Details of instruments/facilities in Annexure-1

Detailed Rationale & Key Rating Drivers

The reaffirmation of rating assigned to the bond issue of Dredging Corporation of India Limited (DCI) takes into account continued significant stake holding by the Government of India (GoI) (around 73.47%) in the company, strong administrative control of the GoI, DCI's established presence of over three and a half decades in providing dredging services at major and non-major ports in India and overseas, continued leadership position in the maintenance dredging segment in India, healthy order book position, comfortable capital structure, satisfactory liquidity position and stable outlook for the port sector. The ratings also factor in stable operating income with improved profitability margins in FY18 (refers to the period April 01 to March 31) & 9MFY19 (refers to the period April 01 to December 31). The rating, however, is constrained by high collection period albeit improvement, high dependence on Kolkata Port Trust (KoPT) which contributed close to half of the company's turnover during FY18, vulnerability of the operations to foreign exchange fluctuation and competition from private and foreign dredging companies. The rating also takes into account DCI providing for bad debts pertaining to long pending receivables from Sethusamudram Shipping Canal Project (SSCP) during Q2FY19 which has resulted in net loss for the period 9MFY19; however the same is expected to result in improved collection period going forward.

Going forward, the ability of the company to sustain growth and profitability margins, capitalize on expected demand from major capacity expansion of ports in India, realize its debtors, minimize the impact of foreign exchange fluctuation are the key rating sensitivities.

Detailed description of the key rating drivers

Key Rating Strengths

Significant shareholding and strong administrative control by Government of India (GoI)

DCI is a Mini Ratna – Category I and Schedule B Public Sector Enterprise under the administrative control of Ministry of Shipping, Government of India (GoI). As on December 31, 2018, GoI holds 73.47% stake in DCI. DCI has been signing the Memorandum of Understanding (MoU) with GoI since 1992-93. The MoU is a negotiated document between the Government, acting as the owner of Public Sector Enterprise (PSE) and a specific PSE. It contains the intentions, obligations and mutual responsibilities of the Government and the PSE.

Long track record of providing dredging services and continuous leadership position in maintenance dredging segment

DCI has over 35 years of presence in the dredging sector and provides dredging services in shipping channels of major, non-major ports, naval establishments, Fishing Harbors, power plants, state governments, private organization, shipyards and other maritime organizations. DCI is catering to the dredging requirements of the Haldia/Kolkata Port almost for the past 30 years. DCI's market share for maintenance dredging at Major Ports in India stood at 54% in FY18 which increased from 47% in FY17.

Stable total operating income with improved profitability margins in FY18 and 9MFY19

Total income in FY18 remained stable with marginal improvement to Rs.596.34 crore (as against Rs.594.19 crore in FY17). Other income comprises of one time income from sale of assets during the year FY18 amounting to Rs.8.83 crore. DCI disposed two vessels DCI Dredge VII and DCI Dredge IX. With addition of new dredgers resulting in higher efficiency and low cost associated with downtime and maintenance of dredgers, PBILDT and PAT margins improved by 229 bps (23.38%) and 162 bps (2.87%) respectively in FY18.

Further, for 9MFY19, DCI achieved total income of Rs.460.13 crore registering a growth of 3.65% over 9MFY18. With better operational efficiency, PBILDT margin also improved and stood at 25.25% (adjusted for provision for bad debts amounting to Rs.84.14 crore made towards Sethusamudram Canal Project).

Healthy order book

The order book of DCI as on January 21, 2019 was Rs.767.58 crore as against Rs.601.47 crore as on April 1, 2017 which provides medium term revenue visibility. DCI is executing international order amounting to Rs.100.50 crore (~13% of total order book) for Mongla Port Authority, Bangladesh.

¹Complete definition of the ratings assigned are available at www.careratings.com and other CARE publications

Comfortable capital structure and debt coverage indicators

The capital structure of the company continues to be comfortable. As on March 31, 2018, the overall gearing has improved marginally to 0.52x as compared to 0.54x as on March 31, 2017. The total debt reduced from Rs.817.78 crore as on March 31, 2017 to Rs.809.48 crore as on March 31, 2018. Other debt coverage indicators, interest coverage and total debt/GCA also continue to remain satisfactory at 6.89x and 6.21x respectively in FY18 as against 6.62x and 7.64x in FY17.

Satisfactory liquidity position

The liquidity position of the company as on March 31, 2018 also improved with outstanding free cash and bank balances of Rs.40.67 crore (increased from Rs.28.10 crore as on March 31, 2017). This apart, DCI has restricted cash amounting to Rs.36.41 crore as on March 31, 2018 held as debenture redemption reserve deposits.

Stable industry outlook

The Government of India has envisioned the Sagarmala Programme, which aims to exploit India's 7500 km coastline and 14500 km of potentially navigable waterways. It promotes port-led development in the country by harnessing strategic locations on key international maritime trade routes.

Key Rating Weaknesses**High Collection period albeit improvement**

The average collection period as on March 31, 2018 remained high although improved to 204 days from 231 days as on March 31, 2017. Total receivables include pending dues from SSCP amounting to Rs.84.14 crore which is pending for more than 5 years. Excluding the same, receivable days stood at 149 days as on March 31, 2018, which has improved from 176 days as on March 31, 2017.

High dependence on Kolkata Port Trust

DCI's dependence on revenue from Kolkata Port Trust (KoPT), Haldia continues to remain on a higher side. In FY18, DCI derived ~45% of revenue from KoPT which had increased from 39% in FY17. Historically, the revenue from KoPT contributed around 50%. Despite reduction in revenue concentration considering past trend, the same continues to remain on a higher side.

Write off of bad debts resulting in loss for the period 9MFY19

In Q2FY19, DCI had written off bad debt amounting to Rs.84.14 crore pertaining to Sethusamudram Canal Project (SSCP) resulting in company incurring net loss for the period 9MFY19. DCI reported loss of Rs.66.51 crore (as against net profit of Rs.1.65 crore in 9MFY18). However, the same is expected to result in improvement in operating cycle going forward led by further improvement in collection period.

Vulnerability of the operations to foreign exchange fluctuation

DCI is exposed to forex risk due to euro loans to fund dredgers and also heavy dependence on imported components and spare parts with nearly 90.60% of the spares and components being imported in FY18. Going forward, the company is planning to execute international projects to generate income in foreign currency which will act as a natural hedge.

Competition from private and foreign dredging players

DCI's market share has dropped over the years primarily due to liberalization and ports moving away from a nomination basis to a competitive bidding basis. DCI's market share for maintenance dredging at Major Ports declined from around 75% in FY13 to 54% in FY18 (47% in FY17). In terms of capital dredging, DCI's share has come down from 84% in FY08 to 4% in FY18 (32% in FY17). This decline in market share was due to competition from other private and foreign players, apart from stoppage of capital dredging work at the SSCP, which was sanctioned on June 1, 2005 to DCI.
