Long Term / Short Term Bank Facilities	1,415.00	CARE A+; Stable / CARE A1 (Single A Plus; Outlook: Stable/ A One)	Reaffirmed
Total Bank Facilities	1,500.00 (Rs. One Thousand Five Hundred Crore Only)		

Details of instruments/facilities in Annexure-1

Detailed Rationale & Key Rating Drivers

The reaffirmation of the ratings assigned to the bank facilities of Ahluwalia Contracts (India) Limited (ACIL) continues to derive strength from ACIL's experience in diversified construction activities, its established track record and execution capabilities along with healthy and diversified order book position of the company providing medium to long term revenue visibility with presence of price escalation clauses with respect to input costs for a major portion of contracts. The ratings take into account ACIL's comfortable capital structure, healthy debt coverage with strong liquidity position along with increased thrust of government on infrastructure development.

The rating strengths, however, are constrained by moderation in the profitability parameters, inherent cyclical trends associated with the construction sector, the working capital intensive nature of operations and its relatively high level of receivables, which had witnessed some write-offs in the past particularly from real estate sector.

Rating Sensitivities

Positive Factors - Factors that could lead to positive rating action/upgrade:

- Consistent increase in scale of operations by 15%-20% for 2-3 years with sustained profitability margins of around 12%
- Maintained order book position with strong counterparties providing a revenue visibility of 3-3.5x.

Negative Factors- Factors that could lead to negative rating action/downgrade:

- Elongation of operating cycle beyond 150 days
- Decline in scale of operations and contraction in the profitability margins below 8%
- Increased write-offs and provisioning of debtors, beyond envisaged levels, leading to deterioration of profitability margins and financial risk profile of the company

Detailed description of the key rating drivers

Key Rating Strengths

Experienced management with established track record and execution capabilities

ACIL is a professionally managed company, headed by Mr. Bikramjit Ahluwalia, who has more than five decades of experience in the construction industry. He is assisted by a team of qualified executives including Mr. Shobhit Uppal, Deputy Managing Director, and Mr. Vikas Ahluwalia, Whole time Director, who have significant experience in infrastructure space. In the past, the company has successfully completed several projects ranging over construction of institutional buildings, corporate office complexes, multi-storied housing complexes, township development projects, hospitals, hotels, educational institutes, gymnasiums & sport complexes etc.

Healthy and diversified order book, comprising primarily of Government contracts, with significant order inflows in FY21 and 6MFY22

The company had unexecuted order book of around Rs.7,324.98 crore as on September 30, 2021, representing ~3.70x of total operating income of FY21, providing revenue visibility over medium to long term. While ACIL had received orders worth Rs.3280 crore during FY21, it has also bagged orders of about Rs.1200 crore during 6MFY22. Government contracts constitute around 86% of the order book as on September 30, 2021 (81% as on December 31, 2020) as against the earlier position till FY18 wherein there was relatively higher dependence on private real estate contracts facing execution challenges and payment issues. Besides, the company's order book position is fairly diversified geographically with orders to be executed across various states such as Bihar, Jammu and Kashmir, West Bengal, Delhi, Maharashtra, Uttar Pradesh and Uttarakhand. Furthermore, the company has reduced its exposure towards residential/real estate segment (private) and subsequently increased its exposure in other segments like hospitals and educational institutions, thereby leading to reduced counterparty risk.

Comfortable financial risk profile and healthy liquidity position

ACIL's capital structure continues to remain comfortable with low reliance on external debts and healthy debt service coverage ratios. The overall gearing ratio (including long-term and short-term mobilization advances as debt) stood comfortable at 0.44x

¹Complete definition of the ratings assigned are available at www.careedge.in and other CARE Ratings Ltd.'s publications

as on March 31, 2021 (as against 0.37x as on March 31, 2020). Interest coverage ratio moderated to 4.16x in FY21 (PY: 4.86x) on account of increased interest costs due to higher mobilization advances and increased utilisation of NFB limits with the increased order book position of the company. Furthermore, the free cash and bank balance of Rs.225 crore as on September 30, 2021, gives an additional comfort amidst disruption in the sector owing to Covid-19 pandemic.

Key Rating Weaknesses

Moderation in operating performance during FY21, though improvement reflected in 9MFY22

While the total operating income for the company increased by ~6% to Rs.2004.51 crore during FY21 as against Rs. 1895.31 crore during FY20 primarily on account of expedited execution of the projects during the second half of FY21, the profitability margins of the company have remained subdued as reflected by PBILDT and PAT margin of 8.81% (PY:8.63%) and 3.85% (PY:3.40%) respectively during FY21 as against 12.94% and 6.65% respectively in FY19. Moderation in profitability margins in the period of FY21 and FY20 is on account of write-off of debtors to the tune of Rs.52 crore and Rs. 42 crore respectively. Furthermore, COVID-19 pandemic had also hindered the company's efforts towards improving their margins largely due to inadequate absorption of fixed costs thereby affecting the profitability margins of the company to a certain extent.

During 9MFY22, the company reported a total operating income of Rs.1961.61 crore as against Rs.1239.33 crore reported during the corresponding period in the previous fiscal. The company has reported a 60% growth in scale of operations during this period primarily due to impacted execution during 9MFY21. Furthermore, the PBILDT margins improved to 10.65% against 8.33% during 9MFY22 and the PAT margin improved to 5.70% against 3.24% during the said period owing to nil write-offs, reduced provisioning for bad debts at Rs.9.70 crore and improved execution activities during 9MFY22. The ability of the company to sustain its profitability margins amidst rising input costs and competitive environment shall continue to remain a key rating monitorable.

Working capital intensive nature of operations with relatively large receivables

The operations of the company are working capital intensive as reflected by its operating cycle of 99 days during FY21, (PY:108 days). This is primarily on account of a high collection period of 125 days (PY: 146 days), which, however, improved on account of reduction in debtors outstanding at gross levels from Rs.771.74 crore on March 31, 2020 to Rs.619.04 crore on March 31, 2021 (Both figures include retention money). As on September 30, 2021, the total outstanding receivables stood at around Rs.667.34 crore (including retention money). The company meets its working capital requirements through mobilization advances and elongating its creditors with low reliance on working capital borrowings as reflected from average working capital utilization of 18.43% for the 12-months' period ending December'21 (16% for 12-months period ending Dec'20).

Inherent cyclical trends associated with the construction sector

The construction sector continues to witness cyclical trends consistent with its inherent nature, notwithstanding a stable outlook for the sector in the long term. The construction industry contributes around 8% to India's gross domestic product (GDP). The sector has been marred by varied challenges over the past few years on account of economic slowdown, Covid-19, regulatory changes and policy paralysis, which had adversely impacted the financial and liquidity profile of players in the industry. The Government of India has undertaken several steps for boosting the infrastructure development and reviving the investment cycle, which has gradually resulted in increased order inflow and movement of passive orders in existing order book. The focus of the government on infrastructure development is expected to translate into business potential for the construction industry in the long-run. Going forward, companies with better financial flexibility are likely to be able to grow at a faster rate by leveraging potential opportunities.

Liquidity: Strong

The liquidity position of the company remained strong with Rs. 225 crore (Rs. 201 crore as on December 31, 2020) cash and bank balance as on September 30, 2021. Furthermore, its average working capital utilization remained low at around 18.43% during 12 months period ending December'21 (16% for 12 months ending December'20). The company has negligible long-term debt repayment obligations in FY22 and FY23 against a GCA of Rs.108.60 crore and Rs.135.10 crore reported during FY21 and 9MFY22 respectively.

Analytical approach: Standalone

About CARE Ratings Limited:

Established in 1993, CARE Ratings Ltd. is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India (SEBI), it has also been acknowledged as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). With an equitable position in the Indian capital market, CARE Ratings Limited provides a wide array of credit rating services that help corporates to raise capital and enable investors to make informed decisions backed by knowledge and assessment provided by the company.

With an established track record of rating companies over almost three decades, we follow a robust and transparent rating process that leverages our domain and analytical expertise backed by the methodologies congruent with the international best practices. CARE Ratings Limited has had a pivotal role to play in developing bank debt and capital market instruments including CPs, corporate bonds and debentures, and structured credit.

Disclaimer

The ratings issued by CARE Ratings Limited are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings Limited has based its ratings/outlooks based on information obtained from reliable and credible sources. CARE Ratings Limited does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings Limited have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings Limited or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE Ratings Limited is, inter-alia, based on the capital deployed by the partners/proprietor and the current financial strength of the firm. The rating/outlook may undergo a change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE Ratings Limited is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE Ratings Limited's rating.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
