Total Facilities	6776.82 (7556.17) (Six thousand seven hundred and seventy six crore and eighty two lakhs only)		

Details of instruments/facilities in Annexure-1

Detailed Rationale & Key Rating Drivers

The revision in the ratings of the bank facilities of Bajaj Hindusthan Sugar Limited (BHSL) takes into account the delay free track record of more than 3 months (since December 10th, 2019) in servicing the debt obligations of the company. The ratings continue to derive strength from BHSL's Long track record of operations, experienced promoters, diverse revenue stream & multi-location manufacturing setup. The ratings are however constrained by its weak financial risk profile & stretched liquidity position, substantial investment in group companies and cyclical & regulated nature of sugar business. As per RBI circular dated March 27 2020 and May 23, 2020, companies can opt for moratorium on their debt obligations for a period of 6 months from March 2020 to August 2020.

Key Rating Sensitivities:

Positives:

- Ability of the company to improve profitability with PBILDT margin beyond 7% and positive PAT margin on a sustained basis
- Timely realization of its investments and loans from its group companies.

Negatives:

- Elongation of operating cycle leading to stretched liquidity profile
- Deterioration in capital structure with overall gearing ratio rising beyond 3.00x on sustained basis.
- Adverse changes in government policies affecting the operations and cash flow of the entity

Detailed description of the key rating drivers

Key Rating Weaknesses

Weak financial risk profile

Total operating income of BHSL registered a Y-O-Y growth of 13% in FY19 (refers to period from April 01 to March 31) on account of increased sugar sales. The PBILDT margin of the company however declined from 7.01% in FY18 to 6.50% in FY19 on account of decreased sugar realization. BHSL has incurred continuous losses in past 2 years resulting in deterioration of its net worth. Net-worth of the company declined from Rs. 3943 crores as on March 31, 2017 to Rs. 3405 crores as on March 31, 2019. Post restructuring of the debt, the interest cost of the company has decreased significantly and interest coverage indicators though improved but remained weak at 1.40x for FY19 as against 0.64x for FY18. Overall gearing of the company improved to 1.77x as on March 31, 2019 (1.94x as on March 31, 2018). During 9MFY20, TOI of the company stood at Rs. 4812.46 crores as against Rs. 4803.38 crores in 9MFY19. PBILDT of the company increased by 177% to Rs. 246 crores in 9MFY20 from Rs. 88.56 crores in 9MFY19 due to reduced losses in sugar segment. Company sold 134.31 lac QTL of sugar during 9MFY20 at an average realisation of Rs. 32.70 per kg. During 9MFY20, company earned GCA of around Rs. 11 crores and repaid debt of around Rs. 514 crores. Further, with lower sugar production in SS19-20, sugar prices are expected to remain firm in FY21. Also, as the distilleries of the company have become compliant with pollution norms, company will increase ethanol production in FY21.

²Complete definition of the ratings assigned are available at www.careratings.com and other CARE publications

Substantial investment in group companies

The group has implemented a power project under Bajaj Energy Ltd (BEL) and commissioned a 1,980 MW project under Lalitpur Power Generation Company Limited (LPGCL). BHSL has invested a substantial amount in its group companies by way of investments and loans & advances. Inability of BHSL to recover these advances in a timely manner in the past has led to its stretched liquidity position. The management is however planning to recoup the said advances by planning an IPO in Bajaj Energy limited (BEL) for which a DRHP had already been filed with SEBI on April 05, 2019, however due to adverse market conditions it has been delayed. The funds raised through the said issue will partly be utilized by BEL to purchase the stake of LPGCL from BHSL. The said fund infusion in BHSL will be entirely be utilized for de-leveraging its balance sheet which shall aid in the improvement in its capital structure going ahead. The exact issue size & funds infusion shall however depend on factors like market conditions, valuations, etc

Cyclical & Regulated nature of sugar business

The industry is cyclical by nature and is vulnerable to the government policies for various reasons like its importance in the Wholesale Price Index (WPI) as it classifies as an essential commodity. The government on its part resorts to various regulations like fixing the raw material prices in the form of State Advised Prices (SAP) and Fair & Remunerative Prices (FRP). All these factors impact the cultivation patterns of sugarcane in the country and thus affect the profitability of the sugar companies.

Key Rating Strengths**Long track record of operations and experienced promoters**

The company was incorporated in 1931 under the name - The Hindusthan Sugar Mills Limited (HSML) by Mr Jamnalal Bajaj. Subsequently HSML was renamed as Bajaj Hindusthan Limited in 1988 and changed to the present one in January 2015. The company gradually increased its capacity over the years to become one of the largest sugar producers in the country with aggregate capacity of 1.36 lakh tonne of sugarcane crushed per day (TCD). Mr. Kushagra Nayan Bajaj has considerable experience in the sugar industry and is assisted by a team of professionals having significant experience in the industry.

Diverse Revenue Stream & Multi-location manufacturing setup

Though BHSL is majorly into the production of sugar but the company also has incidental business like manufacturing of alcohol and Power, which de-risk the core sugar business of the company to some extent. It has six distilleries with capacity to produce 800 kilo litre per day (KLPD) of industrial alcohol and owns co-generation plants having power generating capacity of 449 MW. During 9MFY20, the distillery and power division together contributed around 12% (18% in 9MFY19 and 20% in FY19) of the gross revenue from operations and rest was from the sugar division.

Multi-location facilities with proximity to sugar cane growing areas of Uttar Pradesh provides abundant supply of sugarcane, expedient crushing of sugarcane within a very short time of harvest ensures a better recovery of sugar and proximity of distilleries to the sugar mill reduces transportation costs (of molasses for alcohol manufacturing). The area of sugarcane sowing in UP is well-irrigated on account of presence in the Gangetic River belt, as a result, the sugarcane crop is relatively less dependent upon the vagaries of monsoons compared to other parts of the country. However, the company is also exposed to geographical concentration risk as all its sugar mills are located in UP and are thereby susceptible to the state government policies.

Liquidity: Stretched

Low sugar realizations in the past due to excess sugar supply in the market has led to stress on the liquidity position of the company and eventually led to past delays in servicing of its debt obligations. However, the restructuring of debt into sustainable and unsustainable part has led to lower interest cost and scheduled repayment of BHSL. Operating cycle of the company stood at -40 days in FY19 as against 5 days in FY18 on account of high creditor days. Creditor days of the company increased to 209 days in 2019 as against 193 days in FY18 and cane arrears of the company increased to Rs. 4074 crores as on March 31, 2020 against Rs.3870 crore as on March 31, 2019. Sugar Stock of the company stood at 88.07 lac QTL as on May 31, 2020, which will be sold during the year to generate cash flow for scheduled debt repayment. Free cash and bank balance as on April 30, 2020 stood at Rs. ~76 crores. Company has availed moratorium period as per RBI guidelines for 6 months i.e. from March 2020 to August 2020 for interest and principal repayment.

About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
