Detailed Rationale & Key Rating Drivers

The ratings assigned to the bank facilities of Autolite (India) Limited (AIL) are constrained on account of its moderate scale of operations and moderately weak debt coverage indicators. The ratings are further constrained on account of working capital intensive nature of operations with stressed liquidity position, susceptibility of its operating profit margins to raw material price as well as foreign exchange fluctuation and dependency on the cyclical automobile industry. The ratings also factor in decline in scale of operations alongwith deterioration in profitability margins in FY17 (refers to the period April 1 to March 31).

The above constraints outweigh the benefits derived from the experienced promoters and senior management team with established track record of operations and established presence in automotive lighting systems, long-standing relation with reputed clientele and moderate capital structure.

Increase in the scale of operations along with improvement in profitability margins as well as debt coverage indicators and efficient working capital management are the key rating sensitivities.

Outlook: Negative

Ratings

The negative outlook is on account of decline in scale of operations in H1FY18 on y-o-y basis as well as net losses and cash losses incurred during the same period along with expectation of further deterioration in overall financial profile of the company in FY18

Detailed description of the key rating drivers

Key Rating Weaknesses

Decline in scale of operations and thin profitability margins:

During FY17, TOI registered decline by around 11% on y-o-y basis and stood relatively modest at Rs.114.42 crore. Further, the company has reported TOI of Rs.42.86 crore in H1FY18 registering decline by around 28% on y-o-y basis as against the same reported in H1FY17.

Profitability margins of the company have exhibited fluctuating trend during past three years (FY15-17). During FY17, PBILDT margin of the firm decreased by around 63 bps to 7.45%. PAT margin also declined by 252 bps to 0.42% in FY17. Further, AIL incurred net loss as well as cash losses in H1FY18.

Moderate capital structure albeit moderately weak debt coverage ratios:

The capital structure of AIL improved and stood moderate with an overall gearing of 0.87 times as on March 31, 2017 (1.00 times as on March 31, 2016), on account of accretion of profit to reserve along with decline in its total debt level. Further, the debt coverage indicators of the company stood moderately weak with total debt to GCA of 10.57 times as on March 31, 2017 (10.18 times as on March 31, 2016), and PBILDT interest coverage at 1.63 times in FY17 (1.63 times in FY16).

Further, due to net and cash loss in H1FY18, net worth base of the company is expected to erode thereby resulting in expected deterioration of its capital structure as well as debt coverage indicators.

Press Release

Stressed Liquidity position:

The operations of AIL are working capital intensive marked by high collection and moderate inventory holding which is partially offset by extended credit period available from suppliers. The operating cycle of the company stood high at 92 days in FY17; increased from 71 days in FY16. The liquidity ratios stood moderate with current ratio and quick ratio at 1.30 times and 0.92 times respectively as on March 31, 2017. Further, the average utilisation of fund-based working capital limit stood almost full during last 12 months period ended November, 2017 as per conversation with the banker. Moreover, the company has availed ad-hoc limit amounting to Rs.1.00 crore for the period of one month in May, 2017.

Raw material price volatility and foreign exchange fluctuation risk and dependency on cyclical automobile industry:

For OEM's (where orders are in large quantity and have to be executed over longer duration) the company faces raw material price fluctuation risk. The company gets the benefit of natural hedge as it is involved in the export of headlamps and halogens as against import of raw materials such as glass, nickel, tungsten and molybdenum. However, the company does not hedge the balance exposure and hence is exposed to foreign currency fluctuation risk to the extent of unhedged exposure. Further as AIL's products find usage in automobile industry and hence it is exposed to the performance of the automobile industry in the domestic and foreign market.

Key Rating Strengths

Experienced promoters and senior management team:

AlL is promoted by Mr Mahipal Gupta, present Chairman and Managing Director, who is a Mechanical Engineer by qualification with more than four decades of experience in this business and looks after the overall strategy of the company. He is assisted by his sons Mr Amit Gupta and Mr Adarsh Gupta who have more than a decade of business experience and they look after the technical and commercial aspects of the company, respectively. The company has also appointed experienced professionals to manage the day-to-day operations of the company.

Long track record of operations and established presence in automotive lighting systems with long-standing relation with reputed clientele:

Over past four decades AIL has developed long standing relations with reputed OEMs in the commercial vehicles segment. AIL has established relationship with both domestic as well as overseas customers in the automotive segment. The company has presence in more than 45 countries worldwide through its strong marketing network of agents and distributors. The company caters to all the three segments viz. OEM's, replacement market and manufacturing for other brands in the exports market.

Industry outlook: The auto component industry is expected to witness growth which will be largely driven by the buoyancy witnessed in automobile sales.

Analytical approach: Standalone

About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

Disclaimer

CARE's ratings are opinions on credit quality and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments.

In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors.
