Proposed Principal Protected Market Linked Debenture (MLD) Issue	75.00	CARE PP-MLD A+; Stable (Principal Protected-Market Linked Debentures Single A Plus; Outlook: Stable)	Assigned
Total	75.00 [Rs. Seventy-five crore only]		

Details of instrument in Annexure-1

Detailed Rationale & Key Rating Drivers

The ratings assigned to the proposed principal protected market linked debenture (MLD) issue of MAS Financial Services Limited (MFSL) derives strength from long-standing track record and experience of the promoters of MFSL in the lending business, experienced senior management team, diversified loan portfolio, moderate geographical diversification, comfortable asset quality on the back of adequate appraisal systems, strong and diversified resource base with multiple banks and financial institutions, comfortable capital adequacy, strong financial risk profile marked by high net interest margin (NIM) and return on total assets (ROTA) and comfortable liquidity profile with increase in the cash balance as liquidity back-up for the next one year of debt servicing.

The ratings, however, continue to remain constrained on account of its concentrated borrower profile and exposure to micro enterprises and small and medium enterprises (SME) sectors which are high-yield generating and low-price sensitive segments and at the same time are relatively riskier in nature. Moreover, CARE continues to assess the impact of the on-going COVID-19 pandemic on the company and the sector's performance at large.

Rating Sensitivities

Positive Factors - Factors that could lead to positive rating action / upgrade

- Improvement in asset quality with decline in gross non-performing assets (NPA) levels below 1% on a sustainable basis
- Significant increase in the scale of operations with corresponding increase profitability in terms of NIM and ROTA

Negative Factors - Factors that could lead to negative rating action / downgrade

- Deterioration in asset quality with increase in net NPA / tangible net-worth levels above 10% on a sustainable basis
- Decline in capital adequacy ratio (CAR) below 20% on a sustainable basis
- Significant decline in profitability in terms of NIM and ROTA

Detailed description of the key rating drivers

Key Rating Strengths

Long-standing track record and experience of the promoters in the lending business and experienced senior management team

The promoters of MFSL have established track record of over two decades in the lending business. MFSL initially started its lending activities in the state of Gujarat and has gradually ventured and established its footprint in six other states and has expanded its operations across 105 branches at a standalone level and 69 branches of its housing finance company (HFC) subsidiary and is present in more than 3,450 locations, including through its wholesale portfolio, and is catering to the funding requirement of around seven lakh live customers. Furthermore, the senior management team of MFSL consists of experienced professionals who have been in the lending business and have been associated with MFSL since its inception. These personnel continue to head the main functions at MFSL.

Diversified loan portfolio

The loan portfolio of MFSL consists of micro enterprises loans, SME loans, two-wheeler loans, commercial vehicle loans and housing finance loans. MFSL was initially engaged in lending of two-wheeler and micro enterprises loans and later on forayed into commercial vehicle loan, SME loan and housing loan segments. Even in the aforesaid loan categories, significant amount of the loan portfolio is built up through NBFCs and Non-Banking Finance Companies – Micro Finance Institutions (NBFC-MFIs). Moreover, about 40% of the consolidated total loan portfolio of MFSL is directly assigned to banks and financial institutions. Due to product diversification, MFSL has been able to grow its consolidated total loan portfolio at a compound annual growth rate (CAGR) of around 23% during three years ended FY20 (refers to the period April 1 to March 31).

¹Complete definitions of the ratings assigned are available at www.careratings.com and in other CARE publications.

Moderate geographical diversification

The lending activities of MFSL are directly carried out in seven states. MFSL initially started its lending activities in the state of Gujarat and has gradually ventured and established its footprint in six other states of Rajasthan, Maharashtra, Madhya Pradesh, Karnataka, Tamil Nadu and Delhi. However, as significant amount of MFSL's lending activities are carried out through NBFCs and NBFC-MFIs, it has resulted in highly diversified exposure of MFSL. Gujarat accounts for around 32% of the consolidated total loan portfolio of MFSL as on March 31, 2020, driven by operational familiarity of the promoters with the Gujarat market, whereas other states and union territories account for balance 68%.

Comfortable asset quality on the back of adequate appraisal systems

On a consolidated basis, the gross and net NPAs of MFSL stood at 1.37% and 1.06%, respectively, as on March 31, 2020, and 1.25% and 0.95%, respectively, as on December 31, 2020 as compared with 1.34% and 1.10%, respectively, as on March 31, 2019. The NPA recognition policy was changed by the company in FY18. Till FY17, the NPA recognition policy was 120+DPD (days past due). However, from FY18 onwards, the same has been revised to 90+DPD. The NPA levels have remained comfortable even after migration to a more stringent NPA recognition policy, growth in loan portfolio, impact of demonetization, implementation of Real Estate (Regulation and Development) Act, 2016 (RERA) and Goods and Service Tax (GST), liquidity crunch faced by the NBFCs during FY19 and COVID-19 pandemic. This was possible mainly on account of adequate credit appraisal processes and systems adopted by the company. As per the management of the company, the credit appraisal processes of MFSL are reviewed and revised at regular interval based on its experience in the market. The credit appraisal process at MFSL is centralised. Sanctions are accorded by the centralised credit team, whereas sourcing and collection functions are carried out at branch level. Multiple checks are carried out at centralised unit prior to disbursement. The asset quality is also comfortable due to very less delinquencies in the loans to NBFCs and NBFC-MFIs, majority of which have comfortable financial risk profile. Also, these loans are backed by security deposits in the form of cash collateral and corporate / personal guarantees taken by MFSL from the NBFCs and NBFC-MFIs. Moreover, the delinquencies are lower in case of micro-enterprises and SME loans which collectively account for around 86% of MFSL's consolidated total loan portfolio as on December 31, 2020.

Comfortable capital adequacy ratio and strong and diversified resource base with multiple banks and financial institutions

In October 2017, MFSL came out with an Initial Public Offer (IPO) and raised capital of Rs.233 crore. MFSL had also raised Rs.100 crore in March 2017 and Rs.35 crore in April 2017 in the pre-IPO round of funding. The CAR of MFSL stood at 31.97% as on March 31, 2020 and 32.61% as on December 31, 2020, as compared with 29.13% as on March 31, 2019. Out of total CAR, Tier-I CAR stood at 30.35%, 29.88% and 27.40% as on December 31, 2020, March 31, 2020 and March 31, 2019, respectively. Also, even after the IPO, promoter holding in MFSL has been retained at 73.60% as on December 31, 2020. Also, MFSL has healthy relations with 31 banks, NBFCs and other financial institutions for meeting its borrowing requirements based on which MFSL is able to raise resources in a timely manner and at competitive rate of interest, thereby providing significant financial flexibility to MFSL. Most of the banks and financial institutions are also the ones to whom MFSL sells its loan portfolio under the direct assignment route. Existing capitalization level and strong resource base is envisaged to provide impetus to MFSL for growth in its loan portfolio over the medium term.

Strong financial risk profile marked by high Net Interest Margin (NIM) and Return on Total Assets (ROTA)

With growth in its loan portfolio, the profitability ratios of MFSL have marginally moderated on a consolidated basis. The NIM and ROTA of MFSL during FY20 stood at 7.18% and 4.17%, respectively, as compared with 8.16% and 4.49%, respectively during FY19. The profitability of MFSL declined in FY20 mainly due to increase in its exposure to other NBFCs and NBFC-MFIs which are lower yield generating segments as compared to other loan products and increase in provisions in FY20 pursuant to COVID-19 pandemic. However, this was partly off-set by decline in its operating expenses in FY20 as a percentage of average total assets on the back of increase in its exposure to other NBFCs and NBFC-MFIs.

Key Rating Weaknesses

Concentrated borrower profile

A significant portion of MFSL's exposure is to its top-10 borrowers. As on March 31, 2020, the top-10 exposures of MFSL accounted for more than 71% of its consolidated tangible net-worth as on even date indicating relatively high borrower concentration risk. This is because of significant exposure of MFSL to other NBFCs and NBFC-MFIs. Though the present credit profile of the top exposures is moderate but any deterioration in the credit quality of these exposures may lead to sharp increase in NPA levels of MFSL. Accordingly, credit quality of its large exposures would remain a key credit monitorable.

Exposure to relatively riskier micro enterprises and SME sectors

The portfolio of MFSL comprises retail products like micro enterprises loans, SME loans, two-wheeler loans and commercial vehicle loans, which are high yield generating and low-price sensitive segments and at the same time are relatively riskier in nature. Also, about 57% of the consolidated exposure of MFSL in these segments is through NBFCs and

NBFC-MFIs. However, the same is partly mitigated by 5%-15% cash collateral and corporate / personal guarantees taken by MFSL from the NBFCs and NBFC-MFIs.

Liquidity: Strong

The liquidity profile of MFSL has remained comfortable on the back of strong and diversified resource base and good amount of unutilized bank limits. It has comfortable asset liability maturity (ALM) with no cumulative mismatches on a standalone basis. MFSL, on a standalone basis, has sanctioned fund based working capital limits of Rs.1,795 crore, out of which average utilization during trailing 11 months ended February 2021 remained comfortable at around 78%. Moreover, as on December 31, 2020, MFSL had undrawn term loan limit of around Rs.446 crore and undrawn direct assignment limit of around Rs.800 crore on a standalone basis. Furthermore, it had free cash and bank balance of more than Rs.1,000 crore as on December 31, 2020, on a standalone basis which can take care of upcoming one year's standalone debt servicing obligations (principal + interest) of MFSL. During last year, amidst the challenging fund-raising environment, especially for NBFCs and HFCs, it has framed a policy of keeping cash in hand equivalent to next three months of debt servicing obligations. However, owing to the crisis due to lockdown pursuant to COVID-19 pandemic, it has increased its liquidity cushion in order to take care of upcoming one year's debt servicing obligations (principal + interest). Furthermore, due to the unutilized fund-based working capital limits and direct assignment limits, the asset liability maturity profile of MFSL is expected to remain comfortable. CARE also takes cognizance of the fact that MFSL has not availed the moratorium from the lenders as a COVID-19 relief measure [as permitted by the Reserve Bank of India (RBI)].

Analytical approach: Consolidated; MFSL and 59.67% stake of its HFC subsidiary, viz., MAS Rural Housing and Mortgage Finance Limited (MRHMFL).

About the Company

MFSL was incorporated in the year 1995 by Mr. Kamlesh Gandhi and Mr. Mukesh Gandhi. The company was registered as an NBFC in 1998 with RBI. It was initially engaged in lending of two-wheeler and micro enterprises loans and later on forayed in commercial vehicle loan and SME loan segments. In the year 2008, MFSL floated a subsidiary, MRHMFL; rated 'CARE A; Stable', a non-deposit taking, National Housing Bank (NHB) registered HFC, which provides housing loans to the low-income group segment in rural and semi-urban areas.

The lending activities of MFSL are carried out by it directly through its own network of 105 branches on a standalone level and 69 branches of its HFC subsidiary in seven states (viz. Gujarat, Rajasthan, Maharashtra, Madhya Pradesh, Karnataka, Tamil Nadu and Delhi) and also through other smaller NBFCs and MFIs. As on March 31, 2020, MFSL had relationship with 135 NBFC and NBFC-MFIs and around 57% of the total assets under management (AUM) of MFSL was built through these NBFCs and NBFC-MFIs.

As on March 31, 2020, MFSL, on a consolidated basis, reported total AUM of around Rs.6,253 crore as against total AUM of around Rs.5,609 crore at the previous year end and catered to more than seven lakh live customers across more than 3,450 locations. In October 2017, MFSL came out with an IPO and raised fresh equity capital of Rs.233 crore. MFSL had also raised Rs.135 crore in a pre-IPO round of funding through issue of shares to the Motilal Oswal Group. The shares of MFSL are listed on Bombay Stock Exchange (BSE) and National Stock Exchange (NSE).

Brief Financials (MFSL - Consolidated) (Rs. Crore)	FY19 (A)	FY20 (A)

About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
