| Total | 82.78 (Rupees Eighty two crore and seventy eight lakh only) | | |

Details of instruments/facilities in Annexure-1

Detailed Rationale & Key Rating Drivers

CARE had, vide its press release dated July 31, 2019, continues to place the ratings of Azam Rubber Products Limited under the 'Issuer Not Cooperating' category as the company had failed to provide the requisite information required for monitoring of the ratings as agreed to in its rating agreement. Azam Rubber Products Limited continues to be non-cooperative despite repeated requests for submission of information through phone calls and a letter/email dated Sep 02, 2020. In line with the extant SEBI guidelines, CARE has reviewed the rating on the basis of the best available Information which however, in CARE'S opinion is not sufficient to arrive at a fair rating. The ratings on bank facilities of Azam Rubber Products Limited are denoted as '**CARE D; Issuer not cooperating**'.

Users of this rating (including investors, lenders and the public at large) are hence requested to exercise caution while using the above rating(s).

Detailed description of the key rating drivers

CARE has not received any information from the company. At the time of last rating on July 31, 2019 the following were the rating strengths and weaknesses (updated for FY19 financials extracted from ROC):

Key Rating Weaknesses

Irregularities in debt servicing

There have been instances of over draws in cash credit facility availed by the company during September 2016 to March 2017. The average working capital utilization remained high at 109.36% during the trailing 12 months period ending April 2017 reflecting the stressed liquidity position. The company reported losses in FY17 (refers to April 1 to March 31).

Decrease in operating income and reduction in margins

The operating income of ARPL decreased by 21.88% y-o-y to Rs.66.47 crore in FY19 (PY: Rs.85.09 crore) on account of lower sales realization due to low end products damaged in fire sold at discounts. The company suffered losses at the operating level as well as net level largely due to the fire at the company's premises.

Weak financial risk profile and elongated working capital cycle

The overall gearing stood at 1.57x as on March 31, 2019 (PY: 1.86x). The company's operating cycle also deteriorated on account of increase in collection period and inventory holding period.

Susceptible of margins to volatility in raw material prices

The major raw materials of ARPL are natural rubber, Ethylene Vinyl Acetate (EVA) and Polyvinyl Chloride (PVC) whose prices fluctuate with the fluctuations in crude oil prices. As the raw material cost comprises major cost out of the total cost of sales, the volatility in price of raw materials impacts the profitability margins of the company.

*Issuer did not cooperate; Based on best available information

Competition from organized and unorganized players

Footwear industry is highly competitive in nature due to low entry barriers on account of low capital investment required to set up a new facility. Also, operations are labor intensive resulting in presence of a large number of unorganized players. Driven by larger penetration into tier II, III cities and growing rural market, various footwear brands are foraying into Indian market which restricts the profitability margins of industry players like ARPL.

Key Rating Strengths

Experienced promoters with continued financial support

ARPL is a closely-held family-owned business which was incorporated in 1994 by Mohd. Azam Khan who has an experience of over three decades in the field of rubber footwear and related products. His long industry experience has led to established relationships with the customers and suppliers. In the past, company had received support from promoters in the form of capital infusion

Diverse product portfolio The company is primarily present in low/ medium value footwear with a diversified product range which includes hawai, fancy and leather slippers, sandals, sports and canvas shoes and other varieties of footwear. The diversified product portfolio mitigates the risk of decline in demand of a particular type of the product manufactured by the company.

Liquidity: Poo - Operating cycle days of the company had increased to 506 days in comparison to 341 days in FY18; with substantial increase in Average inventory period from 149 days in FY18 to 247 days in FY19.

Analytical approach: Standalone

About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
