Details of instruments/facilities in Annexure

Detailed Rationale & Key Rating Drivers

The rating assigned to the bank facilities of Sri Lakshmi Venkatadri Agro Food Industries (SLVAFI) is tempered by modest scale of operations albeit to y-o-y growth, financial risk profile marked by the thin profitability margins, leveraged capital structure and weak debt coverage indicators, seasonal nature of availability of paddy resulting in working capital intensive nature of operations and constitution of the entity as partnership firm.

The ratings, however, derives strength from established track record and experienced promoters, location advantage with presence in cluster and easy availability of raw material and healthy outlook demand for rice.

Rating Sensitivities

Positive Factors

- Increase in scale of operations i.e., total operating income (TOI) to more than Rs. 50.00 crore on sustain basis
- Improvement in overall gearing ratio less than 2.00x on sustained basis

Negative Factors

- Any significant increase in debt levels results in further deterioration in overall gearing beyond 3.00x
- Any deviation in total operating income will result in decline PBILDT margin beyond 2% on sustained basis

Detailed description of the key rating drivers

Key Rating Weaknesses

Modest scale of operations albeit to y-o-y growth

The scale of operations marked by the total operating income has grown at CAGR of 6.6% during FY18-FY20 due to increase in orders from customers and coupled with stable market demand. The total operating income has grown from Rs. 35.13 crore in FY18 to Rs. 42.55 crore in FY20 (Prov.) and the net worth base of the firm stood low at 3.44 crore as compared peers in the industry.

Financial risk profile marked by the thin profitability margins, leveraged capital structure and weak debt coverage indicators

The profitability margins marked by the PBILDT margin has been fluctuating in the range of 3.91% to 4.18% during FY18-FY20 due to volatile in raw material prices (paddy) on back of seasonal based availability and coupled with competitive and highly fragmented nature of business activities, the firm not able to pass-on the increasing overheads cost. However, the PBILDT margin stood satisfactory at 4.13% in FY20 (prov.). In line with PBILDT, the PAT margin stood thin and fluctuating in the range of 0.42% to 0.62% during FY18-FY20 due to increase in finance and depreciation cost on back on addition of fixed assets through debt infusion.

The capital structure of the firm marked by the overall gearing ratio has been improved and stood leveraged at 2.60x as on March 31, 2020 (prov.) as compared to 3.64x as on March 31, 2019 and 3.29x as on March 31, 2018 due to repayment of term loan coupled with y-o-y accretion of profits into the business. The debt profile of the firm constitutes of term loan of Rs. 0.90 crore, working capital borrowings of Rs. 6.80 crore and unsecured loans of Rs. 1.25 crore as on March 31, 2020 (Prov.).

The debt coverage indicators marked by interest coverage ratios has improved marginally and stood weak at 1.51x in FY20 (Prov.) as compared to 1.40x in FY18 and 1.36x in FY19 due to increase in absolute amount of PBILDT. The total debt to GCA stood weak at 17.99x in FY20 (Prov.) despite of y-o-y improvement on account of increase in cash accruals with growth in TOI. However, the total debt to CFO stood satisfactory at 5.27x as on March 31, 2020, as the firm has registered positive cash flows from operations as on March 31, 2020 (Prov.) due to realization of sundry debtors coupled with marginal increase in absolute amount of PBILDT.

¹Complete definition of the ratings assigned are available at www.careratings.com and other CARE publication

Seasonal nature of availability of paddy result in working capital intensive nature of operations

Paddy in India is harvested mainly at the end of two major agricultural seasons Kharif (June to September) and Rabi (November to April). The millers have to stock enough paddy by the end of the each season as the price and quality of paddy is better during the harvesting season. During this time, the working capital requirements of the rice millers are generally on the higher side. Majority of the firm's funds of the firm are blocked in inventory and with customers. On account of the same, the average working capital utilization stood at 85% for last 12 months ending May 31, 2020.

Constitution of the entity as partnership firm with inherent risk of capital withdrawal

SLVAFI, being a partnership firm, is exposed to inherent risk of the partners' capital being withdrawn at time of personal contingency and firm being dissolved upon the death of partners. However, the partner has infused capital to a tune of Rs. 0.20 crore during FY18-FY20.

Key Rating Strengths**Established track record and experienced promoters**

SLVAFI was established in the year 2008 and was promoted by Mr. N. Rajgopal (Managing Partner) and his family members. He has more than decade of experience in rice processing industry. Through his experience in the rice processing industry, the firm has established healthy relationship with key local suppliers and customers as well.

Location advantage with easy availability of raw material

The rice milling unit of SLVAFI is located at Koppal district which is the one of the top district for producing rice in Karnataka. The manufacturing unit is located near the rice producing region, which ensures easy raw material access and smooth supply of raw materials at competitive prices and lower logistic expenditure.

Healthy outlook demand for rice

Rice is consumed in large quantity in India which provides favourable opportunity for the rice millers and thus the demand is expected to remain healthy over medium to long term. India is the second largest producer of rice in the world after China and the largest producer and exporter of basmati rice in the world. The rice industry in India is broadly divided into two segments – basmati (drier and long grained) and non-basmati (sticky and short grained). Demand of Indian basmati rice has traditionally been export oriented where the South India caters about one-fourth share of India's exports. However, with a growing consumer class and increasing disposable incomes, demand for premium rice products is on the rise in the domestic market. Demand for non-basmati segment is primarily domestic market driven in India. Initiatives taken by government to increase paddy acreage and better monsoon conditions will be the key factors which will boost the supply of rice to the rice processing units. Rice being the staple food for almost 65% of the population in India has a stable domestic demand outlook. On the export front, global demand and supply of rice, government regulations on export and buffer stock to be maintained by government will determine the outlook for rice exports.

Liquidity: Stretched

Liquidity is marked by tightly matched accruals to repayment obligations, its working capital borrowings are utilized to the extent of 85% for the period last 12 months ending May 31, 2020. The cash and bank balances stood modest at Rs. 0.08 crore as on March 31, 2020 (Prov.), however, the current ratio of SLVAFI stood above unity at 1.32x as on March 31, 2020 (Prov.) and the firm has not availed moratorium extended by the RBI from March 1, 2020 to August 31, 2020 on its debt obligations.

About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
