Total Bank Facilities	101.53 (Rs. One Hundred One Crore and Fifty-Three Lakhs Only)		

Details of instruments/facilities in Annexure-1

Detailed Rationale & Key Rating Drivers

The ratings assigned to the bank facilities of Alpine Apparels Private Limited (AAPL) derive its strength from the long experience of promoters in the leather business, company's established track record of operations, long-standing relationship with reputed clients with growing scale of operations and adequate liquidity position. The rating strengths are, however, constrained on account of company's leveraged albeit improving capital structure, revenue concentration risk, vulnerability to changing fashion trends and highly competitive industry.

Rating Sensitivities

Positive Factors - Factors that could lead to positive rating action/upgrade:

- Sustainable improvement in scale of operations beyond by 15% with improvement in profitability margins
- Improvement in the capital structure with an overall gearing of below 1x

Negative Factors- Factors that could lead to negative rating action/downgrade:

- Stretch in the working capital cycle or any large capital expenditure in the near term, thereby leading to weakening of financial risk profile.
- Deterioration in the capital structure with an overall gearing beyond 2x.

Detailed description of the key rating drivers

Key Rating Strengths

Experienced Promoter:

Mr. Sanjay Leekha is having a vast experience and in-depth knowledge of the Leather goods and products industry. He has been associated with this industry since 1986, when he set up his Leather gloves manufacturing facility at Faridabad. Mr. Leekha is presently the Chairman of The Council for Leather Exports, Ministry of Commerce & Industry, Govt of India.

Reputed customer base though with customer concentration

Although AAPL has scaled up its operations over the years yet the contribution of top 5 customers continues to remain high which stood at ~83% of the net sales during FY21 (PY: ~82%), with one customer, Centric Brands LLC, contributing to around 26% to the net sales in FY21 (PY: 10.60%). This exposes the company towards customer concentration risk. Any change in procurement policy of this customer may adversely impact the business of the company. This also exposes the company's revenue growth and profitability to its customer's future growth plans. The company has long term association of 7-8 years with its major customers which partly mitigate the revenue concentration risk. The top 10 customers of the company contributed to 89.37% (PY: 89.16%) of the total revenue.

Growing Scale of operations along with steady operational performance

Scale of operations of the company remained small in the past years, though scale is growing from Rs 63.89 crore to Rs 199.28 crore during the period FY17-FY20 registering CAGR of 46%. However, in FY21, company's turnover declined by 31% due to the impact of COVID 19. Company's profitability is improving YoY from FY16 to FY21 due to economies of scale. PBILDT Margin improved from 8.62% in FY20 to 9.56% in FY21 majorly on account of decrease in processing expenses from Rs 14 crore in FY20 to Rs 4 crore in FY21 due to inhouse processing instead of job work. Profitability of the company depends on the order size of the product and customer's purchasing power.

9MFY22 Performance: Company reported turnover of Rs 160.05 crore till Dec 21 with PBILDT of Rs 19.17 crore signifying further improvement in the profitability due to economies of scale.

Key Rating Weaknesses

Moderate Capital Structure:

The company's debt to equity ratio is improving YoY from 4.44x in FY17 to 1.91x as on March 31, 2021 on account of accretion of profits in the business. Further in FY21, improvement is seen on account of reduction in working capital limit utilisation from

¹Complete definition of the ratings assigned are available at www.careedge.in and other CARE Ratings Ltd.'s publications

Rs 55 crore in FY20 to Rs 31 crore in FY21 which is partially offset by increase in long term borrowings to the extent of Rs 5 crore. However, Interest coverage ratio moderated from 2.53x in FY20 to 2.28x in FY21 on account of high interest cost despite decline in turnover of the company. Total debt to GCA moderated from 8.48x in FY20 to 8.54x in FY21 due to declined total operating income thereby leading to lower GCA.

Exposure to fluctuation in price of commodities and currency rates:

AAPL procures majority of raw material from the approved vendors as it deals with reputed clients in luxury and premium segment having huge focus on the quality of raw material involving stringent quality checks. Thus, these clients have their appointed vendors from countries like china, Korea, hongkong and Italy etc. exposing the company to foreign exchange risk. Since, the company is majorly into exports which insulates it from forex risk by natural hedge to some extent. Apart from natural hedge, company does not hedge its exposure.

Vulnerability to changes in fashion trends

The branded lounge wear/ night wear segment is driven by fashion trends and its target segment's aspirations. Therefore, their association with brands may change. Thus, manufacturers need to constantly innovate and adapt to the changing preferences of the target segment. AAPL, with its team of in-house designers who work on the upcoming season's collections, is expected to have the ability to adapt to the changing market trends.

Working capital intensive nature of operations

Operations of the company are highly working capital intensive marked by an average operating cycle of around 159 days (PY:122 days) This is primarily because the company has to provide a credit period of around 90 days to the international customers. Also, the company is required to maintain adequate inventory of raw materials for the smooth running of its production processes. Company imports majority of its raw material from china, Italy, hongkong etc which involves lead time of 30 days approximately. Also, company stock its raw material majorly to cater any urgent demand and to have sufficient buffer stock for making samples which then undergoes many changes as per the requirement of customer prior approval of design reflecting under WIP/raw material leading to high inventory levels. The company purchases raw materials from domestic market also and keeps an inventory of around 124 days. The high working capital requirements were largely met through bank borrowings which resulted in average utilization of around 70% of its sanctioned working capital limits ending Nov 21.

Liquidity: Adequate

The company has adequate liquidity marked by gross cash accruals of 15.14 crore against repayment obligations of Rs 6.26 crore in FY22 with sufficient cash and bank balance of Rs 5.59 crore as on Dec 31, 2021. On account of, working capital intensive nature of operations, the company has high utilization of working capital borrowings as against the sanctioned limits and stretched operating cycle of 159 days as on March 31,2021 (PY: 122 days). The average utilization stood approx. 70% during the past 12 months ending November,2021.

AAPLs current ratio improved and stood at 1.16x as on March 31, 2021 (PY: 1.08x). The company has incurred capex of Rs 16 crore spread over FY20-22. The same is funded in the Debt-Equity ratio of 68:32. No major capex is envisaged in near term. The capex planned is only related to routine maintenance capex and for improvement in production processes. It is expected that internal accruals would be sufficient to meet incremental working capital requirements and repayment obligations.

About CARE Ratings Limited:

Established in 1993, CARE Ratings Ltd. is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India (SEBI), it has also been acknowledged as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). With an equitable position in the Indian capital market, CARE Ratings Limited provides a wide array of credit rating services that help corporates to raise capital and enable investors to make informed decisions backed by knowledge and assessment provided by the company.

With an established track record of rating companies over almost three decades, we follow a robust and transparent rating process that leverages our domain and analytical expertise backed by the methodologies congruent with the international best practices. CARE Ratings Limited has had a pivotal role to play in developing bank debt and capital market instruments including CPs, corporate bonds and debentures, and structured credit.

Disclaimer

The ratings issued by CARE Ratings Limited are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings Limited has based its ratings/outlooks based on information obtained from reliable and credible sources. CARE Ratings Limited does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings Limited have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings Limited or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE Ratings Limited is, inter-alia, based on the capital deployed by the partners/proprietor and the current financial strength of the firm. The rating/outlook may undergo a change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE Ratings Limited is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE Ratings Limited's rating.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
