Details of instruments/facilities in Annexure-1

Detailed Rationale & Key Rating Drivers

The rating assigned to the bank facilities of Makers Laboratories Limited (MLL) derives comfort from the promoter's association with IPCA Laboratories Limited (IPCA) and long-standing experience of promoters in the Pharmaceutical industry, diversified product portfolio satisfactory capital structure and debt protection metrics and long-standing supplier network. The rating also takes cognizance of poor financial performance in FY 19 and H1FY20, moderate scale of operations with concentration on acute therapies segment, vulnerability accruing from volatility in raw material prices, exposure to regulatory risk, moderate working capital cycle and ongoing project risk.

Rating Sensitivities

Positive factors

- Improvement in PBILDT margins to 10% on sustained basis

Negative factors

- Reduction in PBILDT margins below 4% on sustained basis
- Deterioration in capital structure to above 0.8x

Detailed description of the key rating drivers

Key Rating Strengths

Experienced promoters with established track record in the industry

The promoters of Ipca Laboratories Limited (Ipca) have promoted MLL. Mr. Premchand Godha, the Managing Director of Ipca is also the promoter of MLL. He is a Chartered Accountant with over 4 decades of experience in the Pharma Industry. He has been instrumental in turning around Ipca from a sick unit in 1975 to a profitable International Pharmaceutical company. Mr. Nilesh Jain and Mr. Sahil Parikh are whole-time Directors in MLL and handle day to day operations of the Company. Mr. Sahil Parikh is a graduate in B.Sc. (Bio-Chemistry) from Gujarat University. He has also done Diploma in Management Studies from Ahmadabad Management Association. He has two decades of experience in the Pharma Industry, wherein he has overlooked production, quality control, projects and general management. Mr. Nilesh Jain is a Commerce Graduate (B. Com) and M.M.S. (Masters in Management Studies) from Mumbai University. He has nearly 23 years of experience in the field of Materials Management, Marketing Management, Business Development and General Management. The management is ably supported by a team of well-qualified professionals down the line.

Diversified business segments backed by approved manufacturing facilities

The company primarily markets branded generic pharmaceutical formulations and generic formulations in the Indian market. The company procures its products on principal to principal (P2P) basis from various companies situated in the excise free zone of Himachal Pradesh and Uttarakhand. The facilities of their vendors have all the necessary certifications in place including CGMP. It also manufactures injectables (Anti-malarials) at its facility in Naroda, Ahmedabad on a loan license basis which solely caters to Ipca. The manufacturing facility of MLL is CGMP certified.

Diversified product portfolio albeit concentration to acute therapies limits growth in absence of major R&D capability

MLL markets its products in major general health therapeutic segments like Anti-Malarial, Antibiotic, Antibacterial, Anti-Inflammatory, Analgesic, Anti- Diabetics and other common diseases. The company's top formulation brands comprise of Duramol (Paracetamol), Artemak-AB (α - β Arteether), Loroquin (Chloroquine), Nimuwini (Nimuselide), Coffwin (Anti cough Range) and Exylin (Amoxicillin range). The company generates a stable stream of revenue from a diversified product portfolio with the top 10 products contributing 38.01% of the net sales in FY19 (35.83% of the net sales in FY18). The company also

¹Complete definition of the ratings assigned are available at www.careratings.com and other CARE publications

generates income from job-work done solely for Ipca towards manufacturing of Anti-Malarial Injectables amounting to Rs. 7.75 crore during FY19 against Rs. 6.34 crore during FY18.

Improved operational performance from the injectables division

The company operates one manufacturing facility consisting of the injectables division in Naroda, Ahmedabad which manufactures Anti-malarials primarily for Ipca Laboratories Limited. The same is done on a loan license basis by the company which generates Rs. 6-7 crore per annum. The revenue for aforementioned sales was Rs. 7.75 crore during FY19 (Rs.6.34 crore during FY18). The company has an installed capacity for manufacturing 46.80 million vials of anti-malarial injectables. The company usually operates its capacity in a single shift; however with additional orders can work from 1.50-2 shifts (thus making the capacity utilisation in excess of 100%). For FY 19 capacity utilisation was 117% as against 79% during FY18. This has further improved to 121% till November 2019. The plant operates for nearly 360 days a year.

Long-standing supplier relations with PAN India supply chain

The company, by virtue of its long presence in the Pharma Industry and association with Ipca Laboratories Limited, has established a strong and dependable supplier network. The company's major P2P vendors are Meghmani LLP, Pinnacle Life Sciences Pvt Ltd, Vital Laboratories Pvt Ltd, Aarti Drugs Ltd, Smayan Healthcare Pvt Ltd and Acme Formulation, among others. The company procures majority of its API from Farmson Analgesics and Ipca Laboratories Ltd, among others. MLL has a sound supply chain operating PAN India backed by a strong distribution network of super stockists. In FY19, the Company made changes to its distribution model from Direct to Distributor to Direct to Stockist.

Key Rating Weaknesses

Small scale of operations, financial performance impacted due to supply disturbance and change in distribution model

The company generates a stable stream of revenue from a relatively moderate scale of operations. The Total operating Income (TOI) has declined marginally over the last 3 years from Rs. 58.54 crore in FY17 to Rs. 57.82 crore in FY18 and Rs. 49.08 crore in FY19. The decline in FY19 was primarily due to decline in generic sales volumes owing to supply disturbance from one of MLL's major loan license manufacturer; Ankur Drugs and Pharma Limited (ADPL); during October to December 2018. ADPL was liquidated during Q3FY19, due to which nearly 40-50% of the products supplied to MLL were not available. Since, the company operates in an industry which is governed by regulations, immediate diversification of purchases could not be done. Post the liquidation of ADL, MLL has identified 2 new LLMs, MCW Healthcare Private Limited (MCW) and Jay Formulations (JF), to compensate for the loss of production caused by liquidation. Post the acquisition of various licenses from FDA by the new LLMs, the commercial production by MCW commenced from June 2019 and the commercial production by JF commenced from August 2019.

The Company used to earn a rental income of Rs. 0.13 crore per month from leasing its properties for commercial use (which amounted to Rs. 1.94 crore in FY19). The same as since stopped as the lease arrangement was discontinued in the month of March 2019.

As a result of the factors mentioned above, the margins also declined with PBILDT margins at 9.51% in FY 19 as against 10.83% in FY18. The decline continued in H1FY20 due to as transition to Direct to Stockist model and consequently an increase in distribution costs like marketing personnel etc. The Company has now split into two Divisions namely Bulk formulation & Retail formulation Bulk division will cater to the requirement of Doctors who require generic formulations in bulk pack for dispensation whereas retail division will cater to the chemists through stockists. These two divisions have their own marketing team. The total filed strength was 32 persons as of March 31, 2019 which later increased to 49 in H1FY20 and is further expected to increase to 55 people in FY20.

Satisfactory capital structure

The company has a sound capital structure marked by the overall gearing remaining below unity at 0.15x as on March 31, 2019 (0.03x as on March 31, 2018 and 0.01x as on March 31, 2017). The company's debt profile comprises of working capital bank borrowings, and term loan availed in FY19 for funding the new ophthalmic facility. The Total Debt to GCA, of the company has therefore deteriorated to 1.70x in FY19 as against 0.29x during FY18 as have other debt coverage indicators.

Moderate working capital cycle

The operating cycle has elongated to 126 days in FY19 from 105 days in FY18 owing to stretched inventory days due to high level of inventory maintained by the company in the form of finished goods and raw materials. Nevertheless, the company realizes its payments from clients in a timely manner manifested by y-o-y improvement in the debtor's period (63 days during FY19).

Ongoing Project Risk

The company has executed capex amounting to Rs. 13.20 crore during FY19-FY20 for the new ophthalmic division to be set up in Naroda, Ahmedabad for manufacturing vials for Ipca, for both the domestic and export markets. The said capex has

been funded through a term loan of Rs. 8.70 crore and balance of Rs. 4.50 crore through internal accruals, with a debt-equity of 1.93:1. The project was scheduled to be completed by September 2019. The company has completed almost entire capex with Rs. 1 crore of lab and balancing equipment pending. The facility and equipment are awaiting qualification and the first commercial batch is expected to be made around Feb 2020. The facility is expected to contribute significantly to the revenue from FY22. The ability to stabilize the project remains key rating monitorable

Vulnerability to Volatility in raw material prices and forex fluctuation risk

The raw material cost is the major cost component which accounted for 74% of the total cost of sales in FY19 (71% during FY18). Of this, 52% is accounted by cost of goods traded by the company on a P2P basis. The balance 48% pertains to raw materials procured indigenously for the injectables division. The volatility in input prices subjects the profitability of the company to risk associated with adverse movement of prices. The company primarily operates in the domestic market with no forex inflows compared to moderate forex outflow over the years. The company has no hedging mechanisms in place for the same. Resultantly, the company is exposed to risk associated with volatility in movement of foreign exchange rates.

Exposure to regulatory risk

The pharmaceutical industry is highly regulated and requires various approvals, licenses, registrations and permissions for conducting business activities. The approval process for a new product registration is complex, lengthy and expensive. The time taken to obtain approval varies across countries and authorities, usually taking a minimum of six months to several years from the date of application. Any delay or failure in getting approvals for new product launch could adversely affect the business prospect of the company.

Liquidity : Adequate. The company's utilization on working capital bank borrowings has been low with average utilization being 13% during the past 12 months ended November, 2019. The current ratio and quick ratio stand at 2.01x and 0.98x respectively as on March 31, 2019. The company's cash profit stood at Rs.3.75 crore during FY19 and at Rs.0.83 crores at H1 FY20 against which the company has repayment of Rs. 0.40 crore due in February 2020.

Analytical approach:

Standalone. Although the analytical approach is standalone, the same takes into cognizance MLL's association with IPCA, with common promoters and operational linkage.

About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
