Details of instruments/facilities in Annexure-1

Detailed Rationale & Key Rating Drivers

The outlook for long term bank facilities has been revised from 'Stable' to 'Negative' while reaffirming the ratings assigned to the bank facilities and instruments of Empire Industries Limited (EIL). This mainly factors continued decline in profitability expected during FY21 on account of low profitability from all other divisions except the lease rental division. Also, the debt levels are expected to remain high with low scheduled term loan repayments and continued high working capital requirement. The net profit of the company has been declining from the past two years and debt levels increased as on March 31, 2020. The company incurred debt funded capex plan in vitrum glass division during FY20. Moreover, frozen food export division has witnessed an increase in working capital requirement during past two years. During FY20, except for lease rental and real estate division all other divisions reported lower profitability vis a vis previous year. On March 22, 2020, the Govt. of India announced nationwide lockdown leading to temporary closure of non-critical establishments and inter-state transportation. This impacted operations of all the divisions except the lease rentals during Q1FY21. Although the operations of said divisions have started to normalize from Q2FY21 onwards after GOI announced 'UNLOCK' measures, the ability of company to achieve projected scale of operations and profitability remains to be seen. EIL plans to compensate revenue loss in domestic frozen food business through increase in share from export markets. This would lead to further increase in working capital requirement thereby impacting profitability.

The ratings continue to benefit from established track record and experience of the promoters managing diversified businesses as well as established and known client profile. The ratings also factor in moderate capital structure and healthy cash flows majorly generated from the property rental business.

However, these rating strengths are tempered by stagnant business operations in manufacturing and agency business, high competition prevalent in the property leasing business which is also exposed to rollover risk, increase in working capital requirement related to frozen food exports business, project execution and salability risk associated with the Ambarnath real estate project as well as stabilization risk associated with vitrum glass division up-gradation project. Although company's business operations across all segments have started to normalize post Q1FY21 onwards, the company's ability to achieve projected scale of operations while maintaining financial liquidity amidst the challenging macro environment remains to be a key monitorable.

Key rating sensitivities

Positive factors:

- Improvement in PAT margins above 10% on sustainable basis through improvement in scale of operations coupled with cost optimization
- Improvement in ROCE above 20% on a sustained basis through improvement in cash flows

Negative factors:

- Increase in operating cycle above 220 days on sustained basis through deterioration in collection period and increase in inventory holding period.

¹Complete definitions of the ratings assigned are available at www.careratings.com and in other CARE publications.

- Increase in overall gearing above 1.5 times owing to debt funded capex plan over medium term or owing to increase in working capital requirement.

Detailed description of the key rating drivers

Key Rating Strengths

Long track record with highly experienced promoters

EIL has a long track record in manufacturing of vitrum glass. Over the years, the company has also diversified into various businesses. Mr. S C Malhotra is the Promoter cum Chairman of the company and with over six decades of experience in the industry currently looks after the overall corporate responsibilities. The top management is also supported by professionals having significant experience in their respective field.

Diversified revenue profile

The company's revenue profile has been diversified with EIL operating in multiple divisions whereby its core competence is in glass division. However, over the years decrease in revenue from vitrum glass division owing to competitive nature of business has resulted in company diversifying into various other segments such as trading of food products, lease income earned from property rentals, trading of machine tools & equipment as well as business support service. The company garnered major profitability from its lease business followed by food division and glass division during FY20.

The company recorded revenue of Rs.584.56 crore in FY20 (PY: Rs.539.63 crore) and Rs.94.46 crore in Q1FY21 (Q1FY20: Rs.130.44 crore).

Established track record of servicing reputed clientele

EIL's operations comprise diversified businesses and thus caters to a wide clientele. The company has long association with large pharmaceutical for its vitrum glass division. Further, company has tie-ups with reputed hotels for its food division. For lease business, the company has tenants with strong credit profile. Agency business has customers from Germany, Russia, Korea, France, Spain, Japan, Romania, Italy, UAE, Netherlands, China and others. Thus, the company has wide spread and long term relationships with its clientele which helps the company in securing repeat orders.

Low geographic concentration risk

The company started processing and export of seafood in FY18. In first full year of operations (FY19), the company recorded revenue of Rs.73 crore from this division and recorded revenue of Rs.114 crore during FY20. The company has exposure in USA, European Countries and Middle East countries. The increasing footprints in overseas markets reduce the risk of geographical concentration.

Moderate capital structure and adequate liquidity profile

Overall gearing of EIL (excluding impact of lease obligations) increased to 1.25 times as on March 31, 2020 from 0.95 times as on March 31, 2019 as company availed term loan amounting Rs.45 crore for funding vitrum glass capex during FY20. Moreover, working capital utilization increased owing to food division export business. During FY20, company incurred capital expenditure of around Rs.60 crore for the vitrum glass unit for replacement of the machinery. On account of lower PAT and increase in debt the debt protection metrics have deteriorated as on March 31, 2020. The total debt / gross cash accruals ratio deteriorated from 3.81 times as on March 31, 2019 to 6.37 times as on March 31, 2020 and PBILDT / interest coverage ratio declined from 3.67 times as on March 31, 2019 to 2.67 times as on March 31, 2020.

Going ahead, company does not have any major debt funded capex plans over medium term. Hence, debt coverage indicators are expected to remain moderate.

Key Rating Weaknesses

Moderate profitability

The company garners major profitability from its lease business followed by food division and glass division. The company's profitability margin at PBILDT level has improved from 13.39% in FY19 and to 14.43% in FY20 owing to increased profits from real estate division. However, PAT declined from Rs.44 crore in FY19 to Rs.34 crore in FY20 mainly owing to significant increase in interest costs. The increase in interest costs is mainly owing to debt funded capex plan during FY20 and increase in working capital requirement due to food division export business.

In Q1FY21 EIL's PBILDT and PAT margin stood at 16.43% and 2.45% respectively. Going forward, PBILDT margins are expected to be in range of 12%-15% over medium term.

Moderate salability risk

The Company has sold 76% of the total saleable area (phase I has total saleable area of 455278 square feet) till July 2020 with total agreement value of Rs.103.29 crore, out of which advances of Rs.83.00 crore have already been received. Further, the salability risk remains for the balance portion of unsold area.

Presence in highly competitive commercial space

Over the period, the areas (Parel and Vikhroli in Mumbai), where EIL's leased properties are located, have developed as hub for corporate offices, banks, and IT service providers. As a result, many other companies have developed their properties in these areas. Thus, competition exposes the company to rollover risk and reduces its ability to increase average rental prices. Presently, occupancy level of Lower Parel stood at 87% (owing to partial exit of RBS Bank) and Vikhroli properties stood at 100%. In 'Empire Business Centre', company leases conference rooms and individual office desks. The occupancy level of the same has reduced to 40% from 80% earlier owing to 'Work from home' offered by many clients.

Liquidity: Adequate

The company availed for moratorium for interest and term loan repayment obligations falling in Q1FY21 which was approved by lenders as per RBI guidelines. However, during Q2FY21 they have started servicing debt and interest obligations. The company has repayment obligations in FY21 (from Q2FY21 - Q4FY21) amounting to Rs.12.55 crore. The company has adequate liquidity in form of cash and cash accruals from lease rental business. Moreover, company's free cash and cash equivalents and unencumbered fixed deposits stood at Rs.13.15 crores and Rs.49.36 crore respectively as on July 20, 2020. Additionally the average utilization of fund based facilities for past 12 months stood at 41.88%. The company does not have any major debt funded capex plans over medium term.

Analytical approach: Standalone

About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
