Long term Bank Facility-Term Loan	16.00	CARE C; Stable [Single C; Outlook: Stable]	Assigned
Total Facility	16.00 (Rupees Sixteen crore only)		

Details of instruments/facilities in Annexure-1

Detailed Rationale & Key Rating Drivers:

The rating assigned to the bank facilities of Barak Valley Cements Limited (BVCL) takes into account relatively small scale of operations, moderate financial risk profile and solvency position, working capital intensive operations, stretched liquidity position, project execution risk associated with capacity expansion plan, exposure to volatility in input costs and cyclicality of the cement industry.

However, the rating derives strength from the long track record of operations of the company in cement industry, cement plant operations with captive limestone mines and locational advantage with strong customer base in North-East India.

Key Rating Sensitivities

Positive Factors:

- Improvement in financial profile
- Strengthening of liquidity position
- Efficient management of working capital cycle

Negative Factors:

- Deterioration in liquidity position leading to any instances of delay or overdrawal in debt servicing

Detailed description of the key rating drivers:

Key Rating Weaknesses

Relatively small scale of operations

The company has relatively small scale of operations with installed capacity of 1000 tonnes per day (TPD) of cement and 600 TPD of clinker and the company sells cement only in the North-Eastern region of India. Capacity utilization during FY19 stood at 72% for cement and 90% for clinker. Capacity utilization has marginally improved in H1FY20 to 73.37% for cement. However, capacity utilization for clinker stood at 86.41% in H1FY20.

Moderate financial risk profile and solvency position

The company has reported total operating income (TOI) of Rs.140.28 crore and profits after tax (PAT) of Rs.3.03 crore for FY19 as compared to TOI of Rs.150.23 crore and PAT of Rs.2.83 crore for FY18. The decline in TOI was mainly on account of heavy rains in the North Eastern region and partial plant shutdown for 35-40 days during FY19 for replacement and repair of machinery parts, which impacted the overall cement production. However, PAT in FY19 was higher on account of increase in other income, along with lower depreciation and interest cost. Overall gearing and interest coverage ratio stood at 0.76x as on March 31, 2019 (0.80x as on March 31, 2018) and 1.79x for FY19 (2.00x for FY18). During 9MFY20, the company has reported TOI of Rs.114.86 crore and PAT of Rs.2.39 crore as compared to TOI of Rs.101.56 crore and PAT of Rs.1.78 crore during 9MFY19.

Working capital intensive operations and stretched liquidity position

The company's operations are working capital intensive. Gross current asset days stood at 77 days, while creditor days stood at 88 days in FY19 resulting into negative working capital cycle. However, high credit period is on account of stretched liquidity position of the company. Average utilization of fund-based limits remained high at 100% for the 12 months period ended January 2020. The company had free cash and bank balance of Rs.0.48 crore as on December 31, 2019.

Exposure to volatility in input costs and cement prices

The company has captive lime stone mines and procures its entire limestone requirement from its wholly-owned subsidiary i.e. Meghalaya Minerals and Mines Limited. Further, it meets its coal requirement through auctions or open market purchases from the domestic producers and thus remains exposed to risk arising on account of the volatility in the raw material prices. The company also remains exposed to risk of volatile movement in the price of diesel with respect to freight

cost. Furthermore, with the company's presence restricted to North-East India, it remains susceptible to demand-supply dynamics and volatility in the prices of cement

Project Execution Risk

Company is planning to increase capacity of clinker from present 600 TPD to 700 TPD in FY20 and FY21. The modernization of plant is part of this capex which is expected to increase capacity utilization for cement. The total estimated cost for the project expansion and modernization is Rs. 26.11 crore to be funded by D:E of 1.58x. However, timely execution of the project without any cost over-run is key risk.

Key rating strengths

Long track record of operations in cement industry

Established in 1999, the company has nearly 2 decades of experience in the business of cement manufacturing and sells cement under the brand name 'Valley Strong Cement'. It manufactures Ordinary Portland Cement (OPC) and Portland Pozzolana Cement (PPC) and its target markets are located in the North-Eastern states of India.

Cement plant operations with captive limestone mines

The company's manufacturing plant has locational advantage as the unit is situated on the National Highway connecting Guwahati and Silchar and located in the Barak Valley region of Badarpurghat, in Karimganj District of Assam and it is connected to other states of North-East such as Manipur, Mizoram, Tripura and southern part of Meghalaya, which are the company's target markets. The company also has captive lime stone mines, in its wholly owned subsidiary viz. Meghalaya Minerals and Mines Limited (MMML), in district Jaintia of Meghalaya. The limestone mines are located within 75 km radius from the cement plant and have deposit life of over 100 years. BVCL is procuring its entire requirement of limestone from its subsidiary.

Established customer base in North-Eastern region of India

The company sells cement through a distribution network comprising 150 dealers, in the North-Eastern states of Assam, Mizoram, Tripura, Manipur and Meghalaya. The company has a diversified and strong customer base including institutions and government agencies like Director General Of Supplies & Disposals (DGS&D), 19th Assam Rifals, Executive Engineer Rural Development (EERD), CPWD, ONGC, BSF, etc.

Industry outlook

Given the inherently cyclical nature of the cement industry, the company remains exposed to risks associated with the same. However, higher outlay and focus on infrastructure, housing and rural development are likely to boost the cement demand in the long-term, which in turn will benefit the companies in the sector.

Liquidity analysis: Stretched

The company has free cash and bank balance of Rs.0.48 crore as on December 31, 2019. Average utilization of fund-based limits remained high at 100% for the 12 months period ended January 2020.

The company has scheduled debt repayments of around Rs. 1.23 crore in FY20 and FY21 as against projected Gross Cash Accruals in the range of Rs.6 crore to Rs.7 crore in FY20 and FY21.

Analytical Approach: Standalone

About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
