Details of instruments/facilities in Annexure-1

Detailed Rationale & Key Rating Drivers

The rating assigned to the bank facilities of Parmeshwari Silk Mills Limited (PSML) is constrained by the modest scale of operations and working capital intensive nature of operations. The rating is further constrained by the customer concentration risk, susceptibility of margins to raw material price fluctuations coupled with competitive and fluctuating nature of the industry.

The rating, however, derives strength from the experienced promoters, favorable location of operations, growing scale, improving profitability margins with satisfactory solvency position.

Going forward, the ability of the company to profitably scale-up its operations, improve its overall solvency position, and efficiently manage its working capital requirements will remain the key rating sensitivities. Further any new capex and funding mix for the same will also remain a key rating consideration.

Detailed description of the key rating drivers

Key Rating Weaknesses

Modest scale of operations

The company's scale of operations has remained modest at Rs.138.03 Cr., in FY19. However, the same has steadily increased at a CAGR (Compounded Annual Growth Rate) of 14% for the period FY16- FY19, on the back of increased orders received from both existing and new customers.

Elongated working capital cycle

The operations of the company are working capital intensive in nature as reflected by average operating cycle of 142 days as on March 31, 2019. PSML is required to maintain adequate inventory mainly in the form of raw material to ensure smooth execution of production as well as maintain stock of finished products in order to meet the immediate requirements of customers which resulted in average inventory period of 102 days as on March 31, 2019. Furthermore, the company has to offer reasonable credit period of around three-four months to its customers owing to its existence in a highly fragmented and competitive textile industry. PSML received an average credit period of around two-three month from its suppliers as on March 31, 2019

Susceptibility to raw material price fluctuations

The raw material cost has remained a major contributor to the total operating cost of PSML. The entities in the textile industry are susceptible to fluctuations in raw material prices. Cotton (one of the main raw material) being an agricultural product, its demand supply situation depends on various natural conditions like monsoons, drought and floods. It being a product of international importance, its price is very volatile depending on the demand-supply situation in the global markets. The prices of other raw materials, i.e. manmade yarn are linked to that of crude oil. The general volatility in the crude oil prices also has an impact on the price of this product.

High competition from organised/unorganised players

The company operates in a highly fragmented textile manufacturing industry wherein the presence of large number of entities in the unorganized sector and established players in the organized sector limits the bargaining power with customers. Further, the company is also exposed to competitive pressures from domestic players as well as from players situated in China and Bangladesh.

Key Rating Strengths

Experienced and resourceful promoters with established track record of the company

PSML has been engaged in selling of shirting fabric & ladies dress material and is being managed by Mr. Jatinder Pal Singh, Managing Director and Ms. Kuljeet Kaur (wife of Mr. Jatinder Pal Singh) who have an experience of more than two and a half

¹Complete definition of the ratings assigned are available at www.careratings.com and other CARE publications

decades and two decades, respectively, in the textile industry through their association with PSML. The other directors of the company include Mr. Deshbir Singh and Mr. Simranjit Singh, who have an experience of more than a decade and half a decade, respectively, in the textile industry. To support various business requirements, the promoters of the company have infused unsecured loans (USL) to the tune of Rs.18.01 crore, till March 31, 2019. Unsecured loans amounting to Rs.16.30 Cr. remain subordinated to the bank loans. The requisite documents pertaining to subordination were received in Q1FY20.

Favorable location of operations and established marketing network

The company is situated in Ludhiana which is a well-established manufacturing hub of textiles. PSML derives the comfort from its strategic location in terms of easy accessibility to a large customer base as well as readily availability of raw materials owing to established suppliers presence in the same location as well. The company sells its products (shirting fabrics and ladies dress material) under the brand “Ramtex” through its network of 67 dealers based in Uttar Pradesh, Delhi, Haryana and Punjab. Over the years, the company has expanded its dealer network leading to widening reach of the company in tier-2 and tier-3 cities.

In Q1FY20 (UA), the company has achieved total operating income of Rs.36.79 crore and PAT of Rs.2.25 crore as against total operating income of Rs.34.10 crore and PAT of Rs.1.53 crore in Q1FY19 (UA).

Improving profitability margins and satisfactory solvency position

The PBILDT margin has improved from 8.25% in FY17 to 12.04% in FY19 mainly on account of increased contribution and capacity utilization of digital printing segment which commands a higher margin in the market. Furthermore, certain activities (including designing, digital printing and embroidery) which were earlier outsourced are now carried in-house post installation of required machines which has led to the improvement of margins during the period.

The capital structure of the company remained at a satisfactory level with the long term debt to equity ratio and overall gearing ratios at 0.43x and 1.25x respectively, as on March 31, 2019 (0.44x and 1.50x respectively, as on March 31, 2018). The interest coverage ratio remained comfortable at 2.55x in FY19 while the total debt to GCA stood at 5.77 x as on March 31, 2019.

Liquidity: Adequate

The current ratio of the company stood at a satisfactory level of 1.35x, as on March 31, 2019. Though the cash credit limit utilisation level remained high at ~95%, in the last twelve months ended, August-2019, the company has a scheduled debt repayment obligation of Rs.2.46 Cr. only, which is proposed to be met through the internal accruals (GCA of Rs.8.40 crore in FY19). The company has proposed a capex at a total cost of Rs.8.52 Cr. proposed to be funded through a debt of Rs.6.00 Cr., while the remaining is expected to be funded through internal accruals. The capex is expected to achieve COD in October 2019.

About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
