Short Term Bank Facilities	3.00	CARE A4 (A Four)	Reaffirmed
Total Facilities	10.00 (Rs. Ten Crore Only)		

Details of instruments/facilities in Annexure-1

Detailed Rationale & Key Rating Drivers

The reaffirmation in ratings assigned to the bank facilities of Shahi Shipping Limited (SSL) continue to be tempered by small scale of operations, net losses incurred during FY21 (refers to the period from April 01 to March 31), leveraged capital structure and weak debt coverage indicators, working capital intensive nature of operations, presence in highly fragmented & competitive nature of shipping industry and poor liquidity position.

The ratings, however, derive strength from long track record of operations with experienced and qualified directors and established relationship with reputed customers.

Rating Sensitivities

Positive Factors

- Increase in the scale of operations with a total operating income exceeding Rs. 15.00 crore on a sustained basis
- Improvement in profit margins with PBILD margin at 5% and the company reporting net profit on a sustained basis
- Improvement in the capital structure with the overall gearing reaching below 1.5 times on a sustained basis
- Improvement in the collection period below 40 days on a sustained basis
- Improvement in the debt coverage indicators with interest coverage ratio being above unity or exceeding 3 times with total debt to GCA reaching below 5 times on a sustained basis

Negative Factors

- Deterioration in overall operating performance of the company thereby resulting into impacting financial performance of the company
- Deterioration in the utilization of the working capital limits exceeding 95% on a sustained basis.

Detailed description of the key rating drivers

Key rating Weakness

Small scale of operations albeit growth in TOI: The scale of operations of SSL though improved by 17.11% with total operating income (TOI) stood at Rs. 9.79 crore in FY21 vis-à-vis Rs. 8.36 crore in FY20; yet it remained on the lower side. The TOI has increased owing to gradual revival of the market conditions during the year wherein the company has executed higher contracts from its customers.

Further, In Q1FY22, the company has achieved sales of Rs. 1.92 crore. Moreover, the net losses incurred by the company has drained the tangible net-worth base which deteriorated and stood small. Nevertheless, the scale of operations continues to remain small, which limits the financial flexibility of the company to an extent to meet any exigency.

Net losses incurred during FY21: The company reported net losses in FY21 owing to higher interest and depreciation cost. Further, the operating profit also stood low at Rs. 0.11 crore vis-à-vis operating loss of Rs. 1.56 crore in FY20. The company incurred high amount of operating cost viz. repairs & maintenance, barge operating, port related expenses during the year coupled with high amount of provision for bad debt made during the year. Further, it incurred net loss of Rs. 1.13 crore in FY21 vis-à-vis Rs. 3.31 crore in FY20. The profit margin of SSL primarily depends on the variety of contracts received along with tender driven nature of operations. Nevertheless, despite reporting net losses, the losses has reduced in FY21 vis-à-vis FY20.

Further, in Q1FY22, the company has reported operating profit of Rs. 0.16 crore led by lower fixed cost and lower employee cost. Net losses have reduced in Q1FY22 and stood at Rs. 0.18 crore.

¹Complete definitions of the ratings assigned are available at www.careratings.com and in other CARE publications.

Leveraged capital structure and weak debt coverage indicators: Led by the increase in the debt level on the back of higher utilization of working capital bank borrowings and availment of unsecured loans from related parties, the capital structure of SSL as reflected by overall gearing ratio deteriorated and stood leveraged at 3.25 times as on March 31, 2021 (vis-à-vis 2.36 times as on March 31, 2020). The same can be attributed to the company making net losses in FY21 leading to depletion in the tangible net worth base. Further, the debt coverage indicators reached to adverse levels owing to net losses made by the company in FY21 as well as in FY20. As mentioned above, due to the increase in the debt level and negative cash accruals, the total debt to GCA stood negative in FY21 and FY20. However, on the back of profits reported by the company at the operating level and lower interest expense, the interest coverage ratio improved and stood at 0.16x in FY21 vis-à-vis negative interest coverage ratio in FY20. Nevertheless, despite the improvement, ICR stood below unity. However, during Q1FY22, the interest coverage ratio improved and stood above unity at 1.14 times owing to lower interest expense and improved operating profitability.

Working capital intensive nature of operations: The operations of SSL remained working capital intensive in nature with considerable amount of funds are blocked in debtors. The collection period has remained moderate, however improved from 112 days in FY20 to 57 days in FY21 owing to faster recovery of payments from debtors coupled with provision for doubtful debts of Rs. 1.72 crore made during the year. Further, creditor's period also remained stretched and further deteriorated to 141 days in FY21 vis-à-vis 127 days in FY20. Owing to above factors operating cycle has turned negative during FY21 and FY20. Hence, the average utilization of working capital limits was utilized at ~100% during past twelve months ended August 2021.

Presence in highly fragmented and competitive nature of shipping industry: SSL operates in the shipping industry which is fragmented with large number of small players resulting into intense competition. Further, the bargaining power of small players is limited with large customers affecting the barges rates. The company's profitability and ability to repay debt is affected by the barges rates at which it can redeploy its vessels. Unlike shipping companies, which derive their freight rates from various Baltic indexes, offshore support vessel companies provide their vessels after the tendering and bidding process. The company is exposed to seasonality in the shipping industry, since the offshore personnel transportation is muted during the monsoons.

Key Rating Strengths

Long track record of operations with experienced and qualified directors: SSL has long track record of about two decades of operations in shipping industry. The overall operations are looked after by director Mr. Sarvesh Kumar Shahi. Mr. Sarvesh Kumar Shahi has vast experience of more than three decades in this industry through his association with company and also worked for other shipping companies. Moreover, other directors of the company are also qualified and experienced.

Established relationship with reputed customers: Over the years of operations, SSL has established long-term relationships with reputed customers. However, the customer profile remained concentrated with top five customers comprising 81.52% of the net sales in FY21. The customer concentration risk gets mitigated to an extent due to healthy relationship with these clients over the years ensuring repeated orders coupled with strong credit profile and healthy credit worthiness of these customers.

Poor liquidity position: The liquidity position remained poor characterized by lower accruals to repayment obligations and low free cash balance of Rs. 0.22 crore as on March 31, 2021 and Rs. 0.01 crore as on August 31, 2021. The average utilization of its working capital limits during past 12 months ended August 2021 stood at ~100%. Further, the current ratio stood weak at 0.19x as on March 31, 2021 vis-à-vis 0.20x as on March 31, 2020. The cash flow from operating activities was positive at Rs. 0.14 crore vis-à-vis positive cash flow from operating activities of Rs. 1.28 crore as on March 31, 2020. However the management has articulated that in case of any shortfall in cash accruals to service the debt, the company will be arranging funds through unsecured loans from group company.

Analytical approach: Standalone.

About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating. Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
