Ratings

Facilities	Amount (Rs. crore)	Rating ¹	Rating Action
Long Term Bank Facilities	407.35 (Reduced from 408.00)	CARE A-; Stable (Single A Minus; Outlook: Stable)	Reaffirmed
Total Facilities	407.35 (Rs. Four Hundred Seven Crore and Thirty-Five Lakhs Only)		

Details of instruments/facilities in Annexure-1

Detailed Rationale & Key Rating Drivers

The reaffirmation of ratings assigned to the of bank facilities of Khalghat Sendhwa Tollways Private Limited (KSTPL) continue to derive strength from the experience of the promoters in road projects globally and continued support from the sponsor i.e. Uniquet Infra Ventures Private Limited (UIPL rated CARE AA-; Stable) and UEM Group Berhad (promoter of UIPL and a wholly owned subsidiary of Khazanah Nasional Berhad- a Malaysian Sovereign Wealth Fund) in the form of bank guarantees (BGs) for debt service reserve account (DSRA) and major maintenance reserve account (MMRA). The ratings also factor in the strategic location of the stretch and long operational track record of more than 9.5 years.

The rating is, however, constrained by the decline in the toll income during the FY19 and FY20 leading to moderate debt coverage indicators, inherent revenue risks associated with the toll-based projects, Operation and Maintenance (O&M) risk due to absence of any fixed price O&M contract and significant dependence on commercial vehicle traffic leading to higher susceptibility of revenues to the economic downturns.

Rating Sensitivities

Positive Factors

- Growth in toll revenues by 10%-15% on a sustained basis.

Negative Factors

- Decline in toll revenue leading to fall in DSCR levels below the envisaged levels
- Deterioration in credit profile of sponsor
- Non adherence to the covenants as per Bank Facility Agreement

Detailed description of the key rating drivers

Key Rating Strengths

Experienced promoters with strong sponsor support: KSTPL is a wholly owned subsidiary of UIPL. UIPL is a joint venture of UEM Group Berhad (a 100% subsidiary of Khazanah Nasional Berhad) through its subsidiary and IDFC Ltd to develop road projects in India. Khazanah is a strategic investment arm of Government of Malaysia to explore strategic investment opportunities in new markets. UEM is one of the largest engineering based infrastructure and services conglomerate in Malaysia, operating for almost three decades. It has extensive experience in infrastructure segment and also has several assets under management including expressways, township & property, construction and facility management across Asia, Australia, New Zealand, Canada and the Middle East. UEM Group Berhad has provided BGs for DSRA and MMRA, which are expected to be renewed annually as per requirements envisaged in the sanction terms. Further, comfort is drawn from demonstrated track record of the sponsor- UIPL and UEM Group Berhad to support their SPVs in India.

Strategic location of the project: The project stretch is part of NH-3 from Km 84.70 near Khalghat in Madhya Pradesh (MP) to Km 167.50 Barwani district (near the MP/ Maharashtra (MH) border). The NH-3 originates at Mumbai and traverses a distance of 1,161 Kms through the states of Maharashtra, Madhya Pradesh, Rajasthan, and Uttar Pradesh and ends at Agra. The project stretch has a good catchment of industrial units like auto ancillary, cotton, agro based etc. Further, completion of four laning of the adjoining stretch on NH3 is expected to benefit the project with the influx of traffic.

¹Complete definitions of the ratings assigned are available at www.careratings.com and in other CARE publications.

Key Rating Weaknesses

Decline in toll collection levels: The project stretch is operational for more than 9.5 years. However, there has been moderation in toll collection during last three years with average daily toll collections declining from Rs.31.61 lakh in FY18 to Rs.31.55 lakh in FY19 and further at Rs.30.66 lakh during the FY20. Commercial traffic constitutes around 80% of the total traffic movement on the project highway. The Gazette Notification in Sep 2018 with respect to change in the method of levying overloading penalty by the company as well as Central Government's order to increase the load carrying capacity of heavy vehicles adversely impacted the toll revenues of the company.

The Company has achieved toll collection of Rs.110.79 crore during FY20 as compared to toll collection of Rs.115.15 crore during FY19. The deviation in toll collections is primarily on account of lower movement of commercial vehicles on the project highway owing to slowdown of economic activity in Q4FY20, which was further impacted owing to Covid-19 pandemic. Steps taken to contain the spread virus resulted in nationwide lockdown, which also led to suspension of Toll as per the directions of Ministry of Road, Transport and Highway (MoRTH) vide notification dated March 25, 2020 amidst Covid-19 situation. With easing of inter-state and intrastate movement of trucks with effect from April 20 following revised directives issued by MoRTH on April 17, 2020, tolling operations started across all NHAs, including for the project stretch. The company's toll revenue has declined by 19% during H1FY21 as compared to corresponding period during last year. The traffic on the project stretch, however, has gradually picked up post easing of lockdown, with revenues reaching pre-Covid level from August 2020 onwards.

Inherent revenue risk associated with toll road projects

Being a toll-based project, KSTPL is exposed to the inherent revenue risks arising from the traffic fluctuations and annual revision of the toll rates which are indexed to the Wholesale Price Index (WPI). Also, diversion of local traffic to toll free roads/roads with lesser toll at present could lead to slightly lower toll collections in future.

Heavy commercial vehicles like trucks and multi-axle vehicles constituted around 80% of the total traffic on the project stretch. The high mix of commercial vehicle traffic indicates higher linkage to the state of economy and macroeconomic condition which can have an adverse impact during times of economic downturn.

O&M Risk

The company remains exposed to the risk of any increase in O&M cost, as the company has not entered into any fixed price O&M contract. Presently, the O&M is being done by in-house team of KSTPL.

The company completed its first cycle of major maintenance activity on the project highway during the FY19 and FY20, out of internal accruals and cash surplus available with the company. The company now plans to undertake the second major maintenance activity in FY26, for which BG has been provided by the UEM Group Berhad, in line with the sanctioned terms.

Moderate debt coverage indicators

The company has moderate debt coverage indicators and remains exposed to the risk of declining toll collections and any adverse change in the interest rates in future due to floating nature of the interest on term loans availed by the company. However, comfort can be derived by the presence of DSRA BG, which is a liquidity buffer covering debt obligation of one quarter.

Liquidity: Adequate

The company has cash and cash equivalents of Rs.31.60 crore as on October 14, 2020. Further, the company has Overdraft limit of Rs.10 crore, which is currently un-utilized and provides cushion in case of any cash flow mismatch. Additionally, the Company has created DSRA of Rs.24.11 crore representing three months of debt servicing obligation and is maintaining MMRA of Rs.11.08 crore in the form of BG.

The company had availed moratorium for its debt obligations under the COVID-19 - Regulatory Package announced by the RBI on March 27, 2020 and May 22, 2020, w.e.f. from March 2020 to August 2020.

Analytical approach: Standalone while factoring in linkages with Sponsor- UIPL, which is a part of UEM Berhad Group.

About the Company

Khalghat Sendhwa Tollways Pvt. Ltd. (erstwhile SEW Navayuga Barwani Tollways Pvt. Ltd.) is a Special Purpose Vehicle (SPV) which was initially promoted by SEW Infrastructure Ltd. (SEW) and Navayuga Engineering Company Limited (NECL) to lay four lanes from Khalghat to Madhya Pradesh/Maharashtra border under NHDP Phase IIIA on BOT toll basis. The Concession Agreement (CA) was executed between KSTPL and National Highways Authority of India (NHAI) on April 16, 2008 for a concession period of 18 years. The project was implemented and achieved COD on April 4, 2011. The final project cost was Rs. 786.39 crore as against envisaged project cost of Rs. 790.02 crore. In 2014 UIPL had acquired 74% of the stake in KSTPL from SEW and NECL. Further, in June 2016, UIPL had acquired remaining 26% of the stake holding in KSTPL from SEW and NECL. This has increased UIPL's shareholding in KSTPL to 100%, making it a wholly owned subsidiary.

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating. Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
