Details of instruments/facilities in Annexure-1

### **Detailed Rationale & Key Rating Drivers**

The revision of ratings assigned to the bank facilities and instruments of Future Enterprises Limited (FEL) is on account of delay in servicing of its interest due on August 17, 2020 on its Non-convertible Debentures bearing ISIN INE623B07487 and INE623B07495. The default is primarily on account of poor liquidity position due to subsequent lockdowns in the wake of COVID19 outbreak. Consequently, the ratings for other facilities and instruments have also been revised and removed from credit watch.

The other issues raised by CARE in its press release dated July 31, 2020, viz. weakened credit profile of its key customer – Future Retail Limited (FRL), high promoter pledge and falling market capitalisation significantly impacting financial flexibility, dependence on group companies for revenue and high working capital cycle continue to constrain the ratings. FEL is also in discussion to monetise its investments in insurance business, to improve its liquidity position. The timeliness of monetisation remains key rating monitorable.

FEL has sought a moratorium on payments from its lenders as part of the COVID19 - Regulatory Package announced by the RBI on March 27, 2020. CARE has not recognised this instance as a Default as of now, as the same is permitted by the RBI as part of the relief measures. FEL had interest payment on NCD (INE623B07685 and INE623B07693) due on April 17, 2020 which was made April 22, 2020. As per the communication from the investor the company sought moratorium on NCD interest payment and the same was approved by the investor. The company also had a CP (ISIN INE623B14AW6) (Not rated by CARE) payment aggregating to Rs.100 crore due on April 27, 2020 but the same was delayed and made on April 28, 2020. As per the IPA the company had adequate funds in the account but transaction could not be executed due to delays in banking operations caused by COVID19. Non-recognition of default in the above cases is as per the guidance provided by the SEBI circular SEBI/HO/MIRSD/CRADT/CIR/P/2020/53 dated March 30, 2020.

The company has also sought for an extension in filing their Q4FY20/FY20 and Q1FY21 results to Aug 31, 2020 and Sep 15, 2020 respectively.

# **Key Rating Sensitivities**

#### **Positive Factors**

 Improvement in company's liquidity profile resulting from equity infusion/divestment of investments/improved credit profile of its key customer, FRL

## **Negative Factors**

- NCDs amounting to Rs.1,250 crore have accelerated prepayment clause in case of rating falling below 'AA-'.
   Exercising the option to recall bonds may result in severe liquidity issues.
- Delays in divestment of stake in subsidiaries/JVs/Associate companies and/or higher debt resulting in a leveraged capital structure over 1.00x (FY21)

Inability of the company to scale up new verticals of business leading to deterioration of Total Debt/PBILDT over
 3.25x

# Detailed description of the key rating drivers (As per PR dated July 31, 2020) Key Rating Weaknesses

Stretched financial flexibility; considerable promoters' stake pledged: The promoters FEL as of Mar 2018 had pledged 11.64 crore shares (56.56% of promoter stake). During the past year, the company's market capitalisation has declined significantly from Rs. 1,760 crore to Rs. 719 crore as on July 29, 2020. Falling market capitalisation coupled with rising debt has led to significant deterioration of debt to market-capitalisation from 3.73x as on March 31, 2018 to 3.86x as on March 31, 2019 to current level of ~8.55x.

However, in lieu of significant fall in share price, the promoters had to pledge additional shares taking the total to 87.40% of promoters' stake (as on Jun 30, 2020). Considerable reduction in market capitalisation and significant proportion of promoter's stake pledged hampers the company's flexibility to raise funds.

Significant dependence on group companies: FEL provides infrastructure support to group companies, logistical support through its subsidiary Future Supply Chain Solutions Limited and also designs, manufactures garments for in-house brands and engages in trading for various group companies. Sale of goods and services to its group companies has shown an increasing trend

FEL is reliant on FRL for a significant portion of its income (Rs. 3,838 crore in FY19). FEL's step-down subsidiary, Future Supply Chain Solutions Limited also provides warehousing and logistic requirements to FRL (FY19: Rs. 557.88 crore).

Going ahead, with the proposed acquisition of retail assets from FEL, lease rentals from FRL are expected to come down by Rs. 550-650 crore. However, apart from the infrastructure support, FEL will continue to provide other services to FRL.

Furthermore, FEL and FRL have also provided cross guarantees on behalf of each other for various borrowings to the tune of Rs. 5750 crore and Rs. 3583 crore respectively as on March 31, 2019. These guarantees between both the companies will eventually be withdrawn post the sale of assets and subsequent debt repayment.

High Working Capital Cycle: FEL has high gross working capital cycle of 176 days in FY19, which has deteriorated from 157 days in FY18. The reason for high operating cycle is on account of high inventory days. The company buys on behalf of group companies and goods are kept at various retail outlets across the country thereby leading to high inventory period of 16-18 weeks. The company receives payment after 6-7 weeks from sale of goods. Increase in inventory days and growth in operations led to an increase in company's fund based average working capital utilisation (including CP) for the past 12 months ending Feb 2020 to 71% as against 63% during the same period last year.

Intensifying competition in retail industry: Heightened competition from both brick and mortar and online players could impact overall SSSG of FEL's customers. Competition from e-commerce players, remains a key threat. Also, change in FDI norms can lead to further competition. Currently, the government has allowed FDI in food processing sector. Apart from this, the government is also contemplating liberalising rules relating to multi-brand retail. This will open up foreign investments which may pose a threat to existing retail players.

# **Key Rating Strengths**

**Experienced Promoters & Management:** The promoters of FEL have been closely involved in the management of business and in defining & monitoring the business strategy for the company. Mr. Kishore Biyani, the founder and Group CEO of the Future group, is widely recognised as a pioneer of modern retail in India. Furthermore the promoters are supported by a strong management team having significant experience in retail industry.

The company hold stake in various other future group companies with main being in Future Supply Chain Solutions Limited and insurance JV with Future Generali. The company is looking to divest its holdings in various group companies in order to reduce debt.

Sale of assets to improve capital structure; albeit reduction in rental income: Sale of lease assets to FRL at a fair value of Rs. 3,952 crore and subsequent debt repayment will help the company to improve its capital structure. The company's debt level has already come down from Rs. 6,730 crore (excl. acceptances on LC) as on Dec 31, 2019 to Rs. 5,681 crore as on Feb 29, 2020. However, post the outbreak of COVID19, the company hasn't prepaid the balance debt which has led to leverage remaining high. Furthermore, reduced cash flows and significant dependence on banks for working capital requirements will keep the capital structure under pressure. The company has plans to divest stake in its insurance business as well as logistic business which will lead to further improvement in capital structure upon materialisation.

Consequently, with the sale of assets to FRL, FEL lease rental income from FRL is expected to significantly decline by Rs. 550-650 crore p.a.

The ability of the company to successfully improve capital structure remains critical from credit perspective.

**New verticals to drive growth:** FEL is almost fully dependent on group companies to drive its growth. The company received 92% of total sales from group companies. Post the sale of assets to FRL, FEL's income is expected to decline by Rs. 550-650 crore and subsequently PBILDT and PBILDT margins are also expected to shrink.

Going ahead, even as group companies continue to remain depended on FEL for their designing, manufacturing and trading requirements, the latter is looking to develop incumbent business and reduce dependence on group companies. The company is looking leverage on data collected through its 'Future Pay' app which has over 16mn members. It will also provide a market place to group companies such as FRL and Future Lifestyle Fashions. FEL is also looking to offer financial services & payments solutions through the app.

The ability of the company to scale the businesses and achieve envisaged results within stipulated timelines remain critical for company's credit profile.

## **Industry Outlook**

In view of the COVID19 outbreak and lowering of the discretionary spending by the consumers in these times of economic downturn, the outlook for the Indian players in retail sector is 'Negative' in the short to medium term. The impact on demand, which is expected to remain muted at least for the next three or four quarters, will be more in case of players with presence in non-essential items and luxury segments. However, the expected support from the government in terms of financial stimulus packages and wage support subsidy as well as rental waivers from the mall-owners which would help the retailers to bring down their fixed costs, will reduce the impact on their credit profile to an extent. The retailers with presence in essential commodities continue to have some cash flows to support their fixed costs.

After the control of the spread of the coronavirus and post the lock-down period, the spending as well as shopping patterns of the consumers are expected to change significantly. The consumers are likely to curtail their discretionary spending with reduced income in their hands as well as tendency to preserve cash. Also, more preference is likely towards online channels in order to avoid crowded spaces. In such times, the retailers with presence across the retail segments (grocery, apparel, appliances, accessories) as well as who have an omni-channel strategy with presence in both offline and online channels are expected to have a quicker recovery.

### **Liquidity Position: Poor**

The company's liquidity profile has been severely impacted on account of lockdown measures and weakened credit profile of its key customer, FRL. The company has applied to the lenders for moratorium as per RBI package. The company has also applied to the bankers for enhancement in working capital limits, release of peak limits, interchangeability of limits and COVID19 lines, the same are under different stages of approval. The timely release of additional working capital limits continue to remain critical for meeting the short term repayment obligations. The company is also looking at monetising its investments in insurance and supply chain business which would improve the liquidity, however, the same has been delayed.

#### **About CARE Ratings:**

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

#### Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
