Details of instruments/facilities in Annexure-1

Detailed Rationale & Key Rating Drivers

CARE has continued the ratings assigned to the bank facilities of Shyam Steel Industries Limited (SSIL) at 'CARE BB+; Stable (Double B Plus; Outlook: Stable); ISSUER NOT COOPERATING/CARE A4+ (A Four Plus); ISSUER NOT COOPERATING' and has simultaneously withdrawn it, with immediate effect.

The rating withdrawal is at the request of SSIL and 'No Objection Certificate' received from the bank that has extended the facilities rated by CARE.

CARE had, vide its press release dated June 30, 2020, continued the ratings of SSIL under the 'issuer non-cooperating' category. SSIL has not provided information for monitoring of the rating and continues to be non-cooperative despite requests for submission of information including through e-mail dated October 20, 2020. In line with the extant SEBI guidelines, CARE has reviewed the ratings on the basis of the best available information which however, in CARE's opinion is not sufficient to arrive at a fair rating.

Users of this rating (including investors, lenders and the public at large) are hence requested to exercise caution while using the above ratings.

While arriving at the ratings, CARE has taken a combined view of SSIL and its step-down subsidiary Shyam Steel Manufacturing Ltd (SSML).

Detailed description of the key rating drivers

At the time of last rating on June 30, 2020 the following were the rating strengths and weaknesses:

Key Rating Weaknesses

Exposure to volatility in prices of raw materials: Raw material consumption is the single largest cost component for SSIL and SSML. The major raw materials required for manufacturing billets are coal, iron ore and sponge iron. Billets are the main raw material for producing TMT bars and coal and iron-ore are required for producing sponge iron. The companies purchase iron ore and coal from the market. Any adverse movement in the raw material price without corresponding movement in finished good price might affect the performance of the company. Though the prices of finished goods move in tandem with raw material prices, there is a time lag.

Working capital intensive nature of operation: The operations of SSML and SSIL are working capital intensive in nature due to offering of credit period of one-two months to customers and policy of maintaining inventory for about two months. Thus, the companies have to rely upon the bank borrowings to fund the working capital requirement.

Intense competition from the unorganised sector: The Indian steel industry is characterised by high degree of fragmentation due to the presence of the large numbers of unorganised players. The company operates in eastern India, which is a hub of steel plants. Further, low level of product differentiation in the downstream steel segment further intensifies the competition, leading to lower bargaining power vis-a-vis the customers. Further, the industry is cyclical in nature.

Key Rating Strengths

Experienced promoter: SSIL, promoted by Beriwalla family of Kolkata, is an established player in the steel industry in eastern India. The promoters have over six decades of experience in the business of steel & related products and have an established brand name.

¹Complete definition of the ratings assigned are available at www.careratings.com and other CARE publications

*Issuer did not cooperate; Based on best available information

Established brand and diversified clientele: The group sells TMT bars under the brand name 'Shyam TMT' and the brand is well-accepted among the established construction & real estate players in West Bengal. The company sells its products to private parties, government bodies, dealers and retailers. SSIL has retail presence in West Bengal, Orissa, UP, North east and Bihar.

Increase in operating income in FY19 and moderate capital structure: Total combined operating income of SSIL and SSML increased by about 30% in FY19 over FY18. PBILDT margin also remained relatively stable. The overall gearing remained moderate at 0.47x as on March 31, 2019 and interest coverage continued to remain comfortable.

Captive power plant resulting in savings in power cost: SSIL and SSML together have a captive power capacity of 25 MW which results in savings in power cost and higher margins for the companies.

Analytical approach: CARE has taken a combined view considering that SSIL and SSML are in similar line of business with operational and financial linkages, common management and finance team. SSML is a step-down subsidiary of SSIL. SSIL holds 99.9% shares in Shyam Steel Energy Limited which in turn holds 100% in SSML.

About the Company

SSIL was promoted by Beriwalla family of Kolkata and commenced commercial operation in October, 2003. The company is engaged in manufacturing of TMT bars and also has sponge iron and billets capacities as backward integration along with a captive power plant. The manufacturing facility is located in Durgapur, West Bengal. SSML is engaged in manufacturing of TMT bars and Billets at its manufacturing facility located in West Bengal. As a part of backward integration process, the company also operates sponge iron and Ferro Alloys unit along with a captive power plant.

Brief Financials (Rs. crore)- SSIL	FY18 (A)	FY19 (A)
Total operating income	1596.04	2081.25

About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
