### Detailed Rationale & Key Rating Drivers

The revision in ratings with change in outlook assigned to Manaksia Steels Ltd (MSL) takes into account moderation in operational and financial performance in FY20 (refers to period April 01 to March 31) vis-à-vis FY19 which is not in line with projected financials as envisaged for FY20. Further, the tepid near-term demand conditions on the back of a weak macroeconomic outlook following the Covid-19 pandemic is likely to have an impact on the company's scale of operations and consequently the level of profits and cash accruals. Sub-optimal utilisation of assets is also likely to adversely impact the business returns of the company. However, given the conservative capital structure, the debt protection metrics and liquidity position of the company would remain healthy.

The rating continues to draw strength from long experience of the promoters in steel industry, strategic location of the plant and satisfactory financial risk profile. The above strengths are constrained by small scale of operations, geographical concentration risk, profitability susceptible to volatility in prices of raw-materials, exposure to foreign exchange fluctuation risk and cyclicity associated with the steel industry.

### Rating Sensitivities

#### Positive Factors

- Increase in scale of operations beyond Rs.800 crore and profitability margin beyond 8%.
- Diversification of customers in export as well as domestic market
- Sustenance of capital structure and TD/GCA below 0.20x and 2x respectively

#### Negative Factors

- Decline in scale of operations below Rs.400 crore and operating profitability below 3%
- Deterioration of capital structure and TD/GCA beyond 0.90x and 6x respectively
- Worsening of operating cycle beyond 80 days

### Detailed description of the key rating drivers

#### Key Rating Strengths

**Experienced promoters:** MSL is promoted by Mr. Suresh Kumar Agrawal & family. Mr. Suresh Kumar Agrawal (Chemical Engineer) has an experience of about four decades in steel manufacturing industry. Mr. Varun Agrawal (B. Com and son of Mr. S. K. Agarwal) looks after the day-to-day affairs of the company along with the support of experienced professionals.

**Strategic location of the plant:** In manufacturing of steel products, freight cost constitutes a significant portion as large amount of bulky raw material is required to be sourced to the manufacturing site. The company needs to procure HR coils and Zinc from both domestic and overseas supplier. The proximity of the plant to Haldia port area helps the company to save logistics cost.

**Satisfactory financial risk profile:** Overall gearing though moderated but remained comfortable at 0.39x as on Mar 31, 2020 as against 0.19x as on Mar 31, 2019. TD/GCA moderated and stood at 4.81x in FY20 as against 2.12x in FY19.

<sup>1</sup>Complete definitions of the ratings assigned are available at [www.careratings.com](http://www.careratings.com) and in other CARE publications.

**Key Rating Weaknesses**

**Moderation in operational and financial performance in FY20:** The Company reported a decline of 30% and 45% in total operating income and PBILDT respectively in FY20 as against the projected financials for FY20.

The combined capacity utilization of the manufacturing facilities (Steel Cold Rolling, Galvanizing and Colour Coating) declined from 45% in FY19 to 36% in FY20. The total operating income of MSL declined y-o-y by ~29% in FY20 mainly on account of decline in trading sales as well as manufacturing sales. PBILDT margin of the company slightly moderated from 4.18% in FY19 to 3.47% in FY20. Interest coverage remained stable at 10.75x in FY20 (10.56x in FY19). In FY20, the company reported GCA of Rs.15.67 crore vis-à-vis nil term debt repayment.

**Small scale of operations:** MSL operates on a relatively small scale as compared to players operating in this industry, with income from operations and total capital employed of Rs.487.80 crore and Rs.268.66 crore respectively in FY20 (Rs.688.71 crore and Rs.221.08 crore in FY19).

**Geographical concentration risk:** MSL's export revenue is mainly driven by supply of HR Coils to its group company based in Nigeria. In FY20, its share of turnover to Nigeria stood at 51% (58% in FY19).

**Profitability susceptible to volatility in the prices of raw materials:** Raw material expense is the major cost driver for MSL, accounting for roughly ~80% of the total cost of manufacturing for FY20 (as against ~80% in FY19). The major raw materials are HR Coils & Zinc. The prices of raw-materials are highly volatile in nature due to commodity nature of product, whose prices are determined based on global demand & supply. Given the volatility in raw material prices & lack of backward integration, the profitability of the company is susceptible to fluctuation in raw material prices.

**Exposure to foreign exchange fluctuation risk:** MSL imports majority (~51% in FY20) of its raw material requirement from Japan & Singapore for manufacturing sales made in domestic market. Apart from this, the company is also engaged in trading sales to group company based in Nigeria (50% of total revenue in FY20 vis-à-vis 58% in FY19).

As the trading activity is high-sea sales, the forex receivables and payables are set off to that extent. Thus the company is exposed to foreign exchange fluctuation risk to the extent of raw materials imported (majorly HR coils) for the purpose of domestic manufacturing sales. MSL generally hedges its forex exposure through forward cover and the company reported forex loss of Rs.2.52 crore in FY20 vis-à-vis Rs.5.65 crore in FY19.

**Cyclicality associated with the steel industry:** Steel is a cyclical industry, strongly correlated to economic cycles since its key users i.e., construction, infrastructure, automobiles and capital goods are heavily dependent on the state of the economy. Fall in demand in any of these sectors directly impacts the demand of steel products. The prevailing slowdown in automobile sector is one of the key reasons for poor performance of steel sector in FY20. The steel industry is sensitive to the shifting business cycles, including changes in the general economy, interest rates and seasonal changes in the demand and supply conditions in the market.

**Industry Outlook:** Recovery in domestic demand has been slow due to migration of labour, supply-chain disruptions, prevailing lockdown in many cities etc. CARE expects domestic steel demand to recover only post monsoon led by improvement in infrastructure activities and expectation of increase in automobiles production. Demand from construction sector is expected to take longer to recover. However, higher exports, lower raw materials prices and better availability of domestic coal is expected to provide much needed relief to steel players grappling with destruction in domestic demand and low realisations.

**Liquidity: Adequate**

The company's liquidity position is adequate characterized with gross cash accruals of Rs.15.67 crore in FY20 vis-à-vis nil debt repayment obligations and 4% utilization of its working capital limits (sanctioned CC limit of Rs.50 crore) over the last 12 months ended July, 2020. The company has fixed deposits of Rs.45.14 crore as on August 31, 2020. The company has not availed any deferment of interest on its CC facility as per COVID relief measure announced by RBI.

### About the Company

Manaksia Steels Ltd (MSL) was incorporated on June 07, 2001 by Kolkata based Mr. Suresh Kumar Agrawal & family. It was a dormant company till October 01, 2013 before the demerger of steel division of Manaksia Ltd. (ML) to MSL. MSL is engaged in manufacturing of cold rolled sheets, galvanized plain & corrugated sheets and colour coated sheets. The company has a manufacturing capacity of 84,000 MTPA of steel cold rolling sheets, 36,000 MTPA of galvanizing sheets and 24,000 MTPA of colour coating sheets at Haldia and 30,000 MTPA galvanizing plant at Bankura. However, the Bankura plant is not operational from FY14 onwards.

**About CARE Ratings:**

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

#### Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
