

## Dhunseri Tea & Industries Limited

September 30, 2022

### Rating

Facilities/Instruments	Amount (₹ crore)	Rating <sup>1</sup>	Rating Action
Long Term Bank Facilities	101.88 (Reduced from 105.50)	CARE A+; Stable (Single A Plus; Outlook: Stable)	Reaffirmed
<b>Total Bank Facilities</b>	<b>101.88</b> <b>(₹ One hundred one crore and eighty-eight lakh only)</b>		

Details of instruments/facilities in Annexure-1.

### Detailed rationale and key rating drivers

The rating assigned to the bank facilities of Dhunseri Tea & Industries Limited (DTIL) continues to draw strength from the vast experience of its promoters and established track record of the company in the tea industry with satisfactory operational parameters for both its domestic and overseas businesses. The rating also continues to draw strength from the comfortable capital structure and debt coverage indicators of the company along with significant free liquidity in the form of quoted investments, the gains on which have also been supporting its net profit.

The rating takes note of the decline in total operating income (TOI) and moderation in the operating profitability (PBILDT) margin of DTIL in FY22 (refers to the period April 1 to March 31). The decline in TOI was majorly on account of moderation in the realisation of tea owing to surplus supply of tea in the domestic market which also impacted profitability amidst increase in wage rate and power cost during the year. In FY23, the company has reduced its consumption of bought leaf to produce tea and increased its focus on production of better quality of tea in its gardens which is expected to drive improvement in its operating profitability going forward, though the sales volumes are expected to reduce. The increase in realisations and stable demand scenario are expected to aid the improvement in its operating performance despite further increase in wage rates in Assam announced from August 2022.

The rating further continues to remain constrained by DTIL's moderate scale of operation, labour intensive nature of the tea industry with increasing wage cost and susceptibility of tea business to agro-climatic risks.

### Rating sensitivities

#### Positive Factors - Factors that could lead to positive rating action/upgrade:

- Substantial improvement in its scale of operations on a sustained basis
- Improvement in its PBILDT margins beyond 25% on sustained basis

#### Negative Factors - Factors that could lead to negative rating action/downgrade:

- Significant deterioration in its TOI below Rs.300 crore on a sustained basis.
- PBILDT margin remaining below 8% on a sustained basis.
- Any un-envisaged incremental debt-funded capital expenditure leading to deterioration in its capital structure and/or significant dilution in its liquidity profile.

### Detailed description of the key rating drivers

#### Key rating strengths

**Experience of the promoters and established track record of the company in the tea industry:** DTIL is a part of the Dhunseri group which has been carrying on the tea business for over five decades. Despite the tea industry passing through several bad phases over the last few decades, the promoters have demonstrated a successful track record of managing their tea business. Mr C. K. Dhanuka, Chairman and MD of the company, is one of the reputed industrialists of Kolkata with long experience in the tea industry. The promoter group is ably supported by an experienced management team.

DTIL currently has eight tea estates and ten tea factories in Assam, producing quality tea and a blending and packaging unit in Rajasthan. The company sells tea via auctions, private sales through intermediaries and packaged tea.

During FY22, DTIL sold one loss-incurring tea garden in Lower Assam and has simultaneously also purchased one tea estate in Upper Assam, Balijan North Tea Estate.

<sup>1</sup>Complete definition of the ratings assigned are available at [www.careedge.in](http://www.careedge.in) and other CARE Ratings Ltd.'s publications

Further, DTIL owns and operates two tea estates in Malawi, South Africa, having a cumulative tea production capacity of 10 million kg p.a. It also has 0.6 million kg p.a. capacity for Macadamia nuts in Malawi.

**Stable operational parameters of the tea division:** DTIL has been efficiently carrying out its operations across its tea gardens (8 in number) in Assam where the quality of black tea is superior as compared to the rest of India. The domestic average tea yield remained relatively stable in FY22 with marginal reduction reported as compared with FY21 attributable to unfavourable weather conditions during the year along with the impact of purchase/ sale of tea gardens. Further, capacity utilization of tea factories remained healthy being maintained above 100% in FY22 with marginal reduction in tea production to 11.34 million kg vis-à-vis 11.44 million kg in FY21. The average recovery rate (ranging from 22.6% to 22.9% over FY20-FY22) for the company have been in line with the industry average of about 22%. The production of tea in volume terms is expected to witness moderation during FY23 due to change in the strategy of the management to manufacture quality tea and lower usage of bought tea leaves.

The production of tea in its overseas subsidiary witnessed a marginal improvement to 8.89 mn kg in CY21 (P.Y.: 8.43 mn kg). The production of macadamia nuts, however, improved to 0.38 mn kg in CY21 from 0.29 mn kg in CY20 due to favourable weather conditions.

**Comfortable capital structure:** DTIL has a healthy networth base and relatively low debt level. Overall gearing stood comfortable at 0.15x as on March 31, 2022 (0.11x as on March 31, 2021). The marginal deterioration in gearing ratio was due to increase in the working capital borrowing. The working capital borrowings constitute around 62% of the total debt.

Interest coverage ratio, though witnessed deterioration in FY22 due to the decline in operating profitability, continued to remain comfortable at 3.57x (FY21: 6.66x). Total debt/PBILDT moderated to 4.33x (FY21: 1.50x) in FY22. However, with no major increase in debt planned and profitability expected to improve, the coverage ratios are expected to improve going forward.

The net debt/PBILDT continued to remain negative on back of maintenance of liquid investments in listed equity shares as compared to the debt availed by the company.

#### **Liquidity: Strong**

Liquidity of the company remains strong marked by sufficient cash accruals expected vis-à-vis the debt repayment obligations along with availability of high cash and cash equivalents of around Rs.169 crore (including liquid investment in the form of investment in equity shares of Rs.163 crore) as on March 31, 2022. Its unutilized working capital limits are sufficient to meet its incremental working capital needs over next one year. Further, the operating cycle remained satisfactory at 92 days (P.Y.: 93 days) in FY22. The company does not have significant capital expenditure plans in the medium term and the routine capex requirement can be met out of its internal accruals.

#### **Key rating weaknesses**

**Moderation in the TOI and operating profitability during FY22:** DTIL reported a decline in its TOI by 7% y-o-y due to moderation in the tea realisation. The company reported a y-o-y growth in sales volume by around 6% while the realisation reduced by more than 18%. The reduction in tea realisation during FY22 was on back of surplus production creating excess supply of tea vis-à-vis the demand as almost of the tea gardens were back to operations post the economic recovery after the impact of COVID-19. The decline in tea realization and increase in power cost and wage rates for tea estate workers led to decline in the operating profitability of DTIL in FY22.

The company reported substantial net loss during FY22 owing to non-cash exceptional loss booked with regards to loss on sale of tea garden (Rs.15.14 crore) and impairment loss of Rs.123.91 crore on other existing tea assets (revalued based on current realizable value vis-à-vis carrying cost).

However, the tea realisations have improved in the current financial year (FY23) with the improvement in demand and increase in production of better quality of tea. Production of better quality of tea in its gardens is expected to drive improvement in operating profitability going forward, despite further increase in wage rates in Assam announced from August 2022.

**Labour intensive nature of tea industry:** The inherent nature of the domestic tea industry makes it highly labour intensive, with wage cost entailing around 45-50% of total cost of sales. Therefore, steep upward revision in the wages has an adverse impact on the PBILDT margin of bulk tea players. However, labour cost in its African subsidiaries is relatively low, hence its overall impact on the PBILDT margins at the consolidated level gets somewhat moderated.

**Inherent agro-climatic risks:** DTIL's profitability is highly susceptible to vagaries of nature as all its domestic tea gardens are concentrated in Assam. Although Assam is the largest tea producing state in India, it has witnessed erratic weather conditions in the past years. DTIL's international tea gardens, located in Africa, are also susceptible to vagaries of nature.

### Industry Outlook

Tea auction prices witnessed an improvement in June and July 2022 as against the same during the previous year backed by healthy demand in the domestic as well as the overseas market. The wage rate revisions are expected to continue to create pressure on the margins of tea players but the same is expected to be compensated by expected increase in the average realisation during the year.

### Analytical approach: Consolidated

The subsidiaries are in similar line of business with common management and financial support extended by DTIL in the form of Standby Letter of Credit to one of its subsidiaries. List of entities consolidated is shown as **Annexure 6**.

### About the company

DTIL is engaged in growing and cultivation of tea across 8 tea estates in Assam (4 in upper Assam and 4 in lower Assam) having a cumulative production capacity of 11 million kg p.a. This apart, the company has a 4 million kg p.a. blending and packing unit at Jaipur, Rajasthan. DTIL also has 2 tea estates named 'Makandi' and 'Kawalazi' in Malawi, South Africa [whereby DTIL had acquired (100% stake) in FY13 through its Singapore based wholly owned subsidiary 'Dhunseri Petrochem and Tea Pte Ltd]. The cumulative production capacity of these two estates is 10 million kg p.a. Besides tea, the Malawi estates also produce macadamia (installed capacity of 0.60 million kg p.a).

#### About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

#### Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
