*Details of instruments/facilities in Annexure-1*

### Detailed Rationale & Key Rating Drivers

The ratings assigned to the bank facilities and fixed deposits of Jocil Limited derive comfort from improved operational and financial performance of the company in FY20 (FY refers to the time period between April 01- March 31) as well as in H1FY21 along with strong liquidity profile. The ratings continue to remain underpinned by experienced promoters with long established track record of operations, healthy capital structure, comfortable debt coverage indicators, reputed clientele and benefits derived from captive power plants. The rating strengths are however partially offset by, low profitability margins albeit improved in FY20, elongated operating cycle, client concentration risk, volatile raw material prices and fragmented industry with intense competition.

#### **Outlook: Positive**

Positive outlook on the rating reflects improvement in the overall financial performance of Jocil during FY20 and H1FY21. With change in the product mix and favorable industry growth prospects, CARE expects profitability margins of the company to strengthen further, in the coming quarters.

#### **Rating Sensitivities**

##### **Positive Factors**

- ✓ Improvement in scale of operation with TOI increasing beyond Rs 600 crore while maintaining a steady PBILDT margin of 8% or above on a sustained basis.
- ✓ Operating cycle improving to less than two months, going forward on a sustained basis.

##### **Negative Factors**

- ✗ Any unprecedented increase in the debt levels resulting in overall gearing deteriorating over 1x, in future.
- ✗ Elongation in the operating cycle more than 120 days, going forward.

### Detailed description of the key rating drivers

#### **Key Rating Strengths**

##### **Improved operational and financial performance in FY20 and H1FY21:**

The financial performance of the company witnessed significant improvement in FY20 with a threefold increase in operating profits and four times increase in the PAT levels over previous year. The total operating income (TOI) also remained steady by registering a y-o-y growth of 12% in FY20 driven by healthy demand for soap noodles and improved realisations. Volume of soap products sold improved considerably from 20579 MT in FY19 to 35224 MT in FY20 with a growth rate of 71.17% at the back of increased orders from existing customers. During H1FY21, Jocil booked a TOI of Rs 296.91 crore and PBILDT of Rs 14.91 crore.

##### **Experienced promoter group and established track record:**

The company has more than four decades of experience in manufacturing stearic acid flakes, fatty acids, toilet soap, soap noodles and refined glycerine. Jocil belongs to a strong promoter group. Jocil is a subsidiary of The Andhra Sugars Limited (TASL) (holding 55.02% stake) which has an established business operations based in South India. Managing Director of Jocil, Mr. J. Murali Mohan has more than four decades of experience in the industry, the other directors of the company are also experienced and well qualified. The day to day operations of Jocil are supported by an experienced and professional team down the line.

<sup>1</sup>Complete definition of the ratings assigned are available at [www.careratings.com](http://www.careratings.com) and other CARE publications

**Healthy leverage and coverage metrics:**

Capital structure of Jocil continues to remain strong with an overall gearing of 0.05x as on March 31, 2020 (PY: 0.05x) driven by healthy net worth and absence of any major bank debt. The debt coverage indicators marked by Interest coverage ratio increased from 5.95x in FY19 to 23.96x in FY20 and total debt/GCA improved from 1.06x as on March 31, 2019 to 0.45x as on March 31, 2020 at the back of improved GCA.

**Better future prospects backed by reputed client base:**

With more than four decades of existence in the industry, Jocil has established itself as one of the major manufacturers of fatty acids and soap products. The company has been doing business with reputed FMCG clients and has been successfully bagging high volume orders every year. Few of the major clients of the company include, Hindustan Unilever Limited, ITC Limited, MRF Limited and Gold Stab Organics Private Limited, amongst others.

**Benefits from captive power plant:**

The company has a 6 MW biomass cogeneration captive power plant located within the factory premises at Dokiparru Village, Guntur to cater to its power requirements. Further, Jocil has four Wind Energy Generators (WEG), aggregating to 6.30 MW, located in the state of Tamil Nadu. Jocil has an existing long term power purchase agreement (valid through 2026) with TANGEDCO (Tamil Nadu Generation and Distribution Corporation Limited) at an average tariff of Rs.2.85/unit. The revenue from the sale of power amounted to Rs 11.60 crore in FY20 which provided an additional income to Jocil.

**Key Rating Weakness****Moderate profitability margins:**

The profitability margin of the company although improved during FY20 continues to remain low with a PBILDT margin of around 5% and a PAT margin of 2%. Because of low value addition, intense competition and fluctuating raw material prices, the profitability margins of the company come under pressure. Also, Jocil being a moderate-sized company supplying to major FMCG companies in India, has limited bargaining power. Nevertheless, the company has been strategically changing its product mix by increasing sales of soap noodle which is a better margin product as compared to fatty acid.

**Volatile raw material prices:**

Palm Stearin and Palm Fatty Acid Distillate (PFAD) are the major raw materials for manufacture of fatty acids and soaps. The raw materials used by Jocil are imported from Malaysia and Indonesia. Raw material prices usually fluctuate depending on the demand supply scenario and changes in the policy framework/custom structure by the exporting nations.

**Elongated Operating cycle:**

The working capital cycle of the company continues to remain elongated which further stretched to 93 days in FY20 from 89 days in FY19. There was a marginal increase in the inventory and receivable period. Company maintains sufficient stock of raw material as the prices and availability has a tendency to fluctuate. Collection period increased from 48 days as on March 31, 2019 to 56 days as on March 31, 2020. As per industry norms, the company has to provide around a month of credit period to all its clients while it has to make immediate payments to its creditors. Moreover, receivables from TANGEDCO also takes considerable amount of time to recover. This results in stretched operating cycle. Nevertheless, the company's reliance on working capital bank limits has been minimal and short term working capital requirements are efficiently managed by its positive operating cash flows.

**Client concentration risk**

Jocil is exposed to client concentration risk as the top ten customers contributed more than 95% of the TOI in FY20 (86% in FY19). Moreover, revenue from one single client was close to 55% of TOI in FY20. Although the clientele of Jocil comprises all marquee customers any change in the procurement policy or strategy of any of these top clients may impact Jocil's operational performance. Nevertheless, Jocil has been trying to expand its customer base and has recently added several more names to its clientele.

**Industry Outlook and impact of COVID:**

Jocil is engaged in manufacturing of Stearic Acid, Fatty Acids, Refined Glycerin, Soap Noodles, and Toilet Soap etc. Non edible vegetable oils and fatty acid distillates, both indigenous and imported, are used as raw materials for the manufacture of the finished products. India is short of both edible and non-edible vegetable oils. However, in India, refineries with huge capacities have been setup for processing Crude Vegetable Oils like Palm Oil mainly imported from Malaysia and Indonesia. The Malaysian and Indonesian Governments impose export duty varying from time to time on crude oil to encourage value addition within their country prior to exports. This turns out as additional cost to consumers in India.

The products of Jocil are covered under "essential commodities list for containment of COVID-19" and were under general exempted category list from lockdown. Operations were being carried out normally to meet the public demand for soaps during lockdown situation. The demand for glycerin, one of the by-product generated from production of Fatty Acids, improved

recently due to its usage in sanitizers and soaps. For containment of COVID-19, sanitizers and soaps are frequently used by consumers. Hence, demand for soap noodles and soap is also be expected to increase during the forthcoming period.

#### Liquidity: Strong

The liquidity profile of the company is strong marked by healthy gross cash accruals of Rs 18.50 crore vis-à-vis no repayment obligation. The average utilization of working capital limits for past twelve months ended August, 2020 also remained low at 8.29% thereby providing the company with sufficient headroom. There are no debt funded capex envisaged in near to medium term. Further, the company had an unencumbered cash and bank balance of around Rs 21 crore as on March 31, 2020. The company has not availed moratorium for any of its bank facilities.

**Analytical approach:** Standalone

### About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

### Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating. Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
