*Details of instruments/facilities in Annexure-1*
**Detailed Rationale & Key Rating Drivers**

The ratings assigned to the bank facilities of Gufic Biosciences Limited (GBL) continue to be under 'credit watch with developing implications' on account of proposed amalgamation of Gufic Lifesciences Pvt. Ltd. with GBL and the possible impact of the same on the credit profile of GBL. The company has applied to National Company Law Tribunal (NCLT) for approval for the amalgamation process. CARE will take a final view on the rating once the exact implications of the above development on the business and overall credit profile of the GBL are clear.

The ratings continue to draw comfort from growth in revenues and sustained profit margins at healthy levels during FY19 (refer to the period from April 01 to March 31) as well as comfortable debt coverage indicators. The ratings continue to factor vast experience of the promoters, diversified product portfolio of the company, reputed client base and accredited manufacturing facility.

The above rating strengths are however constrained by moderate capital structure, elongation in operating cycle leading to higher working capital utilization of fund based limits thereby impacting liquidity position, moderate scale of operations, as well as susceptibility of revenues and profitability to the regulatory risk, fluctuation in raw material prices and exchange rates.

<sup>1</sup>Complete definitions of the ratings assigned are available at [www.careratings.com](http://www.careratings.com) and in other CARE publications.

**Rating sensitivities:****Positive factors**

- Increase in PBILDT margins above 16% on a sustained basis
- Improvement in operating cycle below 90 days on a sustained basis

**Negative factors**

- Increase in overall gearing (including LC acceptances) above 2 times on sustained basis
- Deterioration in operating cycle beyond 130 days leading to consistent increase in working capital utilization thereby resulting in stretched liquidity

**Detailed description of the key rating drivers****Key Rating Strengths*****Vast experience of the promoters in the pharmaceutical industry***

The promoters of the company have been in the pharmaceutical industry since 1960, through incorporation of Gufic Pharma Private Limited (GPPL). Gufic group is in the business of manufacturing and marketing injectable products since late 1970s. The promoters are supported by qualified professionals heading various verticals with adequate and relevant experience in their respective fields.

***Accredited manufacturing facility***

GBL, part of Gufic group, manufactures APIs and formulations at its Navsari facility. The facility is a WHO GMP certified injectable manufacturing unit, catering to general and hormonal products for the Indian domestic and semi regulated markets internationally. GBL currently has nine Lyophilizers catering to total capacity of 19.2 million vials per annum and caters to various therapeutic segments. Besides, the total installed capacity for Gufic group post amalgamation will increase to 37.2 million vials per annum.

***Diversified product portfolio***

The product portfolio of the company is well diversified, marked by its presence in key therapeutic segments (bulk drugs/API division) such as anti-fungal, anti-bacterial, anti-infective, anti-inflammatory, and anesthetic products. GBL's lyophilizatoin product includes antibiotic, antifungal, cardiac, infertility, antiviral, and proton pump inhibitor. The company added 20 more products in bulk drugs division during FY19 and FY20.

The company's product portfolio can be divided mainly into two segments i.e. pharma (88% of total revenues) and bulk drugs (12% of total revenues). Pharma segment includes manufacturing and trading of tablets, capsules, ointment, syrup/suspension powder, injection and lotion etc.

***Growth in revenues coupled with sustained profit margins***

The company expanded its product portfolio by introducing around 20 new products during FY19 and FY20 in the market. Increased focus on branded products export resulted in 13.66% growth in total operating income during FY19. Increase in sales through exports during FY19 is attributed to increase in export share from Myanmar and Sri Lanka followed by South East Asia.

The company reported PBILDT margin of 14.17% in 9MFY20 compared to 13.21% in 9MFY19. The company's PBILDT margin had slightly improved to 13.77% in FY19 from 13.19% in FY18; the PAT margin also stood moderate at 6.16% in FY19.

PBILDT margins have remained in the range of 13-14% during FY19 and FY18 in spite of improvement in scale of operations mainly on account of increase in regulatory expenses, R&D and employee costs. The company is focusing on new product development in infertility, gynecology, and orthopedic segment that are more profitable leading to increase in the said costs.

***Comfortable debt coverage indicators***

The debt coverage indicators continued to remain robust as reflected by PBILDT interest coverage ratio at 4.83 times in FY19. However, total debt to gross cash accruals deteriorated slightly from 4.52 times in FY18 to 4.88 times in FY19.

PBILDT interest coverage ratio stood at 4.11 times in 9MFY20 compared to 5.09 times in 9MFY20. This is mainly due to increase in interest costs owing to debt funded capex.

**Key Rating Weaknesses*****Moderate scale of operations***

GBL's total operating income has improved by 13.66% in FY19. However, the scale of operations continues to remain moderate with total operating income of Rs.353.45 crore in FY19 and tangible net worth of Rs.74.98 crore as on March 31, 2019.

Moderate scale of operations limits company's ability to undertake high value orders thereby limiting the benefits of economies of scale.

#### ***Moderate capital structure***

Ploughing back of profits over past two years led to increase in tangible net worth of GBL. However, the capital structure of the company continues to remain moderate as seen from overall gearing at 1.84 times as on March 31, 2019 compared to 1.86 times as on March 31, 2018. The company availed term loan amounting Rs.2.57 crore during FY19 to fund capex. The company commenced capex for increasing installed capacity of lyophilizatoin and anti-fungal products during FY19.

#### ***Increase in working capital cycle***

Lower than expected demand offtake in March, 2019 in domestic market, resulted in increase in inventory of finished goods leading to increase in average inventory holding period from 112 days as on March 31, 2018 to 116 days as on March 31, 2019. Moreover, average collection period increased from 78 days as on March 31, 2018 to 95 days as on March 31, 2019. This led to increase in average operating cycle from 109 days as on March 31, 2018 to 120 days as on March 31, 2019. Also, the company is focusing on increasing its presence in overseas markets where the credit period ranges between 90-120 days. This has led to increase in receivables during FY19 and FY20. The same is funded through internal accruals and working capital limits.

#### ***Highly regulated industry***

The pharmaceutical industry is among the most regulated across the world and needs regular approvals from relevant drug authorities across countries. The time for obtaining approvals is significant and regulations governing the industry change from region to region. Hence, the company is required to comply with various laws, rules and regulations and operate under strict regulatory environment in India and abroad considering the nature of business. The same includes sterner drug quality norms in various global market places, and price controls in India through introduction of New Drug Price Control Order in May 2013. Thus, regulatory risks have emerged as a significant risk factor affecting the financial and credit risk profile of pharmaceutical companies and can have a serious consequence on the operations, in case, of any infringement of any law.

#### ***Susceptibility of margins to any adverse movement in raw material prices***

GBL procures majority of raw materials from domestic market and partly through imports (around 40% of total purchases). Although raw material prices remained stable in the past few years, the profitability margins are susceptible to any adverse fluctuation in raw material prices. However, the company's well-established relationships with its suppliers mitigate risk to certain extent.

#### ***Liquidity Position: Adequate***

GBL's liquidity position remained adequate on account of sufficient cash accruals. The company has repayment obligations of only Rs.0.76 crore in FY21. The company's gross cash accruals are sufficient to meet the long term repayment obligations over medium term.

The average utilization of fund based working capital limits for past 12 months stood high at 92.44%. However, the company has free cash and cash equivalents amounting Rs.4.52 crore as on March 31, 2020 which provides additional liquidity cushion.

**Analytical approach:** Standalone

**About CARE Ratings:**

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

**Disclaimer**

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
