*Details of instruments/facilities in Annexure-1*
**Detailed Rationale & Key Rating Drivers**

The ratings assigned to the bank facilities and instruments of Cochin Shipyard Ltd (CSL) continue to factor in its well-established operations and long-standing track-record of around four decades in the industry, Government of India (GoI) ownership, CSL's strong financial position, diversified revenue stream and the potential for CSL to acquire strategic importance on completion of the Indigenous Aircraft Carrier project. The rating also takes notes of significant increase in order book position in the past one year period ended February 2020.

The above ratings, however, continue to be constrained by the operational risk on account of the complex nature of operations due to simultaneous execution of multiple vessels and activities, exposure of CSL to foreign exchange fluctuation risk and cyclical nature of the shipbuilding industry.

**Rating Sensitivities**
**Positive Factors**

- Increase in order book providing revenue visibility for the long term on sustained basis
- Improvement in income and accruals on sustained basis

**Negative Factors**

- Substantial decline in Government Of India stake
- Continuous decline in order book

**Detailed description of the key rating drivers**
**Key Rating Strengths**
**Well established operations and strong track record**

CSL has longstanding track record of operations spanning around four decades, CSL has been able to develop the capability and expertise to build and repair variety of ships. CSL has built various types of commercial ships for both international and domestic clients and is currently building India's first Indigenous Aircraft Carrier (IAC) for the Navy thereby becoming the only Indian shipyard having such a distinction.

CSL has the capability to undertake complex and sophisticated repairs for Oil Rigs & Ships of Navy, Coast Guard & Merchant Navy besides building merchant ships and offshore vessels for domestic as well as foreign clients. Notable clients of CSL include Navy, Coast Guard, Shipping Corporation of India and ONGC Limited. In the past, CSL has also undertaken repair/re-fitting activities for 'INS Viraat' and INS Vikramaditya Aircraft carrier of Indian Navy.

<sup>1</sup>Complete definition of the ratings assigned are available at [www.careratings.com](http://www.careratings.com) and other CARE publications

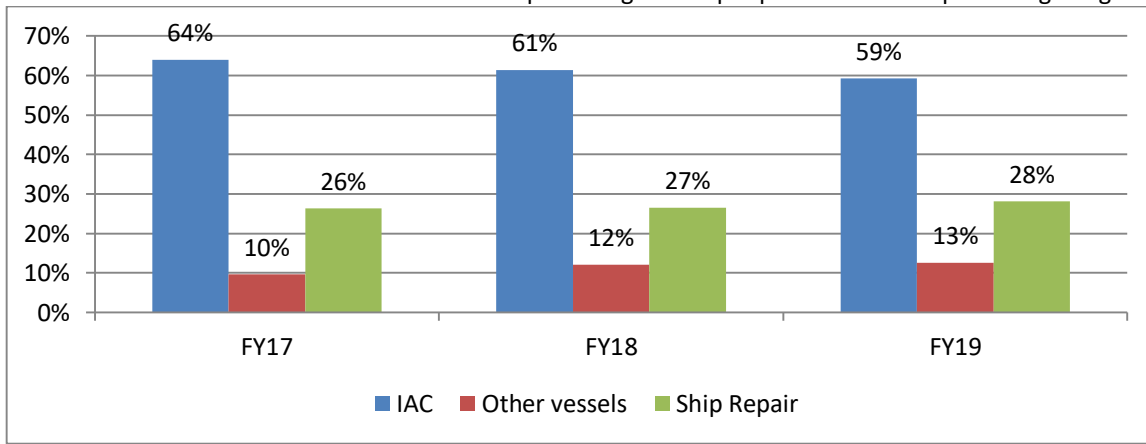

After the successful execution of assignment with respect to the construction of IAC, CSL has the potential to be a shipbuilding/ship repair yard of strategic importance to the country. It already possesses the distinction of being the only commercial shipyard in the country that has the ability to repair defence ships and its facilities are routinely used to carry out repairs and maintenance work of various defence ships. CSL has till date constructed and delivered vessels including tankers, bulk carriers, platform supply vessels, offshore supply vessels, fast patrol vessels, etc. As on February 07, 2020, Gol own 72.86% of the stake in the company.

**Diversified revenue stream to an extent**

CSL has diversified revenue stream to certain extent with income being generated from both ship repair and ship building. The company generates revenue from both commercial and government related orders. It also has the capability to build and repair various types of ships.

CSL has also signed agreement with Mumbai Port Trust, Kolkata Port Trust and Andaman & Nicobar Port for development, management, operations and maintenance of ship repair facilities in respective ports.

The contribution of ship repair income has gradually increased in the four years ended March 2019. Share of ship repair income stood at 28% of gross sales in FY19. The company has signed MOU's with various government bodies for carrying out repair activities of their ships. During 9MFY20, the contribution from ship repair was Rs.466 cr contributing 18% of gross sales. Chart below shows the contribution of ship building and ship repair revenues as percentage of gross sales.

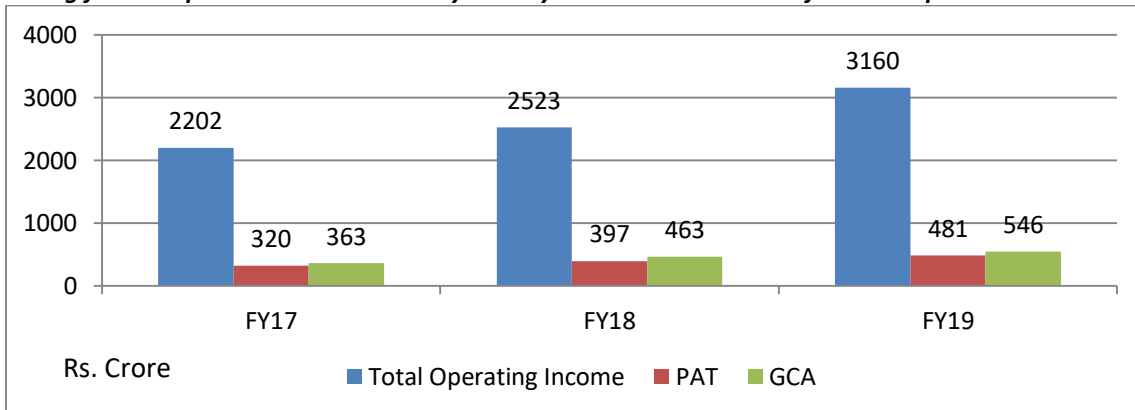

**Significant increase in order book position providing revenue visibility for medium term; However, highly concentrated orderbook**

As on November 26, 2019, the company had order book of Rs.11,481 crore (including ship repair orders of around Rs. 500 crore) as against Rs.1,607 crore as on December 31, 2018. Same translates into 3.88 times of FY19 revenue.

Order book of CSL is highly concentrated with top 2 orders accounting for 82% of total order book. The major orders include order for phase-III of IAC with contract value of Rs.3,235 crore and order for eight defense vessels with an order value of around Rs.6,311 crore. This apart the company has cost plus margin to be booked for raw materials for IAC, which will add to the top line of the company. Including cost plus value of Rs.4600 crore, the total order book value is Rs.16,081 crore as on Nov 26, 2019. The total order book (including cost plus margin) stood at Rs. 15,253 crore as on February 15, 2020.

**Strong financial position characterized by healthy cash accruals and comfortable capital structure**

During FY19, the total operating income of CSL grew by 26% to Rs.3,160 crore. CSL reported PBILDT margin of 24.40% and GCA of Rs.546 crore (PY:Rs.463 crore) in FY19. With no debt availed during the year, the capital structure of CSL remained low with overall gearing at 0.04 x as on March 31, 2019 as against 0.04 x as on March 31, 2018. It is to be noted that the company has spent Rs.200 crore on share buyback in FY19. The outstanding short term borrowings was nil as on March 31,

2019. CSL receives advance/stage payments on completion of milestones, this aids the company in meeting its working capital requirements.

The fund based working capital utilization was nil in the last twelve months ended January 2020. The company had surplus funds amounting Rs.2,411 crore in the form of cash and bank balances as on March 31, 2019 (Rs.3,062 crore as on March 31, 2018) and Rs.1,917 cr as on Sep 30, 2019. During 9MFY20, CSL registered PAT of Rs.499 cr (PY:Rs.384 cr) and GCA of Rs.553 cr (Rs. 413 cr) on total operating income of Rs.2,808 cr (PY: Rs.2,340 cr)

#### **Key Rating Weaknesses**

##### **Large size Capex programs under implementation**

CSL is undertaking capex for developing an International Ship Repair Facility (ISRF) at Cochin Port Trust at an estimated cost of Rs.750 crore. The land is taken on 30 year lease. The company plans to develop ISRF facility by adding ship lifting facility and allied facilities which will enable the company to undertake complex ship repair orders at an estimated project cost of around Rs.750 crore (revised from earlier estimate of Rs.970 crore due to reduction in civil and design works) spread across FY18-FY22. This ISRF facility for ship repair is expected to further enhance income from ship repair in the long term.

Additionally, CSL plans to augment the capacity by building a dry-dock in its premises at an estimated cost of around Rs.1,600 crore (revised from earlier estimate of Rs.1800 cr, due to reduction in number of cranes purchased) . This would enable CSL to build larger ships including building large container vessels, drill ships, etc. The above proposed capex is planned to be executed from FY19-FY22. At present, entire capex is proposed to be funded through internal accruals and using surplus funds present in the form of free cash and bank balance. During FY19, CSL incurred capex of Rs.492 crore as against GCA of Rs.546 crore. Capex planned for FY20 is Rs.620 crore and capex for FY21 is projected to be around Rs.600 crore per annum.

Timely completion of the above two projects within estimated cost while maintaining comfortable capital structure is critical. Also, in the long-term, the ability of CSL to secure new orders and optimally use proposed capacity additions is critical. The company has also incorporated a JV with Hooghly Dock & Port Engineers Ltd for upgrading and modernization of shipbuilding infrastructure at two shipyard sites of Salkia and Nazirgunge in Kolkata apart from plans to lease port facilities at various other locations across India to set up ship repair facilities in view of good potential for the same.

##### **High Operational Risk**

Complex nature of operations such as simultaneous construction of multiple ships, co-ordination of various stakeholders and multiple departments of yards in typical shipbuilding process, etc results in high operational risk as compared to other industries in general.

##### **Foreign exchange risk**

Given that CSL's shipbuilding/ship repair business is also for international clients and the fact that a large part of components and raw materials for the said business need to be imported, it runs a significant foreign currency risk. The company has foreign exchange rate fluctuation clause in its agreement with some of its clients where in any fluctuation due to the same will be passed on to the customers. However the company shall opt for forward cover as per requirement.

##### **Cyclical nature of the shipbuilding industry**

The shipbuilding (non-off-shore) industry is directly linked to the shipping industry and hence is cyclical. The shipping industry was under pressure for the past few years which is reflected from the low freight rates compared to the peaks enjoyed prior to June 2008. However, the GOI's thrust on shipbuilding industry with 'Make in India' programme, and other sector specific initiatives are expected to aid the industry. The above measures would prove beneficial to the prospects of the Indian Shipbuilding and ship repair Industry.

CSL has established track record of building and delivering vessels to both domestic and international clients. CSL having successfully executed assignments for the Indian Navy, Coast Guard and other departments, it has been able to de-risk from the downtrend faced by the commercial shipbuilding industry to some extent. With track record of repairing defence ships, building Aircraft Carrier and other type of defence vessels, CSL expects to secure further orders from the defence sector in the future.

##### **Liquidity: Strong**

CSL had free cash and bank balance of Rs.2,411 crore as on March 31, 2019 (Rs.3,062 crore as on March 31, 2018) and Rs.1,682 cr as on December 31, 2019. The working capital of the company is managed by the advances received from customers (including Navy) and the utilization of fund based working capital limits has been nil the same has been confirmed by the bankers. CSL does not have any long term debt repayment in FY20. CSL reported GCA of Rs.546 crore in FY19 and Rs.553 crore in 9mFY20.

##### About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

#### Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating.

CARE's ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
