Ratings

Facilities	Amount (Rs. crore)	Rating ¹	Rating Action
Long-term Bank Facilities	21.54	CARE BBB-; Negative [Triple B Minus; Outlook: Negative]	Reaffirmed
Short-term Bank Facilities	46.50	CARE A3 [A Three]	Reaffirmed
Total Facilities	68.04 (Rs. Sixty eight crore and four lakh only)		

Details of facilities in Annexure-1

Detailed Rationale & Key Rating Drivers

Owing to the operational, financial and managerial linkages between Captain Polyplast Limited (CPPL) and Captain Pipes Limited (CPLD), CARE has presented a 'combined' view of both the entities (referred to as CPL).

The ratings for the bank facilities of CPL continue to derive strength from the vast experience and established track record of the promoters of CPL in the agricultural equipment industry along with its reputed clientele. The ratings also derive strength from the moderation in its geographic concentration through registration and commencement of sales in states other than Gujarat.

The ratings, however, are constrained by CPL's high working capital intensity of operations due to dependence on government agencies for payment of subsidy, its exposure to volatility in raw material prices as well as linkage of the industry to agricultural sector with dependence on government policies. The ratings also factor in CPL's moderate scale of operations and profitability along with deterioration in CPL's debt coverage indicators due to extension in receivables, with general elongation in credit period owing to delays in receipt of subsidy from state government agencies as well as commencement of del credere agency (DCA) business in FY18 (FY refers to the period from April 1 to March 31).

CPL's ability to grow its scale of operations while improving its profitability and maintaining comfortable capital structure along with easing of its liquidity with efficient management of its working capital would be the key rating sensitivities.

Outlook: Negative

The negative outlook for the long term bank facilities of CPL reflects CARE's expectation of further weakening of its debt coverage indicators amidst subdued profitability and further increase in working capital requirements which are expected to be funded through additional debt.

The outlook may be revised to 'Stable' if the debt coverage indicators are better than expected with higher than envisaged profitability and control over its working capital requirements and lower than expected leverage.

Detailed description of the key rating drivers

Key Rating Strengths

Vast experience of promoters and established track record in agriculture equipment industry: The promoters of CPL, Mr. Ramesh Khichadia, Mr. Askok K. Patel and Mr. Gopal D. Khichadia, have over two decades long experience in the agricultural equipment industry. Mr. Ramesh Khichadia (B. Tech in Agriculture Engineering), key promoter and managing director, has more than two decades of experience in irrigation system implementation, specifically in Gujarat. Presently, CPPL has got itself registered as an authorized and registered supplier for MIS for around 13 state government authorities including that of Gujarat, Andhra Pradesh, Tamil Nadu and Telangana.

Reputed customers with some improvement in geographic concentration: CPL is focusing on diversification of its revenue profile by expanding its presence in states other than Gujarat, due to extended time taken in processing of subsidy claims by GGRCL. Over the last few years, CPL has obtained/renewed licenses to operate as an authorized and registered supplier for MIS for 13 states in India, which has reduced its dependency on Gujarat. However, Gujarat continued to be the top revenue contributor for CPL due to its established presence in the state.

Key Rating Weaknesses

¹Complete definition of the ratings assigned are available at www.careratings.com and other CARE publications

Moderate scale of operations and profitability along with deterioration in debt coverage indicators: During FY18, the CPL's TOI remained stable as the growth in scale of operations in CPPL was largely offset by subdued performance of CPLD. Further, CPLD was not able to pass on higher prices of imported raw materials to consumers, translating into lower combined profitability and cash accruals during FY18. Further, CPL's outstanding debt as on March 31, 2018 increased marginally, primarily on account of increased utilization of working capital limits to fund the receivables of IOCL's DCA business, which resulted in deterioration in debt coverage indicators, marked by interest coverage a TD/GCA of 9.68x as on March 31, 2018. Furthermore, CPL's solvency position continued to remain moderate marked by an overall gearing of 1.34x as on March 31, 2018.

Profitability exposed to volatile raw material prices: A major part of CPL's MIS and plastic products are manufactured through a melting and extrusion process from plastic granules. The prices of these granules, being crude oil derivatives, exhibit volatility with change in the price of crude oil. CPL sources majority of its raw materials from Indian Oil Corporation Ltd. (IOCL) and Reliance Industries Ltd. (RIL) and has low bargaining power vis-à-vis its suppliers. CPL's profitability is hence, exposed to the volatility in raw material prices, given its limited ability to pass on effect of any adverse movement in these to its customers in a competitive industry.

Dependence on the agricultural sector and government policies albeit favourable growth prospects for MIS sector: With around 50% of the arable land in India still being rain-fed and the problem of water scarcity prevailing in the country, there is huge potential for the growth of MIS in the nation. However, the demand for MIS products is subject to risks associated with the vagaries of nature, seasonality and government policies.

Working capital intensive nature of operations: CPL's operations are working capital intensive in nature, marked by a long operating cycle of 128 days in FY18 (elongated from 100 days in FY17). The elongation in the cash conversion cycle was due to increase in the overall level of outstanding receivables, owing to extended credit period being provided to customers, including that in the DCA business. CPL's outstanding receivables stood at Rs.75.95 crore as on September 30, 2018, indicating stable collections. CPL's MIS business is also seasonal to some extent, due to which it has to stock required inventory for installation. As a result, the outstanding inventory at the end of March every year is also sizably high, resulting in a long inventory holding period. Collectively, a long collection and inventory holding period translates into a long operating cycle for the company, but a significant part of these requirements are funded through a long creditor period.

Moderate liquidity: The overall liquidity position of CPL remained moderate on account of its sizeable working capital requirements, a long operating cycle in the MIS business and sizeable funding requirements for the DCA business. The monthly utilization of CPL's fund based working capital limits stood high at 95% for the trailing 12 months ended October 2018. CPL's has repayments of around Rs.2.50-7.50 crore over the next 2-3 years, which are expected to be met from internal accruals. However, increase in scale of DCA business and expansion in new geographies would require sizeable working capital for the company, which is expected to be met largely through availing of additional bank borrowings, as internal accruals are not expected to grow substantially.

Analytical approach: Combined analysis of Captain Polyplast Ltd. and Captain Pipes Ltd. Owing to the operational, financial and managerial linkages between Captain Polyplast Ltd. (CPPL) and Captain Pipes Ltd. (CPLD) CARE has presented a 'combined' view of both the entities (referred to as CPL).

About the Company

Shapar-based Captain Polyplast Ltd. (CPPL) was established in March 1997 by Mr. Ramesh Khichadia along with two other business associates. The company is engaged in the business of manufacturing and assembling of irrigation equipment including drip irrigation and sprinkler systems, trading of high density polyethylene (HDPE) pipes, PVC pipes and other allied products related to Micro Irrigation System (MIS). As on March 31, 2018, CPPL had an installed capacity to manufacture 8,200 metric tons per annum (MTPA) of MIS equipment of various grades at Shapar near Rajkot in Gujarat.

In February 2017, the company also commenced agency business for various types of polymers of Indian Oil Corporation Ltd. (IOCL) as its del credere agent (DCA) and consignment stockist (CS) for Gujarat region.

CPPL's associate concern, Captain Pipes Limited (CPLD) is engaged in manufacturing of unplasticized Poly Vinyl Chloride (uPVC) pipes and fittings. Both companies are operated under common management and derive operational synergies between the two businesses apart from having cross equity holdings.

Brief financials of CPL are tabulated below:

(Rs. Crore)

Brief Financials (Combined)	FY17 (A)	FY18 (A)
Total operating income	153.40	149.28
PBILDT	19.39	16.35
PAT	5.28	3.45
Overall gearing (times)	1.21	1.34
Interest coverage (times)	2.31	2.06

A: Audited

During H1FY19, CPL, reported a TOI of Rs.84.24 crore.

Status of non-cooperation with previous CRA: None

Any other information: Not Applicable

Rating History for last three years: Please refer Annexure-2

Note on complexity levels of the rated instrument: CARE has classified instruments rated by it on the basis of complexity. This classification is available at www.careratings.com. About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

Disclaimer

CARE's ratings are opinions on credit quality and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments.

In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors.
