Total Bank Facilities	257.82 (Rupees Two Hundred Fifty Seven crore and Eighty Two lakh Only)		

Details of facilities in Annexure-1
Detailed Rationale & Key Rating Drivers

The ratings assigned to the Bank Facilities of Dollar Industries Limited (DIL) continue to derive strength from the long track record of operations and experience of the promoters in the hosiery industry, satisfactory financial performance in FY19 (refers to the period April 01 to March 31), backward integration measures, established brand position and focus on premium products, comfortable capital structure and debt protection metrics along with sound financial flexibility. The ratings are, however, constrained by the elongated working capital cycle, volatility in the prices of raw materials, diversified geographical presence albeit lower penetration in Southern India and intense competition from organised and unorganised players.

The ability of the company to increase its scale of operation, while maintaining its profitability margin, improvement in the operating cycle and efficient management of working capital shall be the key rating sensitivities.

Detailed description of the key rating drivers
Key Rating Strengths
Long track record of operations, significant experience of promoter and fund support

Mr. Dindayal Gupta, ex-Chairman of the company has been in the textile industry since 1973. His son, Mr. Vinod Kumar Gupta, MD, with an experience of around three decades, is administering the financial and marketing strategies of the company.

The promoters have regularly infused funds in the past to support growing scale of operation and cater to the working capital requirement. The promoters infused fund by way of preferential allotment of equity shares (including share premium) of Rs.107.5 crore in FY18.

Established brand presence in the intensely competitive industry

Focusing initially on the economy innerwear segment, the company has over the years broadened its product portfolio, catering to both premium and economy class which spans innerwear products across all price ranges, thermal wear and casual outer wears. DIL has grown over the last decade and chartered a decent market share in the intensely competitive domestic hosiery industry.

Greater focus on the premium innerwear segment thus improving the profitability profile

DIL entered the innerwear segment with its 'Bigboss' range of innerwear. In 2016, the

¹Complete definitions of the ratings assigned are available at www.careratings.com and in other CARE publications

company launched its “Force NXT” range of innerwear in the premium segment. It continues to introduce new SKU’s in premium ranges and is continuously upgrading the designs, quality and comfort of its product through R&D process. In FY19 the company has introduced Athleisure range in Bigboss and Force NXT brand.

Effective marketing spends and strong distribution network

The company has aggressively pursued various marketing and promotional activities to compete with existing players in the industry. The ad spends as a percentage of net sales has been in the range of 10%-11% over the last three years (FY17-FY19) which continued to remain on the higher side compared to other industry players. DIL has a wide distribution network of over 950 plus dealers and 1,00,000 plus retailers with presence in 29 States. Further the company is also exporting its products in 18 countries.

Satisfactory financial performance in FY19

The financial performance of the company continued to witness improvement with the total operating income growing at 11% in FY19 supported by concentrated brand building efforts and strong distribution network. The PBILDT margin was stable at 13.26% in FY19 vis-à-vis 13.44% in FY18. PAT margin, however, improved from 6.92% in FY18 to 7.32% in FY19 due to lower capital charge. The company earned adequate GCA of Rs.85.67 crore vis-à-vis debt repayment obligation of Rs.43.47 crore in FY19.

Robust financial position marked by healthy network, satisfactory leverage and sound financial flexibility

The debt equity ratio of the company improved from 0.17x as on March 31, 2018 to 0.04x as on March 31, 2019. The overall gearing ratio was stable at 0.53x as on March 31, 2019. The overall gearing ratio is expected to improve going forward on account of absence of any major capex requirement (except investment in Pepe Jeans Innerfashion Pvt Ltd a Joint Venture company of DIL with Pepe Jeans Europe B.V), scheduled repayment of debt coupled with accretion of profit to reserves. The TDGCA of the company was satisfactory at 2.61x as on March 31, 2019.

Moreover, DIL is continuously looking for opportunities to grow inorganically, and any such acquisition is not expected to significantly temper the capital structure as the management expects to maintain a peak gearing of 0.55x in the medium term.

Tie-up with a reputed International brand

The company had entered into a Joint Venture with Pepe Jeans, Europe B. V. with 50% partnership to enter the super-premium segment. DIL has invested Rs.4 crore in FY18-19 and Rs.3 crore in FY17-18 totalling to an investment of Rs.7 crore as on March 31, 2019. The JV is primarily engaged in sale and distribution of the licensed products viz., innerwear and loungewear including gymwear, sleepwear and track suits under the brand name Pepe Jeans London. The J.V has commenced its operations and will gradually increase its scale of operations along with market share in the super-premium segment.

Diversified geographical presence albeit lower penetration in Southern India

DIL has geographical presence across entire India with lower penetration in Southern India. Northern region contributed 42% of net sales in FY19, followed by Eastern region with a contribution of 27% and Western region contributing to 24% of net sales in FY19. Presence in Southern region is low with only 7% contribution to net sales in FY19.

Key Rating Weaknesses

Raw material price fluctuation risk partly mitigated by various backward integration initiatives

The major raw material for DIL is cotton, yarn and fabric. Raw material cost formed about

46% of the total cost of sales in FY19 vis-à-vis 47% of total cost of sales during FY18. The yarn prices are dependent on the prices of cotton which being commodity in nature have volatile price movements. DIL has backward integration in the form of spinning mill, processing unit for bleaching and dyeing in Tamil Nadu which results in better operating efficiency and margin. The company also owns 5 MW of windmills at Dindigul in Tamil Nadu, which caters to part of the company's electricity requirements.

Working capital intensiveness and deterioration in operating cycle

The working capital cycle elongated from 185 days in FY18 to 209 days in FY19 primarily on the back of increase in inventory holding period which stood at 152 days in FY19 vis-à-vis 134 days in FY18. Inventory holding period is generally high as the company markets a wide range of products and accordingly has to maintain sufficient amount of inventory of each of its product type. Also, due to the backward integration of the plant the company needs to maintain an average inventory of Rs.50.0 crore of raw cotton for its spinning mills which leads to high inventory holding of raw material. Also, the average collection period deteriorated and stood at 109 days in FY19 vis-à-vis 98 days in FY18. The average working capital utilisation was ~70% during the twelve month ended May 2019.

Industry characterised by intense competition

The textile industry has two broad segments. The first is the unorganized sectors which comprise of small scale handicraft units and using traditional tools and methods. The second is the organized sector consisting of spinning, apparel and garments segment which applies modern machinery and techniques to avail the advantage of economies of scale. With implementation of GST, the organized sector has benefitted in terms of market share. DIL has grown over the last decade and chartered a decent market share. Significant competition exists from regional brands in the adult segment and kid's segment. The management intends to leverage the growing brand equity of Dollar to mitigate competition to an extent in these markets.

Liquidity: Adequate.

DIL has free cash and cash equivalents of Rs.20.7 crore as on March 31, 2019 vis-à-vis Rs.19.36 crore as on March 31, 2019. The company earned satisfactory GCA of Rs.85.67 crore in FY19 which was utilised to repay the long term obligations and unsecured loans to the tune of Rs.43.47 crore. Further, the company had also paid dividend of Rs.10.92 crore (including tax of Rs.1.84 crore) in FY19 and incurred normal capex of Rs.12.74 crore in FY19. Working capital limit utilisation is also moderate at 70% during 12 months ending May 2019, providing liquidity cushion.

Analytical approach: Standalone

About the Company

"Dollar" brand for hosiery was established by Mr. Dindayal Gupta, in 1973 through a proprietorship firm, Bhawani Textiles, and was converted into a Public Limited Company in 1993. DIL is primarily engaged in manufacturing innerwear for men, women and kids, which contributed approximately 80-85% to its revenue over the last few years. The company also

makes casual wear under the brand name “Force Go Wear” along with thermo/winter wear which together contribute to the balance 15%-20% of the total revenue. The company’s products are mainly sold in the domestic market under the brand names “Bigboss”, “Missy”, “Ultra Thermal”, “Champion Kids”, “Force Go Wear” and “Force NXT”. The company also exports its products to UAE, Oman, Iraq, Jordan, Qatar, Yemen, Kuwait, Bahrain, Nepal, Myanmar, Nigeria, Ghana, Algeria, Kenya, Iran, Ukraine, Togo and Latvia contributing less than 10% of its turnover.

About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
