Details of instruments/facilities in Annexure-1

### Detailed Rationale & Key Rating Drivers of Amritsar Ghoman Highways Private Limited (AGHPL)

The rating assigned to the long-term bank facilities of Amritsar Ghoman Highways Private Limited (AGHPL) factors in the inherent strengths of hybrid annuity model (HAM) based road projects such as (i) low project-funding risk with inflation-indexed annuity to be received along with Low credit risk of the Counter party –National Highways Authority of India(NHAI; rated CARE AAA; Stable) (ii) lower post implementation risk on account of inflation-indexed annuity to be received for operations and maintenance (O&M) of the road and (iii) receipt of MCLR linked interest annuity. However, unlike the clauses contained in the CA, delay in de-scoping of the unavailable project land has been witnessed in some of the ongoing HAM road projects.

The rating also favorably factors in the wide experience of the sponsor- Chetak Enterprises Limited (CEL: rated CARE A; Stable/CARE A1) in the infrastructure space, moderate leverage of the project, various undertakings extended by the sponsor to fund the cost overrun during construction period and funding of incremental operations and maintenance (O&M) expenses and major maintenance (MM) expenses over and above the base case plan. The rating also factors in the envisaged liquidity support mechanisms such as the envisaged creation of debt service reserve account (DSRA) and Major Maintenance Reserve Account (MMRA) post commencement of operations. The rating strengths are however constrained by project execution risk, the inherent Operations & Maintenance (O&M) risk and interest rate risk due to linkage of interest annuities to MCLR.

### Rating Sensitivities

#### Positive Factors - Factors that could lead to positive rating action/upgrade:

- Successful receipt of final COD with timely receipt of full annuities
- Completion of project within envisaged timelines.

#### Negative Factors- Factors that could lead to negative rating action/downgrade:

- Deterioration in the credit risk profile of the counterparty(NHAI)
- Delay in receipt of final COD leading to reduced annuities than envisaged thereby adversely impacting the debt coverage indicators.
- Any adverse movement in O&M expenses or interest rate affecting the debt coverage indicators.
- Non-adherence to sanctioned debt terms.

### Detailed description of the key rating drivers

#### Key Rating Strengths

#### Favourable clauses in model CA of HAM projects for addressing execution challenges

The model CA of HAM projects includes favourable clauses such as achievement of at least 80% RoW before declaring appointed date for the project and provision for granting deemed completion of the project in case 100% of the work is completed on the RoW which becomes available to it within 180 days of the appointed date. These clauses were expected to address some of the issues which were plaguing the sector primarily on account of delay in land acquisition during construction phase. However, pending de-scoping of unavailable land despite significant time having lapsed from the appointed date has been affecting the project progress in some of the projects awarded under this model which has emerged as a cause of concern from the credit perspective for the industry. Hence, timely de-scoping of unavailable project land within 180 days from appointed date as per terms of CA will be a key monitorable for HAM-based road projects. However, during July 2020; NHAI released an SOP pertaining to the approach towards de-scoping whereby, immediately after the expiry of the period of appointed date plus 20% of the construction period, the pending RoW will be removed from the scope of work and the BPC shall be suitably reviewed.

#### Low funding risk and permitted price escalation

HAM model entails lower sponsor contribution during construction period considering 40% construction support from the Authority, and availability of 10% mobilization advances on bid project cost (BPC) at MCLR-linked interest rate. Furthermore, the BPC and O&M costs shall be inflation-indexed (through a Price Index Multiple [PIM]) which is the weighted average of Wholesale Price Index (WPI) and Consumer Price Index (CPI) in the ratio of 70:30, which protects the developers against price escalation to an extent.

<sup>1</sup>Complete definition of the ratings assigned are available at [www.careedge.in](http://www.careedge.in) and other CARE Ratings Ltd.'s publications

### **Assured cash flow due to annuity nature of the revenue stream linked to inflation indexed O&M annuity and MCLR linked interest annuity**

Besides the construction milestone payments during construction, during operational phase, cash flow is assured in the form of annuity payments from NHAI (rated 'CARE AAA; Stable') on semi-annual basis covering 60% of the project completion cost along with interest at MCLR of top five scheduled commercial bank + 1.25% on reducing balance and inflation indexed O&M annuity.

### **Low counterparty credit risk**

Incorporated by the Government of India (GoI) under an Act of the Parliament as a statutory body, NHAI functions as the nodal agency for development, maintenance and management of the national highways in the country. The outlook on NHAI reflects the outlook on the sovereign, whose direct and indirect support continues to be the key rating driver. Wide experience of sponsor in road construction.

### **Wide Experience of sponsor in road construction**

CEL has experience of successfully operating and maintaining build-operate and transfer (BOT) road projects for more than two decades. CEL has demonstrated its project execution capabilities in these projects with commencement of toll revenue in line with the original schedule.

### **Propose creation of DSRA and MMRA**

As per the sanction terms of the debt, AGHPL shall be required to create and maintain DSRA till the tenor of the debt to meet any shortfall in the debt service requirements. DSRA shall be created in funded form, equivalent to the ensuing six months principal and six months interest obligations from receipt of first 2 annuities. As per the sanction terms of the debt, Major Maintenance Reserve Account will also be created and maintained by AGHPL throughout the tenure of the debt. Also, comfort can be derived from the interest and O&M expenditure for the first six months post COD being part of the project cost.

### **Interest annuities linked to MCLR, mitigating the interest rate risk to a large extent**

Both the interest annuities and the interest on debt are linked to MCLR. Interest annuities are linked to 1-year average MCLR of top five scheduled commercial banks and interest on term loan is also linked to the MCLR which mitigates the interest rate risk to a large extent.

### **Key Rating Weaknesses**

**Inherent project execution risk:** AGHPL is exposed to inherent construction risk attached to Design-Build-Operate Transfer (DBOT) road projects. The project stretch is to be constructed with flexible pavement and the scope of work includes construction of toll plazas, roadside furniture, pedestrian facilities, truck lay-bys, bus-bays and bus shelters etc. Appointed date was declared on June 22, 2022. Financial closure has also been achieved and the project shall be funded through term debt of Rs.315 crore, equity of Rs.92.72 crore and NHAI grant of Rs.294 crore. 50% equity is to be funded upfront before disbursement of term debt. Demonstrated execution capability of the sponsor mitigates the risk to an extent.

**Inherent O&M risk:** Although inflation indexed O&M annuity partly mitigates O&M risk, developers would still face the risk of sharp increase in the O&M cost due to more than envisaged wear and tear and aggressive bidding in O&M cost. The O&M and major maintenance cost assumed by the company is relatively lower than other similar projects rated by CARE.

However, the AGHPL shall enter into fixed price O&M contract before achievement of COD mitigating O&M risk to an extent. Also, as per the sanction terms AGHPL is required to create maintain major maintenance reserve account (MMRA) out of the project cash flow to conduct major maintenance of the stretch. Also, CEL has extended undertaking to infuse funds in case O&M expenses and MM exceed the base case plan submitted to lenders.

### **Liquidity Analysis: Adequate**

AGHPL's liquidity is underpinned from the fact that it has access to timely need-based support from CEL. Furthermore, CEL has extended undertaking to fund any cost overrun, funding of shortfall in the debt servicing of AGHPL in case of delayed payment or non-payment or shortfall in annuity payments for any reason whatsoever. Also, as per the terms of sanction of the project debt, AGHPL shall create and maintain DSRA equivalent to the ensuing six months principal and six months interest obligations after meeting the debt service obligations during the operational phase which provides cushion for the debt servicing. Also, provision of creation of MMRA as per the sanction terms also provides liquidity cushion.

### **Analytical approach:**

Standalone while factoring execution track record of EPC contractor along with sponsor support undertaking to meet any shortfall in debt servicing during construction as well as operational phase. Further, CEL has a sponsor has also extended partial tenor corporate guarantee for the debt availed by AGHPL till the receipt of the first annuity. Post the fall of corporate guarantee on the receipt of first annuity, debt coverage indicators are expected to remain moderate in operational phase due to relatively high leverage and inferior bidding in O&M thus limiting the credit enhancement available from guarantee of CEL.

**About us:**

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

**Disclaimer:**

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
