<b>Total Facilities</b>	-		

*Details of facilities in Annexure-1*

### Detailed Rationale, Key Rating Drivers and Detailed description of the key rating drivers

CARE has reaffirmed and withdrawn the outstanding ratings of 'CARE A-; Stable/CARE A2+' [Single A Minus; Outlook: Stable/ A Two Plus] assigned to the bank facilities of Chaman Lal Setia Exports Limited (CLSE) with immediate effect. The above action has been taken at the request of CLSE and 'No Objection Certificate' received from the bank that has extended the facilities rated by CARE.

The rating assigned to the bank facilities of CLSE continues to derive strength from the experienced promoters and management team, long track record of operations, favorable manufacturing location along with established business relationship with customers and suppliers, and geographically diversified revenue profile. The ratings further derive strength from its comfortable solvency position.

The ratings are, however, constrained by low brand penetration, susceptibility of margins to fluctuations in raw material prices and foreign exchange rates movements, monsoon dependent operations, fragmented nature of the industry coupled with high level of government regulation.

### Detailed description of the key rating drivers

#### Key Rating Strengths

**Experienced promoter with long track record of operations in the rice industry:** Chaman Lal Setia Exports Limited (CLSE) was incorporated in Amritsar, Punjab in 1994 by Mr. Chaman Lal Setia and his sons, Mr. Vijay Setia who is the currently the Chairman-cum-Managing Director and Mr. Rajeev Setia who is the currently the Joint Managing Director-cum-CFO. In the recent past, the company has also seen the introduction of 3rd generation promoters- Mr. Sukarn Setia, Mr. Ankit Setia and Mr. Sankesh Setia, as the executive directors of the company. The promoters are assisted by an experienced team of professionals for carrying out the day-today operations of the company.

**Favorable manufacturing location:** CLSE's manufacturing unit is located at Karnal, Haryana. The company also has a rice grading and sorting facilities in Amritsar (Punjab) and Kandla (Gujarat). These areas are a hub for paddy/rice, leading to its easy availability of raw material. The company's processing facility is also at a proximity to the grain market resulting in procurement at competitive rates. The presence of the company in the vicinity to the paddy producing regions gives it an advantage over competitors in terms of easy availability of the raw material as well as favorable pricing terms. The favorable location also puts the company in a position to cut on the freight component of the incoming raw materials.

**Established business relationship with customers and suppliers with diversified revenue profile:** Presence of the company in the rice industry for over three decades and favorable location of the plant in close proximity to paddy growers in Haryana and Punjab has led to development of long term relationships with the suppliers and therefore easy procurement of raw materials. On the customer side, long track record has enabled the company to establish strong business relationships with its clientele in the market, which in turn leads to repeat orders. The company exports to approximately 80 countries which geographically diversifies the revenue profile of the company. In FY20, the company derived ~88% of its total operating income from exports (~89% in FY19) wherein it is mostly engaged in doing business for its customers. In the domestic market, however, majority income is derived from the own brand sales.

**Comfortable financial risk profile:** The operating income of the company increased marginally (by ~4%) in FY20. The PBILDT margins of the company improved on a year-on-year (y-o-y) basis to 10.19% in FY20 from 8.45% in FY19. Subsequently, the PAT margins of the company improved to 6.56% in FY20 from 4.49% in FY19. The GCA of the company, in absolute value terms, increased by ~47% in FY20, on a y-o-y basis to Rs. 57.43 cr. from Rs. 39.09 cr. in FY19.

The long-term debt-to-equity ratio and overall gearing ratio of the company stood comfortable and improved on a y-o-y basis to 0.17x and 0.25x, respectively, as on March 31, 2020 from 0.20x and 0.43x, respectively, as on March 31, 2019. The total

<sup>1</sup>Complete definition of the ratings assigned are available at [www.careratings.com](http://www.careratings.com) and other CARE publications

debt to GCA and interest coverage ratios of the company stood comfortable and improved to 1.18x, as on March 31, 2020 and 12.15x in FY20 respectively from 2.49x, as on March 31, 2019 and 8.67x in FY19 respectively.

In Q1FY21 (UA), the total income of the company increased by 18% on a y-o-y basis to Rs. 243.92 cr. from Rs. 206.98 cr. in Q1FY20 (UA). Further, the PBILDT margins of the company stood comfortable at 14.74% in Q1FY21 (UA) and improved on a y-o-y basis from 6.36% in Q1FY20 (UA). Consequently, the PAT margins of the company improved on a y-o-y basis. The interest coverage ratio stood comfortable at 26.25x in Q1FY21 and improved on a y-o-y basis from 6.24x in Q1FY20. CLSE did not avail the moratorium from the bank in light of Covid19, as per the extant Reserve bank of India (RBI) guidelines, for debt obligations due in March-2020 to August-2020 period.

#### Key Rating Weaknesses

**Low brand penetration:** The company primarily sells rice in the form of private labels (packaging done under customers' brand name) with sales constituting ~80% of the total income in FY19 (~77% in FY17). The remaining sales are under its own brands; viz., 'Maharani', 'Begum' and 'Mithas'. The limited brand penetration limits the ability to charge a high margin.

**Monsoon dependent operations with susceptibility to fluctuation in raw material prices and foreign exchange risk:** Agro-based industry is characterized by its seasonality, due to its dependence on raw materials whose availability is affected directly by the vagaries of nature. The price of rice moves in tandem with the prices of paddy. Availability and prices of agro commodities are highly dependent on the climatic conditions. The monsoon has a huge bearing on crop availability which determines the prevailing paddy prices. Since there is a long time lag between raw material procurement and liquidation of inventory, the company is exposed to the risk of adverse price movement resulting in lower realization than expected.

CLSE earned approximately 88% of its total operating income from exports in FY20 (PY: ~89%), while the company did not have any major imports other than capital goods. Due to absence of any natural hedge, the profitability margins of the company are susceptible to any adverse fluctuations in the foreign currency rates. To safeguard itself to some extent, the company enters into derivative contracts to hedge its forex exposure, however, the complete exposure of the company is not hedged and it is exposed to any adverse fluctuation in the foreign exchange prices for the unhedged portion.

**Fragmented nature of industry with vulnerability of international trade to changes in government policies:** The commodity nature of the product makes the industry highly fragmented, with numerous players operating in the unorganized sector with very less product differentiation. Furthermore, the concentration of rice millers around the paddy growing regions makes the business intensely competitive.

Further, the Government of India (GoI), every year decides a minimum support price (MSP) to be paid to paddy farmers (non-basmati) which are somewhat linked to the prices of basmati rice as well. The profitability margins of the company, thus remain vulnerable, especially in times of high paddy cultivation. The rice processing sector as a whole is vastly regulated by the GoI and any adverse changes in the regulatory framework could negatively impact rice processing units like CLSE. Also, the company remains susceptible to changes in import policies of various countries.

**Analytical approach:** Standalone

### About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

### Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
