

Angel Fibers Limited

November 25, 2020

Ratings

Facilities	Amount (Rs. crore)	Rating ¹	Rating Action
Long Term Bank Facilities	59.85 (Reduced from 65.64)	CARE B; Stable (Single B; Outlook: Stable)	Revised from CARE D (Single D); Stable outlook assigned
Short Term Bank Facilities	2.50	CARE A4 (A Four)	Revised from CARE D (Single D)
Total Facilities	62.35 (Rupees Sixty-Two Crore and Thirty-Five Lakhs Only)		

Details of instruments/facilities in Annexure-1

Detailed Rationale & Key Rating Drivers

The revision in the ratings assigned to the bank facilities of Angel Fibers Limited (AFL) takes into account a change in the management of the company along with satisfactory delay free track record of debt servicing.

The ratings, however, continue to remain constrained due to moderate scale of operations along with losses reported in FY20 (Audited; FY; refers to period April 1 to March 31) and H1FY21 (UA), leveraged capital structure, weak debt coverage indicators and stretched liquidity. The ratings, further, constrained on account of susceptibility of its profitability to volatile raw material prices and its presence in highly fragmented and competitive industry which has been facing slowdown since past one year and the same has aggravated post outbreak of Covid-19.

The ratings, further, continue to derive strength from its experienced management team, favourable location of its manufacturing unit with proximity to cotton growing region and benefits available under State Government policies.

Key Rating Sensitivities

Positive Factors

- Volume driven increase in scale of operations with total operating income (TOI) beyond Rs.200 crore along with improvement in PBILDT margin over 12% on sustained basis
- Improvement of capital structure with an overall gearing ratio below 3.00 times

Negative Factors

- Decline in operating profitability margin to less than 8% on a sustained basis
- Elongation in gross working capital cycle above 90 days on a sustained basis

Detailed description of the key rating drivers

Key Rating Weaknesses

Moderate scale of operations along with weak profitability

The scale of operations of AFL grew to Rs.142.73 crore in FY19 from Rs.90.56 crore in FY18 in line with the increase in installed capacity from 4,680 metric ton per annum (MTPA) in FY18 to 8,040 MTPA in FY19. The scale of operations of the company remained largely stable with a total operating income (TOI) of Rs.150.47 crore on account of lower sales volumes on the back of subdued demand and increased competition. The average utilization of installed capacity remained at around 80-85% during the last three years ended FY20. Further, the profitability of the company remained weak on account of limited bargaining power with its customers owing to intense competition in the cotton spinning segment. The operating profitability (PBILDT) of the company declined by around 50% in FY20 mainly due to decline in average sales realization of cotton yarn without corresponding decline in raw material prices i.e. raw cotton which has resulted into lower spread during the year. The PBILDT margin has remained at around 7% in FY20 as against 14% in FY19. Further, due to decline in its operating profits along with higher depreciation and interest cost, the company has reported net loss of Rs.14.64 crore and cash loss of Rs.1.72 crore in FY20.

Further, the company has reported the decline in the total operating income (TOI) of around 41% on y-o-y basis in H1FY21 as indicated by TOI of Rs.40.76 crore (H1FY20: Rs.69.30 crore) which is mainly due to disruptions caused in the operations of the company during Q1FY21 due to covid-19. However, during H1FY21, the company has reported operating profit of Rs.4.85 crore (H1FY20: Rs.2.64 crore) and net loss of Rs.3.81 crore (H1FY20: Rs. 6.20 crore).

Leveraged capital structure and weak debt coverage indicators

The capital structure of AFL remained leveraged marked by an overall gearing ratio of 5.47 times and TOL/ TNW ratio of 7.17 times as on March 31, 2020 due to its low net worth base. During FY20, the net worth of the company eroded significantly on account of net loss incurred during the year. Moreover, due to lower profitability and accruals, AFL's

¹Complete definitions of the ratings assigned are available at www.careratings.com and in other CARE publications.

reliance on external debt continues to remain high. The borrowings of the company comprises of term debt of Rs.51.57 crore, working capital borrowings of Rs.12.00 crore and unsecured loans from promoters and relatives of Rs.17.27 crore as on March 31, 2020. Further, the debt coverage indicators of the company deteriorated and continued to remain weak during FY20 marked with PBILDT interest coverage ratio of 1.11 times on account of lower profitability and increased interest cost during the year.

Susceptibility to volatile raw material prices and regulatory changes

AFL's profitability is susceptible to the movement in the prices of raw cotton which is the key raw material for production of cotton yarn. The prices of raw cotton are volatile in nature and depend upon factors such as area under production, yield, vagaries of monsoon, international demand supply scenario, inventory carry forward from the previous year and export quota along with minimum support price (MSP) decided by the government. Prices of raw cotton have been volatile over last couple of years, which translates into risk of inventory losses. Furthermore, the textile industry also witnesses regulatory risks such as change in domestic and international government policies related to subsidies or imports / exports tariffs, which also affects the industry players across the value chain.

Presence in highly fragmented and competitive industry with limited product differentiation

The yarn manufacturing industry in India is highly fragmented and dominated by a large number of small scale units leading to high competition in the industry. Smaller standalone units are more vulnerable to intense competition and have limited pricing flexibility, which constrains their profitability as compared with larger integrated textile companies who have better efficiencies and pricing power considering their scale of operations. Due to the fragmented nature of the industry, the ability to pass on the increase in raw material prices to the end customers is limited and is usually accompanied by a time lag.

Challenging scenario for textile industry due to Covid-19 pandemic

The closure of retail stores and malls on account of lockdown situation across the nation will affect textile industry's sales. On the international front, spread of Covid-19 in top export destinations such as Europe and US (together accounting for about 60% of the total apparel exports) has resulted in closure of retail stores and malls there. Even after the lockdown is lifted, gradual and delayed recovery is likely in consumer demand given the relatively discretionary nature of the apparel products in the backdrop of likely economic slowdown. There may be a cascading impact on demand of other textile products including cotton yarn and fabric. The strength of the recovery will be contingent on the duration and extent of the Covid-19 pandemic, where a prolonged downturn in apparel demand will constrain revenues and earnings of the sector. Going ahead, improvement in cotton yarn production can be expected on sequential basis backed by various unlock guidelines in the domestic market coupled with export of cotton yarn which has witnessed strong growth on y-o-y basis during June'20-Aug'20.

Manufacturing operations of AFL commenced fully from mid of June, 2020 post discontinuation of operations from March 23, 2020 owing to a nationwide lockdown announced in last week of March 2020 by the Central Government as a measure to check the spread of Covid-19 pandemic. The company has reported a total operating income (TOI) of Rs.38.43 crore during H1FY21 and the management of the company expects that the revenue of the company to ramp up in H2FY21.

Liquidity: Stretched

The liquidity of AFL is stretched due to losses reported during the year and very high reliance on external borrowings. The company funds its working capital requirement through bank borrowings and the average utilization of its working capital limits remained at around 80% in past 12 months ended September 2020. Further, the current ratio of the company remained below unity at 0.96 times as on March 31, 2020. However, the liquidity of the company was supported by healthy cash flow from operation of Rs.30.32 crore in FY20 and Rs.13.11 crore in H1FY21. The company had availed the moratorium granted as a Covid relief measure, as permitted by the Reserve Bank of India, for the period of March-August 2020 on its interest and principal repayment obligation.

Key Ratings Strengths

Change in management and satisfactory delay free track record of debt servicing

During H1FY21, Mr. Ramesh Ranipa and Mr. Jitendra Raiyani acquired equity stake of 56.47% held by Mr. Ashok Dudhagara and Mrs. Prafulaben Dudhagara, the erstwhile promoters of the company. Further, the new promoters through open offer, has also acquired 17.44% equity stake in the company from public. Subsequent to the change in promoter group, the shareholding of promoters has also increased to 73.91% as on March 31, 2020 as against 56.47% as on March 31, 2020.

Subsequent to the change in management, the company has regularized its cash credit (CC) account and term loan account with State Bank of India (SBI) in May 2020. Further, the company has availed the moratorium from SBI for the period of March 2020 to August 2020 and repaid the term debt instalments on due dates in September 2020 and October 2020. While the accounts held with SBI was regularised in May 2020, the company has regularized its cash credit account

and term loan account with Axis Bank on July 31, 2020. Further, the company has availed the moratorium from Axis Bank for the period of March 2020 to May 2020. Furthermore, the company has repaid the term debt instalments on due dates during August 2020 to October 2020.

Experienced management team

Mr. Ramesh J. Ranipa is a Whole-time-director cum Chairman of the company, possess vast experience in textile industry and holds directorship in three other entities i.e. Sanvi Spinning Mill Private Limited (rated: CARE BB+; Stable/ CARE A4+), Redstone Granito Private Limited (Withdrawn; earlier rated: CARE BB+; Stable/ CARE A4+) and Redeco Fibers Private Limited. Further, Mr. Rohan J. Raiyani (Son-in-law of Mr. Ramesh Ranipa), the Managing Director of the company who has completed his Master in Business Management from Toronto, Canada, looks after the day to day operations of the company along with Mr. Pankaj Bhimani, the whole time director of the company. Mr. Bhimani has an experience of around two decades in sales and marketing operations. The management of the company also consists of Mr. Jitendra Raiyani (Father of Mr. Rohan Raiyani), who is also associated as a director in two other entities i.e. Redren Energy Private Limited and Raison Bio-Tech Private Limited since last 15 years, Ms. Jyoti Katariya, Chartered Accountant having 14 years of experience, Mr. Meraman Bhatu and Mr. Hitesh Chaniyara.

Favourable location of its manufacturing unit with proximity to cotton growing region

The manufacturing facilities of AFL are located at Haripar, Jamnagar which falls in the Saurashtra region of Gujarat which produces majority of Gujarat's total cotton production. The said cotton growing belt of Gujarat houses more than 600 cotton ginning mills and around 125 spinning mills. Hence, AFL's presence in cotton producing region has benefitted it in terms of easy availability of raw materials, labor and lower logistic costs.

Benefits available under State Government policies

AFL's manufacturing facility is eligible for various incentives by the Government of Gujarat. As per the Gujarat Textile Policy - 2012, AFL is entitled to benefits like (1) 7% interest subsidy for a period of 5 years (from June 2018 to June 2023) (2) Power tariff subsidy @ Rs.1 per unit in the billed amount of the utility for a period of 5 years (from August 2018 to August 2023) (3) Reimbursement of State Goods and Service Tax (SGST) to the extent of 100% of the eligible fixed capital investments in plant and machinery for a period of 8 years (from August 2018 to August 2026). AFL is regularly receiving the subsidies from the government which enhance its cash flow.

About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
