

JSW Energy Limited

July 01, 2020

Ratings

Facilities	Amount (Rs. crore)	Rating ¹	Rating Action
Long-term bank limits	2,371.18 (reduced from 3,582.49)	CARE AA-; Stable [Double A Minus; Stable]	Revised, removed from Credit watch
Short-term bank limits	2,992.00 (reduced from 3,997.00)	CARE A1+; [A One Plus]	Revised, removed from Credit watch
Total facilities	5,363.18 (Rs. Five Thousand Three hundred and Sixty Three crore and eighteen lakhs only)		
Non-Convertible Debentures Issues	1,400 (reduced 1,500.00)	CARE AA-; Stable [Double A Minus; Stable]	Revised, removed from Credit watch
Commercial Paper Issue	700.00	CARE A1+; [A One Plus]	Revised, removed from Credit watch

CARE removes Credit watch with Negative Implication assigned to long and short term bank facilities and instruments of JEL on account of management of company apprising CARE about low visibility of the completion of GMR Kamalanga Energy Ltd. (having total consideration of Rs. 5,321 crore) acquisition amidst current business economic environment.

Detailed Rationale & Key Rating Drivers

The ratings of bank facilities & instruments of JSW Energy Limited (JEL) continues to derive strength from well established and highly experienced promoter group having rich experience power industry, long-term firm offtake arrangement of major operational capacity providing favourable medium to long-term revenue visibility, favourable debt coverage indicators and financial risk profile.

However, the rating strengths continue to be partially offset by volatility associated with fuel cost & foreign exchange rate and counter party risk.

Rating Sensitivities

Positive rating sensitivities

- Improvement in the financial risk profile with overall gearing ratio at 0.50 times on sustained manner.

Negative rating sensitivities

- Any major capital expenditure/large debt funded acquisition resulting in moderation in the financial risk profile with Total Debt to PBILDT at 4.00 times on sustained manner
- Any increase in receivable days beyond 120 days on sustained manner

Detailed description of the key rating drivers

Key Rating Strengths

Well established and highly experienced promoter group having rich experience power industry

Incorporated in 1994, JEL is the holding company for JSW group's power business. As of March 31, 2020 JSW group's consolidated operational capacity stood at 4.5 GW. In addition, JEL has set up (through a subsidiary) 165 km transmission line for transmission of power generated at Ratnagiri region and is engaged in power trading through its subsidiary.

JEL has qualified, professional and experienced management team with significant experience in the power sector. The company also provides operation & maintenance services for power plants of the group companies and project management services for the power plants being set up by the group. JEL has successfully set up and is operating 860 MW thermal power plant at Vijaynagar, Karnataka, and a 1,200MW imported coal based plant at Ratnagiri, Maharashtra. The company, through JSW Energy (Barmer) Limited (subsidiary of JEL) owns and operates a 1,080 MW lignite based power plant in Barmer, Rajasthan. JEL has presence in renewable segment through operations of hydro project in Himachal Pradesh of capacity of 1,300 MW and 10 MW solar capacities across various locations.

In addition, the intra-state power transmission project, a 74:26 joint venture with MSETCL (through a subsidiary, Jaigad Power Transco Ltd. The project consists of 400 kV double circuit Jaigad – New Koyna (55 km) and Jaigad – Karad (110 km) lines for transmission of power generated at Ratnagiri plant (Maharashtra).

¹Complete definition of the ratings assigned are available at www.careratings.com and other CARE publications

The company is also into mining business through its associate Barmer Lignite Mining Co. Ltd, (a 49:51 joint venture between JSW Energy (Barmer) Limited (JEBL) and Rajasthan State Mines and Minerals Ltd (RSMML)), commenced lignite mining from Kapurdi and Jalipa blocks in Rajasthan. BLMCL is a captive mine company for providing fuel to JEBL power plant at Barmer.

Long-term firm offtake arrangement of major operational capacity providing favourable medium to long-term revenue visibility

JEL has historically operated its power plants and sold power through a combination of long/medium-term PPAs as well as on merchant basis. As on June, 2020, JEL had long term PPAs for about 81% capacity while the balance is being sold on short term/merchant basis. Out of the total capacity under long term PPA around 98% is under take or pay agreement ensuring pass-through of fuel cost and fixed charges & balance capacity is on fixed charges.

The presence of a combination of long-term and short-term off-take arrangements provides JEL with some revenue visibility as well as opportunity to benefit from merchant tariffs, as and when they are attractive.

The O&M expenses of the company reduced to Rs. 17.90 lakh/MW in FY20 as compared to Rs. 18.70 lakh/MW in FY19 due to adoption of re-engineering processes, optimization of work contracts and implementing best industry practices for equipment maintenance across plant locations resulting in lower store & spare consumptions.

PAF of Ratnagiri stood around 96% in FY20. PLF in FY20 marginally dipped to 75% as compared to 76% in FY19. However, in the first week of April, 2020 the PLF dipped to 55% due to lower offtake from group captive customers

Further, the PLF dipped to 40% in FY20 as compared to 51% in FY19 at company's Vijayanagar plant due lower power offtake from group captive customers.

Going forward ability of the company to maintain envisaged operational parameters amidst tepid domestic power sector remains key rating sensitivity.

Favourable debt coverage indicators and financial risk profile

Overall gearing ratio improved from 1.01 times as on March 31, 2019 to 0.93 times as on March 31, 2020 on account of reduction of debt. Total Debt to GCA of the company improved from 6.34 times in FY19 to 4.95 times in FY20 on account of higher gross cash accruals. Interest coverage ratio of the company improved to 3.11 times in FY20 as compared to 2.73 times in FY19 on account of lower interest & finance charges.

JEL expects to revive its Kutehr hydro project of capacity of 240 MW. The company has incurred around Rs. 300 crore as on date on the project. The company is in talks with Discoms for power off-take from project; post finalisation of offtake arrangement the project work will restart.

Going forward any major capital expenditure/large debt funded capital acquisition impacting overall financial risk profile of the company remains key rating sensitivity.

Key Rating Weaknesses

Volatility associated with fuel cost and foreign exchange rate

JEL's power plant operations depend on imported coal (mainly from Indonesia and South Africa) for its Vijayanagar & Ratnagiri plants. Since most of the fuel procurement is linked to spot prices the profitability of the company is exposed to the volatility in international coal prices to the extent of open capacity. JEL varies the mix of Indonesian and South African coal to optimize the fuel cost.

With the fuel cost being passes through in long term PPAs, the company's PBILDT margins are to a large extent isolated from fuel risk.

Volatility in foreign currency affects the profitability of the company to the extent of open capacity. In order to reduce the impact of rising imported coal prices, the company has secured approval from Ministry of Environment and Forests to blend domestic coal with imported coal upto 50% at Vijayanagar & Ratnagiri.

Counter party risk

JEL through its subsidiaries/associates has power off-take arrangement on long-term and short-term basis with Discoms in Rajasthan, Maharastra, Himachal Pradesh, Punjab, Haryana, Uttar Pradesh and JSW group companies. As a result the company's revenue visibility is exposed to the vagaries of financial risk profile of these entities. The receivables value at consolidated level increased from Rs. 1,427.75 crore as on March 31, 2019 to Rs. 2,103.20 crore as on March 31, 2020 on account of delay in receipts from Rajasthan & Uttar Pradesh Discoms. Average collection days of the company stood 77 days as on March 31, 2020. -. The company receives delayed payment charges.

Liquidity analysis:

Liquidity: Superior

JEL at consolidated level has free cash and cash equivalent of Rs. 960 crore coupled with unutilized fund based working capital limits of Rs. 792 crore as on June 25, 2020 provides a liquidity support to a large extent towards annual principal repayment of Rs. 1559.74 crore in FY21.

With overall gearing of 0.93 times as on March 31, 2020, JEL has sufficient gearing headroom to raise additional debt for its capex. Average collection days of the company increased from 51 days as on March 31, 2019 to 77 days as on March 31, 2020. Further, the operating cycle of the company continues to be negative as on March 31, 2020.

Analytical approach: Consolidated

About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating. Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
