to end-users in the vicinity and its proximity to the Bhakra Left Bank Power Generating station, which provides it uninterrupted power supply, and River Sutlej as a continuous water supply source, both of which are critical inputs for the smooth functioning of the plant. The plant benefits from road and rail connectivity, as the company has its own railway siding, and currently, salt is being transported from Gujarat directly to the PCL factory, which reduces the transportation cost. Due to its strategic location, PCL cost-effectively caters not only to Northern India but also to the farther reaches of the country.

PCL's products find application across industries, such as paper, textiles, detergents, fast-moving consumer goods (FMCG), paints, chemicals, and pharmaceutical industries. The company has healthy relationships with customers and receives repeat orders from them.

Key weaknesses

Volatility in ECU realisations of caustic soda and its by-products leading to volatile margins

PCL operates in a cyclical and commoditised industry, exposing it to significant volatility in caustic soda realisations. The net ECU realisations have exhibited high fluctuations over the last three years, declining to ₹33,959 per metric tonne (PMT) in FY2024 from ₹50,045 PMT in FY23, followed by a recovery to ₹41,505 PMT and ₹42,698 PMT in FY25 and FY26, respectively. While realisations are higher in Q1FY27 (Q1 refers to April 01 to June 30), however, sharp decline in ECU realisations could adversely impact accruals and profitability, which will remain a key rating monitorable.

Susceptibility of profitability to adverse movements in power cost

PCL's profitability remains susceptible to adverse movements in power cost, given the energy-intensive nature of the electrolysis process, with power constituting a significant portion (~54% in FY26) of its overall cost structure. The company's power cost remained largely stable at ₹238.24 crore in FY26 compared to ₹232.82 crore in FY25. However, the risk is partly mitigated by the sustained benefits from the operational 35-MW captive plant and incremental support from the proposed 50 megawatt (MW) solar project under a captive structure. The latter, with contracted tariffs of ₹4.20 per unit, is expected to yield annual savings of ₹10–15 crore, supporting margin expansion, subject to timely implementation and stabilisation.

Competition with established integrated players and cyclicity of the caustic soda industry

PCL operates in a highly competitive environment, marked by the presence of large and well-established integrated players such as Gujarat Alkalies and Chemicals Limited, DCM Shriram Limited, and Grasim Industries Limited, and competition from cheaper

imports. The fragmented nature of the industry intensifies competitive pressures, with larger organised players benefiting from stronger brand presence and better bargaining power with suppliers.

The caustic soda industry is inherently cyclical in nature, resulting in fluctuations in realisations and profitability. While industry realisations moderated sharply in FY24, they witnessed improvement in the subsequent years, highlighting the cyclical trend in the sector.

Liquidity: Adequate

The liquidity position of PCL is adequate as characterised by sufficient cushion in projected cash accruals of ~₹68 crore compared to repayment obligations of ~₹27 crore in FY27. The company has free cash and bank balances amounting ~₹2 crore as on March 31, 2026. The average utilisation of fund-based working capital limits stood at ~82% in the last 12 months ending on April 30, 2026. PCL's liquidity position is expected to remain adequate despite the envisaged debt-funded capex, supported by sufficient internal accruals.

Assumptions/Covenants: Not applicable

About the company and industry

Industry classification

Macroeconomic indicator	Sector	Industry	Basic industry
Commodities	Chemicals	Chemicals & petrochemicals	Commodity chemicals

Incorporated in December 1975, the company was promoted by PSIDCL, which divested its 33% stake in Q3FY21. In October 2020, the promoters of the Flow Tech Group acquired a stake in PCL from the open market and held 31.35% stake in the company as on March 31, 2023. The company's name was subsequently changed to Punjab Alkalies & Chemicals Limited in 1983, and to its current name in December 2022. PCL commenced operations at Naya Nangal, Roopnagar, Punjab, in January 1984. The company mainly manufactures caustic soda lye and caustic soda flakes, which are widely used in industries, such as soap, paper, dyes, chemicals, and plastic. Caustic soda flakes, stable bleaching powder and aluminium chloride were introduced by the company for product diversification. Other products, such as liquid chlorine, hydrochloric acid and sodium hypochlorite among others are the by-products of the manufacturing process. The company's manufacturing facility, situated in Naya Nangal, Ropar, Punjab, has an installed capacity of 500 tonnes per day.

As required by SEBI Circular dated February 10, 2026, to Credit Rating Agencies (CRAs), the list of activities or instruments falling under the purview of various FSRs, along with the names of respective FSRs, is being disclosed below:

Sr. No.	Facilities/Instruments Name	Regulator of the Instruments ²
1.	Listed / Proposed to be Listed Bonds / Debentures / Preference Shares (All Securities)	SEBI
2.	Unlisted / Proposed to be Unlisted Bonds / Debentures / Preference Shares (All Securities)	MCA
3.	Listed PTCs / Securitisation Notes (Originated by Entities Regulated by RBI) *	SEBI
4.	Listed PTCs / Securitisation Notes (Originated by Entities Not Regulated by RBI) *	SEBI
5.	Unlisted PTCs / Securitisation Notes (Originated by Entities Regulated by RBI) *	RBI
6.	Listed Commercial Paper and NCDs with Original Maturity Less Than 1 Year	RBI
7.	Unlisted Commercial Paper and NCDs with Original Maturity Less Than 1 Year	RBI
8.	Loan Facilities (Fund / Non-Fund Based) From Banks / NBFCs / NHB / FIs ^	RBI
9.	External Commercial Borrowings and Other Similar Borrowings	RBI
10.	Certificates of Deposit	RBI
11.	Fixed Deposits Raised by Banks, NBFCs, HFCs, FIs	RBI
12.	Fixed Deposits Raised by Corporates Other Than Banks, NBFCs, HFCs, FIs	MCA
13.	Inter Corporate Deposits / Loans Extended by Corporates	MCA
14.	Borrowing Programme ~	-
15.	Issuer Ratings #	-
16.	Credit Ratings for Capital Protection Oriented Schemes (By Mutual Funds and AIFs)	SEBI
17.	Credit Quality Ratings (CQRs) for Mutual Fund Schemes and Schemes of AIFs	SEBI
18.	Listed Security Receipts	SEBI
19.	Unlisted Security Receipts	RBI
20.	Independent Credit Evaluation (ICE)	RBI
21.	Expected Loss Ratings (For Loan Facilities (Fund / Non-Fund Based) from Banks / NBFCs / NHB / FIs)	RBI
22.	Expected Loss Ratings (Listed / Proposed to be Listed Bonds / Debentures / Preference Shares (All Securities))	SEBI
23.	Expected Loss Ratings (Unlisted / Proposed to be Unlisted Bonds / Debentures / Preference Shares (All Securities))	MCA
24.	Unlisted PTCs / Securitisation Notes (Originated by Entities Not Regulated by RBI) *	Investor-side regulator such as IRDAI, PFRDA @

* Includes securitisation transactions involving assignee payout, acquirer's payout.

~ The rated instrument may involve issuance of different instruments such as debt securities (listed or otherwise), bank loans, commercial paper (listed or otherwise), etc. The regulator of the instrument may accordingly be SEBI, RBI or MCA and can only be determined upon issuance. In the press releases subsequent to issuance(s), CareEdge Ratings shall separately capture the rated quantum details along with names of respective regulators.

²SEBI: Securities and Exchange Board of India; RBI: Reserve Bank of India; MCA: Ministry of Corporate Affairs; IRDAI: Insurance Regulatory and Development Authority of India; PFRDA: Pension Fund Regulatory and Development Authority

^ Includes bank facilities such as liquidity facility, second loss facility that are part of securitisation transactions.

There is no instrument being rated and hence, Regulator of the Instrument is not applicable. The rating scale and definitions are being followed as stipulated in SEBI Master Circular for CRAs.

@ These ratings were assigned during regulatory regime prior to introduction of SEBI CRA Circular dated February 10, 2026 and the investor side regulators have accordingly been included.

Note: For facilities / instruments falling under the purview of FSRs other than SEBI, the grievance / dispute redressal mechanisms and investor protection mechanisms provided by SEBI shall not be available.

Note on complexity levels of rated instruments: CareEdge Ratings has classified instruments rated by it based on complexity. Investors/market intermediaries/regulators or others are welcome to write to care@careedge.in for clarifications.

About us:

Established in 1993, CareEdge Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the Reserve Bank of India. With an equitable position in the Indian capital market, CareEdge Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CareEdge Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CareEdge Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.
