Detailed Rationale & Key Rating Drivers

The ratings to the bank facilities of CCL International Limited (CCL) continues to remain constrained by small scale of operations and elongated operating cycle. The ratings further continue to remain constrained by business risk associated with tender-based-orders and presence in a highly competitive nature of industry.

The ratings, however continue to derive comfort from experienced management and technically qualified team, moderate profitability margins, healthy order book position however entailing concentration, comfortable capital structure & moderate debt coverage indicators.

Rating Sensitivities

Positive Factors

- Increase in scale of operations as marked by total operating income of above Rs. 100.00 crore on sustained basis.
- Improvement in operating cycle below 90 days on sustained basis.

Negative Factors

- Deterioration in capital structure as marked by overall gearing ratio of above 1.50x.
- Deterioration in the coverage indicators as marked by interest coverage ratio below 2.00x and total debt to GCA above 8.00x on sustained basis.

Detailed description of the key rating drivers

Key Rating Weakness

Small scale of operations

The scale of operations of the company continues to remain small as marked by total operating income and gross cash accruals of Rs. 37.98 crore and Rs. 4.51 crore respectively during FY19 (FY refers to the period April 1 to March 31). Furthermore, the scale has been fluctuating for the past three financial years i.e. FY17-FY19 owing to tender driven nature of construction business and closure of real estate and trading business segments. The small scale limits the company's financial flexibility in times of stress and deprives it from scale benefits.

The company has achieved total operating income of ~Rs. 10.85 crore till 6MFY20 (refers to the period April 01 to September 30, based on provisional results).

Elongated operating cycle

The operations of the company continue to remain elongated as it is evident from operating cycle of 131 days for FY19 as against 140 days. The elongated operating cycle emanates from higher work in progress inventory at project site of 100 days, in FY19. The company maintains minimum inventory in the form of raw materials and work in progress at different sites for smooth execution of contracts which leads to inventory days of 100 in FY19. The company raises bills on quarterly basis i.e. on the completion of certain percentage of work and thereon which gets acknowledge by client after inspection of work done by CCL. Further, the collection period stood on the higher side as all of the company's customers are public sector undertaking and the realization generally takes 2-3 months due to procedural delays relating to clearance of bills. The company normally receives payable period of around 2-3 months from its suppliers resulting in average creditor period of 87 days for FY19. The average working capital limits of the company remained 72.92% utilized for the past 12 months period ended December 31, 2019.

¹Complete definitions of the ratings assigned are available at www.careratings.com and in other CARE publications.

Geographical concentration in revenue profile

The order book of the company continues to remain concentrated to a single geography i.e. Eastern India, thus exposing it to geographical concentration in its revenue profile. Approximately 90% of the unexecuted order book pertains to work in the Meghalaya region. CARE believes that CCL's business risk profile is exposed to unfavourable changes in the government policy in that region and the company is also exposed to regional disturbances.

Business risk associated with tender-based-orders

The company undertakes government projects from government entities like PWD (Public Works Department) in Assam, Mizoram and Meghalaya which are awarded through the tender-based system. The company is exposed to the risk associated with the tender-based business, which is characterized by intense competition. The growth of the business depends on its ability to successfully bid for the tenders and emerge as the lowest bidder. Hence, going forward, due to increasing level of competition and aggressive bidding, the profits margins are likely to be under pressure in the medium term.

Highly competitive industry

Indian construction industry is characterized as fragmented and competitive in nature as there are a large number of players at the regional level. CCL faces direct competition from various organized and unorganized players in the market. There are number of small and regional players and they are catering to the same market which limits the bargaining power of the company resulting in exerting pressure on its margins. CCL receives all its majority of work orders from government/ public sector undertakings. The risk arises from the fact that any changes in geo-political environment and policy matters would affect all the projects at large. Furthermore, any changes in the government policy or government spending on projects are likely to affect the future revenues of the company.

Key Rating Strength***Experienced management and technically qualified team***

The operations of CCL are currently managed by Mrs. Rama Gupta and Mr. Akash Gupta. Mrs. Rama Gupta, managing director of CCL, is a post graduate by qualification and has experience of more than a decade in the finance and civil construction industry through her association with various public and private entities (Tanvi Fincap Private Limited, AAR Securities Limited, AAR Infracity Limited, and AAR Infrastructure Limited). Mr. Akash Gupta, director of CCL, is a graduate by qualification and has an experience of around a decade through his association with entity and other associate concerns. Both of them collectively look after the overall operations of the company.

Further, they are supported by other independent directors viz. Mr. Arvind Sharma, Ms. Sonam Sharma and Mr. Sandeep Garg, who have considerable experience in the construction industry through their association with this entity and other associate concerns. The company has well qualified and experienced engineers, along with supervisory staff.

Healthy order book position, however entailing concentration

In the past the company had completed the projects of various clients. In light of past track record and satisfactory work, it has managed to get larger sized orders from the clients. The company has orders worth Rs. 237.43 crore from Public Works Department (PWD), Meghalaya, Mizoram and Assam. The unexecuted order book of the company as on September 30, 2019 stood at Rs. 188.73 crore, which is equivalent to 17.39x of the total operating income generated from the construction business in FY19, thereby giving medium term revenue visibility. The average tenor of the contracts to be executed varies up to 24-36 months. However, the entire order book at present is concentrated towards contracts from Public Works Department (PWD), Meghalaya. Hence, any unfavorable changes in their contracts awarding policies would have a direct bearing on the company's revenue growth and profitability. Also, effective and timely execution of the orders has a direct bearing on the margins.

Moderate profitability margins

The profitability margins of CCL are directly associated with technical aspect of the contract. Further, the profitability varies with the project due to tender driven nature of the business owing to varying margins in the different projects undertaken by the company. The profitability margins of the company continue to remain moderate as marked by PBILDT margin and PAT margin of 14.98% and 5.29% respectively for FY19 as against 14.41% and 0.25% respectively for FY18. Further, in 6MFY20 (refers to the period from April 01 to September 30, 2019) the PBILDT margin stood at 16.31% and AT margin of 1.01%.

Comfortable capital structure and moderate debt coverage indicators

The capital structure of the company continues to remain comfortable as on the past three balance sheet dates ending March 31'17-'19, on account of higher net worth base along with limited debt levels availed. The debt to equity stood at 0.38x and overall gearing ratio stood at 0.48x as on March 31, 2019 as against debt equity ratio of 0.31x and overall gearing ratio of 0.31x as on March 31, 2018. The slight deterioration in the capital structure was on account of increased dependence on external borrowings to meet its capex and working capital requirements.

Moreover, the coverage indicators of the company continues to remain moderate owing to limited debt levels as marked by interest coverage ratio of 3.71x in FY19 and total debt to GCA at 4.64x in FY19.

Liquidity: Adequate- The liquidity position of the company remained adequate characterized by sufficient cushion in accruals vis-à-vis repayment obligations. The company generates GCA of Rs. 4.51 crore and cash & bank balances of Rs.0.55 crore as against repayment of Rs.1.60 crore in FY19. Its working capital limits are utilized around 72.92% for the past 12 month's period ending December, 2019, supported by above unity current ratio and quick ratio.

About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
