Details of instrument / facilities in Annexure-1

* Reclassified from long term / short term bank facilities

Rating is based on the Credit Enhancement which is available in the form of a ring-fenced cash flow structure as per Trust and Retention Account (TRA) agreement for priority in debt servicing of loans availed for funding the implementation and operations of Parsa East & Kenta Basan (PEKB) coal block project within Adani Enterprises Limited (AEL).

Detailed Rationale & Key Rating Drivers

The ratings assigned to the proposed principal protected market linked debenture (MLD) issue, non-convertible debenture (NCD) issue and bank facilities of AEL have been placed on 'Credit watch with developing implications' in view of the probable impact on its credit profile of its proposed acquisition of 74% stake in Mumbai International Airport Limited (MIAL).

The extent of impact on AEL's credit profile is not clear as of now. However, the company's management has also strongly articulated that the total external debt / PBILDT of AEL would not exceed 6.00x on a consolidated basis post completion of the acquisition of MIAL.

CARE would await further developments (including funding structure of the acquisition) to unfold so as to enable it to assess the exact impact of the above acquisition on the credit profile of AEL on a consolidated basis before arriving at a view on its credit rating and resolving the watch.

The ratings continue to derive strength from the vast experience of its promoters in various businesses, diversified and synergetic operations of the Adani Group, leading position of AEL in integrated resource management (IRM) business in India wherein AEL imports coal through its established coal sourcing arrangements and sells to a diversified clientele,

¹Complete definitions of the ratings assigned are available at <u>www.careratings.com</u> and in other CARE publications.

ramp-up in operations of the higher profit margin mining services business segment under AEL during FY20, improvement in the performance of solar cell and module manufacturing business during FY20 and reduction in short term borrowings upon significant reduction in exposure to power business vertical of the Adani Group in FY20. Further, the ratings take into account AEL's financial flexibility by virtue of being part of the Adani Group and the management's articulation that promoters would timely fund any shortfall in cash flows and to adhere to a specific tighter range of AEL's consolidated total external debt / PBILDT going forward. The ratings also factor in receipt of final environmental clearance for its Australian coal mining project, signing of concession agreement for three out of six airports awarded to AEL during February 2019 along with appointment of senior experienced professionals and reputed consulting firms to help augment its capabilities specific to the airports operations business.

The ratings are, however, constrained by delay in extinguishment of corporate guarantee given for bank facilities of one of the companies in the power business vertical, working capital intensive nature of operations, moderate debt coverage indicators and risks associated with commodity price movement and foreign exchange rate fluctuations. The ratings are further constrained by elevated project risk associated with its large sized capex plans mainly towards its Australian coal mining and related rail evacuation infrastructure while the project is significantly delayed with AEL having made significant investments towards it. The ratings also factor increase in capital expenditure plans over the next three years as compared to the one envisaged earlier. The ratings are also constrained by inherent project risks associated with its plans to undertake significantly large size projects simultaneously across varied lines of businesses wherein AEL doesn't necessarily have prior experience. Moreover, CARE continues to assess the impact of the ongoing COVID-19 pandemic on the company's performance.

The ratings assigned to the bank facilities availed for funding the implementation and operations of the PEKB coal block project within the 'Mining Division' of AEL continue to take cognizance of the presence of a ring-fenced cash flow structure as per TRA agreement for priority in its debt servicing providing credit enhancement from AEL's standalone credit risk profile, presence of a long term Coal Mine and Delivery Agreement (CMDA) with Rajasthan Rajya Vidyut Utpadan Nigam Limited [RRVUNL; rated CARE BBB+ (CE); Negative / CARE A3+ (CE) / CARE D (Unsupported Rating)] ensuring committed off-take at agreed upon pricing formula, improved collections from RRVUNL, increase in volumes in FY19 and FY20, superior profitability and debt coverage indicators along with presence of debt service reserve account (DSRA) equivalent to two months of interest servicing obligation as stipulated by the lenders. The ratings are, however, constrained by the below average credit risk profile of its sole off-taker (RRVUNL) and regulatory risk associated with mining operations.

Rating Sensitivities

Positive Factors

Completion of major capital expenditure plans

Negative Factors

- Total external debt / PBILDT exceeding 6.00x on a consolidated basis
- Delay in infusion of any need based requirement of funds from the promoter group hampering project returns

Detailed description of the key rating drivers

Planned acquisition of controlling stake in MIAL

Adani Airport Holdings Limited (AAHL), the holding company of the Adani Group for its airports businesses and a whollyowned subsidiary of AEL, has entered into an agreement to acquire the debt of GVK Airport Developers Limited (GVK ADL), which is a holding company through which GVK Group holds 50.50% equity stake in MIAL, which in turns holds 74% equity stake in Navi Mumbai International Airport Limited (NMIAL). According to the agreement, AAHL will acquire the debt of GVK ADL from its current lenders. The Adani Group has also announced that it will also take steps to complete the acquisition of a 23.50% equity stake from Airports Company of South Africa (ACSA) and Bid Services Division (Mauritius) Limited (Bidvest) in MIAL for which it has obtained approval from the Competition Commission of India (CCI). Upon the acquisition of the debt of GVK ADL, Adani Group will take steps to obtain necessary customary and regulatory approvals, as may be required, to acquire controlling interest in MIAL. However, further clarity in respect of the funding structure of the proposed acquisition and the extent of its impact on AEL's credit profile is not clear as of now. Hence, the ratings of AEL have been placed on 'Credit watch with developing implications'.

Key Rating Strengths

Vast experience of the promoters of AEL in various businesses and diversified and synergetic operations of the Adani Group

The promoters of AEL have more than two decades of experience in various businesses along with established relationship with global players. Over a period of time, Adani Group has evolved as a diversified conglomerate based in India having global operations with primary interests in energy and infrastructure sectors while AEL continues to operate as the flagship company of the Group and plays a leading role in incubating new businesses for the Group. Adani Group

was primarily involved in the imported coal trading business and gradually it has backward integrated its operations in domestic and overseas coal mining through AEL along with forward integration in ports, logistics, thermal and renewable power generation, transmission and distribution through various other group companies. AEL has coal mining operations in Indonesia and has also acquired a coal mine in Australia. Further, AEL has a track record of successfully incubating businesses across various sectors in the past such as ports, power transmission, thermal and renewable power generation and city gas distribution businesses.

Leading position of AEL in integrated coal management business in India wherein AEL imports coal through its established coal sourcing arrangements and sells to a diversified clientele

AEL with its established business relations with coal suppliers of Indonesia, Australia and South Africa has evolved as India's largest importer of non-coking coal catering to the requirement of both private and public sector undertaking (PSU) clients. AEL has consolidated its position in IRM business during the last decade and has developed strong business relationships with miners in Indonesia, Australia and South Africa for procurement of imported coal.

AEL has developed business relationship with diversified customers across various end-user industries including coalbased power generators, steel, textile, paper, brick and cement manufacturers etc. It enjoys major share in domestic PSU tendering business. It imports coal through all the major ports of India which saves the logistic cost and ensures timely delivery to its customers. During FY20, the IRM volumes of AEL (along with its subsidiaries) stood at around 79 MMT.

Improvement in the performance of domestic mining services business during FY19 and FY20

AEL has been acting as a coal mine developer and operator (MDO) on behalf of RRVUNL for RRVUNL's coal requirement to run its power plants. AEL had completed mine development and coal production commenced from February 2013 and coal supply volumes have gradually ramped up. The volumes increased from 2.95 million tonne MMT in FY15 to 5.50 MMT in FY16 to 7.33 MMT in FY17 before marginally declining to 7.05 MMT in FY18 due to transportation bottlenecks. Subsequently, upon resolution of the transportation bottleneck from April 2018, there has been a ramp up in the coal supply volumes to 12.13 MMT during FY19; albeit it again dipped to 11.23 MMT during FY20.

Although mining services business does not contribute much to the total operating income (TOI) of AEL, it has healthy contribution to its profitability since it is a high margin business. AEL receives 'Mining Fees' at agreed upon rate per tonne of coal supplied from the block with yearly escalation linked to Wholesale Price Index (WPI) and Consumer Price Index (CPI) along with reimbursement of related expenses, taxes, duties and logistics cost which provides good revenue visibility. Financial profile of RRVUNL (the sole counterparty for this mining services business) is below average leading to higher working capital intensity. A ring-fenced cash flow structure as per Trust and Retention Account (TRA) agreement is in place for ensuring priority in servicing of the loans availed for funding the implementation and operations of the Parsa East & Kenta Basan (PEKB) coal block project within the 'Mining Division' of AEL along with maintenance of requisite DSRA.

Interest coverage of mining services business stood at 10.44 times and 12.66 times during FY19 and FY20 respectively which is relatively superior compared to interest coverage of 1.54 times and 1.82 times for AEL at a consolidated level (from continuing businesses) during FY19 and FY20 respectively. Also, collections from RRVUNL have also improved. With the expected commencement of production from FY21 onwards at new domestic coal mines allocated to AEL under MDO route, the performance of AEL's domestic mining services division is expected to improve further going forward.

Improvement in the performance of solar cell and module manufacturing business during FY20

AEL through Mundra Solar PV Limited (MSPVL) had commissioned India's largest solar cell and module manufacturing facility at Mundra with an installed capacity of 1,200 MW of solar cell and solar modules each at a total project cost of around Rs.2,000 crore.

MSPVL started trial runs for the module manufacturing in November 2016 and commissioned the entire cell and module capacity in June 2017. FY18 was the first year of operations for MSPVL during which it supplied 574 MW of solar cells and modules. During FY18, around 80% of the solar cells and modules were supplied by MSPVL to Adani Green Energy Limited (AGEL) for meeting its captive requirements.

During FY19, owing to high dumping of solar cells and modules, there was sharp fall in their prices leading to disruption in operations of MSPVL along with inventory losses leading to MSPVL incurring cash losses of around Rs.245 crore. Consequently, debt servicing of MSPVL was funded through fund infusion by the promoters in MSPVL. On the back of various initiatives announced by the Government of India (GoI) for promoting domestic solar cell and module manufacturing industry like imposition of safeguard duty on import of solar cells and modules from China and Malaysia, roll-out of the Central Public Sector Undertaking (CPSU) scheme for purchase of additional 12 GW solar modules by the GoI undertakings to promote domestic content requirement (DCR) in solar cell and module manufacturing industry and introduction of the Pradhan Mantri Kisan Urja Suraksha evem Utthan Mahabhiyan (PM KUSUM) Scheme for farmers for installation of solar pumps and grid connected solar and other renewable power plants in the country, MSPVL's performance has registered significant improvement in FY20 with volumes of 990 MW in FY20 as compared to 637 MW in FY19. Also, MSPVL has entered into engineering, procurement and construction (EPC) business of solar module installation. The EPC and solar pump installation businesses are relatively high margin businesses. MSPVL is already

receiving orders under EPC and solar pump installation businesses since Q3FY19. With the above-mentioned developments, the performance of MSPVL has witnessed significant turnaround in terms of PBILDT margins of 12.70% in FY20 as compared to 2.72% in FY19. Sustained improvement in performance of this business segment of AEL would remain a key rating monitorable.

Financial flexibility and likely need-based support that AEL can receive being a part of the Adani Group

Promoters of AEL hold around 75% equity shares in AEL which provides significant financial flexibility to raise resources on need basis. Also, out of total promoter's equity holding in AEL, 67.58% is unpledged as on June 30, 2020. Market value of total promoter's equity holding in AEL as on June 30, 2020 stood at around Rs.12,874 crore out of which the unpledged equity holding of the promoters was valued at around Rs.8,700 crore. Further, as on June 30, 2020, the market value of unpledged equity holding of the promoters in Adani Ports and Special Economic Zone Limited (APSEZ; rated CARE AA+; Stable), Adani Transmission Limited (ATL), AGEL, Adani Gas Limited (AGL; rated CARE A1+) and Adani Power Limited (APL; rated CARE BBB-; Stable / CARE A3) stood at around Rs.31,669 crore, around Rs.13,741 crore, around Rs.39,115 crore, around Rs.12,562 crore and around Rs.7,116 crore respectively. AEL's management has articulated their stance of receiving timely need-based support from its promoters in case of exigencies and for funding its requirement of growth capital; and the significant market value of promoters' unpledged shares in their various listed companies provides significant financial flexibility to AEL.

Key Rating Weaknesses

Risk associated with commodity price movement, foreign exchange rate fluctuations and regulatory changes in its IRM business

In IRM business, the prices of coal are mainly linked to the International Coal Price Indexes. Out of total coal imported by AEL, majority have a back to back supply contract according to the company management. Apart from that AEL maintains around 20-30 days' inventory in order to meet the spot demand from its customers. Hence, it is exposed to short-term variation in imported coal prices under its stock-and-sale coal trading business. AEL is also exposed to the risk associated with the foreign exchange rate fluctuations since its entire imports are denominated in USD and significant amount of sales is in INR. According to AEL's management, it has a practice to hedge most of its exposure; however, its profitability remains susceptible to sharp exchange rate fluctuations on the un-hedged portion. Till FY19, AEL was hedging its exchange rate risk by way of seagull options. However, from FY20 onwards, AEL has started to hedge its foreign exchange rate risk by way of taking forward cover in order to minimise losses. Further, the common group treasury also helps to partly mitigate exchange rate fluctuation risk. AEL's imported coal trading business also faces regulatory risks. During the last few years, PSUs have been mandated to reduce their reliance over imported coal which has resulted in moderation in volumes and profitability margins of AEL's IRM business.

Delay in falling-off of corporate guarantee given to one of the power business vertical companies

Corporate guarantee given by AEL for a bank facility of Adani Power Rajasthan Limited (rated CARE BBB; Stable / CARE A3+) for around Rs.1,050 crore (as on March 31, 2020) has been continuing longer than what was indicated by the company management. Further, during FY20, AEL has extended further corporate guarantees of around Rs.1,300 crore to the power business vertical of the Adani Group which is contrary to their earlier stance.

Inherent project risks associated with plans to undertake significantly large size projects simultaneously across varied lines of businesses wherein AEL doesn't necessarily has prior experience and increase in its capital expenditure plans

AEL has undertaken various projects across businesses that entail large capex. AEL is expected to incur total capex of around Rs.25,439 crore over FY20-FY22 which is proposed to be funded by way of debt of around Rs.15,202 crore which is significantly large compared to its existing size of operations. This large capex includes the capex towards Australian rail project but does not include the capex requirement of cement project in which nothing has been crystallised so far.

AEL has planned around Rs.4,763 crore of capex towards PEKB and new blocks allocated to AEL under the MDO route along with maintenance capex in MSPVL etc. through FY20-FY22.

The 'infrastructure and utilities capex' includes Hybrid annuity model (HAM) projects in road sector, one HAM project in water treatment under Clean Ganga Mission of the Gol, renewable power generation project in Australia and six airports (Ahmedabad, Lucknow, Mangaluru, Jaipur, Thiruvananthapuram and Guwahati) under privatization programme of the Gol. AEL expects to incur capex of around Rs.10,642 crore towards these segments over FY20-22.

The 'discretionary capex' includes data center business [AEL has signed a Memorandum of Undertaking (MoU) with Government of Andhra Pradesh (GoAP) for setting up data centers in and around Visakhapatnam over next 20 years], various projects in the defence sector [including joint ventures (JVs)] and Carmichael coal mine and associated rail project in Australia. AEL expects to incur around Rs.10,034 crore towards these segments over FY20-22.

While AEL has undertaken large capex, the management has indicated that AEL will undertake these capex in a calibrated fashion with a clear preference to incur 'infrastructure and utilities capex' in priority over 'discretionary capex'. As AEL doesn't necessarily have prior experience in most of these businesses, this exposes AEL to project execution risks.

However, AEL has entered into JVs with various industry players who have prior experience in that line of business in which AEL has plans to incur capex.

AEL has appointed senior experienced professionals and reputed consulting firms to help augment its capabilities specific to the airports operations business which is expected to mitigate project execution risk to an extent. As most of the aforesaid capex will have a debt funding mix to the extent of 70%, including the envisaged debt in MIAL and NMIAL, it will lead to higher leverage for AEL. However, management has reiterated that external debt servicing shall be its first priority and all deployment towards capex will be after external debt servicing only. AEL's management has articulated adherence to a specific range for AEL's consolidated total external debt / PBILDT. Further, in case this ratio exceeds 6.00 times on a sustained basis or in case its internal accruals are not sufficient to meet its capex requirement, promoters of AEL are committed to infuse funds into the company.

Large sized capex plans towards Australian coal mining and related rail evacuation infrastructure; albeit the project is delayed with AEL already having made significant investments

Few years back, the promoters of Adani Group had acquired 100% stake in Abbot Point Port Terminal in Australia. As a backward integration to the IRM business, in the year 2010, Adani Group (through a step-down subsidiary of AEL) acquired a mine at Carmichael Basin and decided to develop the mine and lay down a railway network from the mine to Abbot Point Port terminal. While AEL's economic interest in the mine is 100%, the rail network is being developed by a JV of AEL wherein AEL and a promoter company hold 50% equity each. This mined coal is ultimately planned to be shipped to India for meeting its energy requirements. While all major environment clearances and government approvals have now been received, the implementation of the project has been significantly delayed on account of, *inter-alia*, delay in achieving financial closure.

AEL has planned to implement the Australian mining project in phases. In the current first phase, it has estimated the total project cost at A\$ 2.08 billion (around Rs.10,480 crore) out of which it has invested around Rs.6,755 crore by March 31, 2019 out of own funds of AEL (consolidated). Fresh investments towards this project have been minimal in the last 3-4 years. The balance amount is planned to be invested through a combination of lease / debt and equity - and the actual mix is subject to financial closure. First phase of the project is expected to be operational by H2FY22 with a coal mining capacity of around 10 MMTPA.

Earlier, there were no concrete fund raising plans for implementing this project. More clarity on the funding mix was expected to emerge only after successful financial closure. However, out of balance requirement of around Rs.3,546 crore (as on December 31, 2018) towards Phase-I of the mine project, around Rs.3,266 crore was expected to be debt-funded on successful financial closure at the mine special purpose vehicle (SPV) level while minimal resources of AEL were expected to be deployed. Further, the cost of project of the associated rail project (which is being developed in a 50:50 JV with the promoters) is expected to be A\$ 1.67 billion (around Rs.8,382 crore) out of which investments to the tune of around Rs.2,492 crore were done by March 31, 2019 by way of equity infusion from AEL and the promoters. The balance amount of project cost of around Rs.5,890 crore was expected to be funded without any recourse from AEL.

However, there has been an increase in the equity commitments of AEL towards the Australian rail project. Till last year the capex towards Australian rail project was proposed to be funded largely through funds from the promoter group in addition to the debt to be raised on the project and AEL's equity contribution for its 50% equity stake in the project. However, now AEL has proposed to fund the same through its own accruals and external debt apart from 50% equity contribution from the promoter group. The debt requirement for both the projects is expected to be around A\$ 1.43 billion (A\$ 0.57 billion for the mine project and A\$ 0.86 billion for the rail project). The same is proposed to be funded through a two-tier standby letter of credit (SBLC) structure in which the SBLC would be raised by AEL in two tranches. The SBLC facility is akin to a bank guarantee (BG) and shall also be backed by an unconditional and irrevocable guarantee from AEL. AEL has received firm sanctions of around Rs.1,500 crore from some lenders for funding the Carmichael mine & rail project and drawl against the same has already started. This amount was available for drawl up to August 2020. AEL is in the process of getting sanctions from the domestic lenders for both the projects and is expecting to achieve financial closure shortly.

Liquidity: Adequate

Operations of AEL have remained working capital intensive over the years. Usual credit period allowed to the coal customers is around 3-4 months as per industry practice. Further, it provides extended credit period to subsidiaries of APL. It also maintains inventory of coal for around 20-30 days for its cash and carry business whereas the average credit period provided by suppliers is around 45 days. Accordingly, its operating cycle rests at around 2 months which is usually funded by Letter of Credit (LC) from banks. AEL primarily uses non-fund based limits (LCs for coal purchase) and had average utilization of around 72% for 12 months ended March 2020. Further, being an incubator for new businesses, AEL utilises BG limits to place BGs with various government authorities. AEL also raises funds through commercial paper (CP) issuances and the outstanding of CP was Rs.85 crore as on March 31, 2020. CARE also takes cognizance of AEL's Mining Division availing the moratorium from the lenders (from March 2020 to July 2020) as a COVID-19 relief measure [as permitted by the Reserve Bank of India (RBI)].

Press Release

Analytical Approach: Consolidated; mainly because of significant degree of operational, financial and managerial linkages between AEL and its subsidiaries. Also, AEL incubates various new businesses under it (in the past AEL has incubated port, thermal and renewable power, transmission and city gas distribution businesses) and provides all the required support (operational, financial as well as managerial) till the time these businesses become self-sustainable, which necessitates taking a consolidated analytical approach for AEL. List of entities getting consolidated in to AEL is placed at **Annexure-5**.

About the Company

AEL, incorporated in the year 1993, is the flagship company of the Adani Group with promoter group holding 74.92% stake in the company as on June 30, 2020. AEL, on a standalone basis, has mainly IRM / coal trading, power trading and MDO businesses. AEL, on a consolidated basis has diversified businesses which include solar cell and module manufacturing, agro-processing (including sale of branded edible oil), commodities trading, bunkering of ships and shipping. AEL through its subsidiaries has invested significant funds in coal mining and related rail evacuation infrastructure in Australia and is currently incubating new businesses like airports, road development, water treatment plant, data centers etc.

Annexure-3: Detailed explanation of covenants of the rated instrument

Deuticuleus	Detailed Explanation				
Particulars	NCD issue of Rs.400 crore	Proposed MLD issue of Rs.500 crore			
Financial Covenants	 Security cover will be at least 1.10 times of the outstanding book value of the NCDs at all times during the tenure of NCDs. 	-			
Non-Financial Covenants	 If the Credit Rating of AEL is downgraded to 'BBB' grade or lower, at any point of time during the currency of the NCDs, the eligible investors shall have the right to exercise the put option and require AEL to redeem all outstanding NCDs by payment within 30 days therefrom. 	 In the event existing rating from one of AEL's existing rating agency goes below A-, the investors would have a put option. The put option can be exercised within 15 days of the downgrade on 75% of the investors agreeing to it. A further period of 15 days would be available for AEL to pay the requisite dues (principal plus interest) to the investors without any prepayment penalty. 			

Annexure-4: Complexity level of various instruments /bank facilities rated for this company

Sr. No.	Name of the Instrument / Bank Facilities	Complexity Level
1.	Fund-based/Non-fund-based-LT/ST	Simple
2.	Fund-based/Non-fund-based-LT/ST	Simple
3.	Term Loan-Long Term	Simple
4.	Non-fund-based - LT/ ST-Bank Guarantees	Simple
5.	Non-fund-based-LT/ST	Simple
6.	Non-fund-based - ST-Loan Equivalent Risk	Simple
7.	Debentures-Non Convertible Debentures	Complex
8.	Debentures-Market Linked Debentures	Highly Complex

Annexure-5: List of subsidiaries / joint ventures / associates of AEL getting consolidated

About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
