<b>Total</b>	<b>325.73</b> <b>(Rs. Three hundred twenty five crore and seventy three lakh only)</b>		

*Details of instruments/facilities in Annexure-1*

### Detailed Rationale & Key Rating Drivers

The reaffirmation of the ratings of the bank facilities of JPFL factors in the strength of the promoter group having a long track record of operations, JPFL's established market position in the Indian packaging film industry, an improving operating performance evidenced by higher capacity utilization and improved average realization, a comfortable financial profile characterized by a healthy capital structure (albeit weaker in FY19), above-average debt coverage indicators and an adequate liquidity position.

These rating strengths are, however, partially offset by considerable debt-funded capacity addition and stiff competition in the industry on account of demand-supply disparity, which continues to be a key risk due to commoditized nature of the product. Moreover, JPFL's margin remains susceptible to the volatility in raw material prices.

#### Rating Sensitivities

##### *Positive factors:*

- High capacity utilization and average realization across segments on sustained basis, leading to strong PBILDT margin of 18%
- Timely implementation of expansion within estimated cost
- Significant improvement in leverage on sustained basis (i.e below 0.5x)

##### *Negative factors:*

- Inability to ramp up capacity utilization in brownfield projects, leading to lower cash accruals
- Cost or time over-run in the ongoing expansions
- Aggressive debt-funded capex/ acquisitions leading to further moderation in overall gearing beyond 1.0x

### Detailed description of the key rating drivers

#### **Key Rating Strengths**

##### ***Strong promoter group with established market position***

JPFL is the flagship company of the B.C Jindal Group and has business vintage of over three decades. It is a global flexible packaging solutions provider with manufacturing operations in India, Europe and US with sales footprint in over 40 countries. It commands leadership position in biaxially oriented polypropylene (BOPP), biaxially oriented polyester (BOPET) and non-woven segments, and has sizable presence in the metallized film segment as well. JPFL's BOPET business is backward-integrated with a 320,400 tonnes per annum (tpa) polyester chips plant, while the availability of an extrusion coating line provides for forward integration.

##### ***Improved operational performance***

JPFL has witnessed increase in effective capacity utilization in BOPP, BOPET and metallized film segments in FY19. The company has been able to quickly ramp up the output from the newly commissioned 6<sup>th</sup> line of BOPET, leading to strong utilization in this segment in H1FY20 itself. JPFL had witnessed favourable increase in average sales realization in almost all the segments (both in domestic as well as export) in FY19, particularly in BOPET. In terms of volume, domestic sales and metallized film export has witness considerable growth. The non-woven division had consistently clocked significant increase in capacity utilization over the year (more than 95% in FY19). JPFL is expected to commission its second non-woven line to meet the increasing demand in this segment.

##### ***Improvement in profitability and comfortable gearing and coverage metrics***

JPFL registered higher PBILDT margin in FY19, driven by lower overheads and better realizations. Its gross cash accruals (GCA) and cash flow from operations improved due to better profitability. As exhibited in nine-month results, the company's PBILDT

<sup>1</sup>Complete definition of the ratings assigned are available at [www.careratings.com](http://www.careratings.com) and other CARE publications

margin and GCA has remained strong in the current year as well. Going forward, ROCE is expected to improve on account of better margins. However, its overall gearing increased to 0.84x as on March 31, 2019, as against 0.60x a year back, on account of ongoing capex activities and decline in net worth due to the write-off of its thermal plant investment. JPFL's overall gearing is expected to peak out as on March 31, 2020 and persist at the elevated level in the near term.

**Liquidity: Adequate**

JPFL has sufficient cushion in accruals and cash balance/ mutual fund investments (Rs. 435 cr as on March 31, 2019) to take care of its repayment obligations and growth capex commitments. Its capex requirements are modular across segments and are expected to be funded largely through debt. Utilization of fund based bank limits is 45% in trailing 12 months ended Dec'19. This is supported by a healthy current ratio (1.67x as on March 31, 2019), strong cash flow from operations (Rs. 397 cr in FY19) and a short net operating cycle (averaging less than 40 days in last three years).

**Key Rating Weaknesses****Debt funded capex**

JPFL has been focused on increasing its capacity to gain economies of scale. The ongoing brownfield expansion in BOPP, cast polypropylene (CPP) and non-wovens (having a combined planned outlay of Rs. 750 cr) are running as per schedule. The board of JPFL has also approved a capex plan of Rs. 700 cr for the 9<sup>th</sup> line of BOPP and polyester recently, which would add to the project execution risk. The successful implementation of these projects without any significant cost/ time overrun, besides increasing revenue from the projects as envisaged, shall remain a key credit perspective.

**Overcapacity in India and stiff competition**

The packaging film industry has witnessed cyclicity in the past with significant fluctuation in profitability of the incumbent players. India's BOPET and BOPP production capacity is more than the domestic demand (due to slow demand pickup in comparison to significant capacity build-up) which has led to stiff competition. The Indian manufacturers also have to compete with its Asian counterparts, in order to be cost-competitive not only for export but also for domestic demand.

**Profitability linked to raw material price fluctuation**

JPFL's major raw materials are derivatives of crude oil; consequently, the finished goods' prices fluctuate with crude oil prices. Furthermore, one of the key raw materials for the metallized segment is aluminium, which has witnessed volatility in the recent past. Material cost makes up ~70% of the final packaging film. Hence, ability of the manufacturer to pass on raw material price increase is critical.

**Analytical approach:** Standalone. The management has cited limited linkages between the foreign and domestic subsidiaries/ associates of JPFL. Subsequent to the company writing off the investment in Jindal India Powertech Ltd in FY19, there is no significant investment or support to its group companies.

**About the Company**

JPFL was incorporated in 1974 and started production of polyester yarn in 1985 at Bulandshar. The company started manufacturing polyester chips for captive use in 1993. In 1996, JPFL diversified into manufacturing of bi-axially oriented polyethylene terephthalate (BOPET) film. JPFL commenced production of bi-axially oriented polypropylene (BOPP) film and metallized film and acquired Rexor SAS, France to enter into metallized film segment in 2003. The company stopped production of polyester yarn in 2006 and made packaging films its core business. After acquiring the BOPP film division of Exxon Mobil in October 2013 through its subsidiary JPF Netherland BV, JPFL became one of the world's largest producers of BOPP and currently supplies to several global players in the FMCG sector. JPFL is an ISO 9001:2008 certified company, with a network of distributors in more than 40 countries.

Brief Financials (Rs. crore)	FY18 (A)	FY19 (A)

### About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

### Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
