Proposed Long Term Bank facility	0.45	CARE BB-; Stable (Double B Minus; Outlook: Stable)	Reaffirmed
Total Facilities	20.00 (Rs. Twenty Crore only)		

Details of instruments/facilities in Annexure I

Detailed Rationale & Key Rating Drivers

The ratings assigned to the bank facilities of Supertex Industries Limited (SIL) continues to be constrained by modest scale of operations with low profit margins, weak debt coverage indicators, moderate liquidity position and working capital intensive nature of operations. The ratings further continue to be constrained by supplier concentration risk with foreign exchange fluctuation risk and susceptibility of profit margins due to volatility in the prices of raw materials.

The ratings however, continue to derive strength from highly experienced promoters, long track record of operations and comfortable capital structure.

The ability of SIL to increase its scale of operations and improvement in profit margins while maintaining its capital structure along with efficient management of working capital cycle are the key rating sensitivities.

Detailed description of Key rating drivers

Key rating Weakness

Modest scale of operations: The scale of operations of SIL has deteriorated by 16% y-o-y from Rs.114.18 crore in FY18 to Rs. 96.29 crore in FY19 owing to reduction in sales from trading activity (from 30% of the total sales in FY18 to 10% of the total sales in FY19) due to increase in cost due to implementation of GST.. However, overall scale of operations stood modest with networth base of Rs.28.23 crore as on March 31, 2019.

Low profit margins: SIL's PBILDT margin stood moderate and has shown increasing trend but remained in the range of 3.02% to 3.80% in past 3 years (FY17-19). However, PBILDT margin has improved marginally and stood at 3.80% during FY19 (vis-à-vis 3.30% during FY18) on account of increased realization in the manufacturing segment (which constituted 92% of sales in FY19 as against 75% in FY18). However, with low PBILDT margin coupled with high depreciation & interest costs, the PAT margin also stood low and net loss of Rs. 0.13 Crore in FY19 (as against net profit of Rs. 0.62 Crore during FY18) mainly on account of deferred tax assets of Rs.1.18 Crore in FY19

Weak Debt coverage indicators: SIL's debt coverage indicators marked by total debt to GCA has deteriorated and stood at 12.35 times in FY19 mainly due to lower cash accruals and further the interest coverage ratio has improved from 1.70 times in FY18 to 1.74 times in FY19 on account of savings in the interest expenses.

Working capital intensive nature of operations: The operations of SIL are working capital intensive in nature on account of funds are being blocked primarily in receivables due to liberal credit period offered to its customers in the light of intense competition. Further, the company maintains relatively low level of inventory due to easy availability of the raw material.

Moderate liquidity position: SIL liquidity position marked by the average working capital utilization in the last seven months ended June 2019 stood high at ~95%. Whereas the investment in net working capital as a percentage of total capital employed stood at 72.66% as on March 31, 2019 (vis-à-vis 74.75% as on March 31, 2018). SIL net cash flow from operating activities stood positive at Rs.1.81crore in FY19. On the other hand, the current ratio and quick ratio stood moderately comfortable at 1.58 times and 1.36 times respectively as on March 31, 2019 (vis-à-vis 1.32 times and 1.12 times respectively as on March 31, 2018). Thus, the ability of the company to improve the liquidity position by efficiently managing the operating cycle would be critical from the credit perspective.

¹Complete definition of the ratings assigned are available at www.careratings.com and other CARE publications.

Susceptibility of profit margins due to volatility in the prices of raw material:

The main raw material of SIL is textured yarn and POY (Partially Oriented Yarn). These raw materials are derivate of crude oil and its prices are dependent on movement of crude oil prices. Further, due to low bargaining power with large raw material suppliers and limited ability to pass on the prices, any adverse price fluctuation affects profitability of the company.

Supplier concentration with foreign exchange fluctuation risk

SIL is exposed to significant supplier concentration risk, since more than 75% of its annual purchases are contributed by top 5 suppliers. SIL is also exposed to significant foreign exchange fluctuation risk, given the high contribution of exports to the net sales, which stood at 47% in FY19. Moreover, the company does not deprive any benefits from natural hedge in absence of the imports. However, the company enjoys forward contract facility from the bank; thereby serving as a hedge to the said foreign exchange exposure and mitigate the forex risk to an extent.

Key rating Strengths

Long track record of the operations with highly experienced promoters: SIL has established more than three decades of track record in textile processing industry in which the company has maintained long term relations with its customers and suppliers. SIL is managed by experienced directors who have average experience of around three decades in the business of polyester yarns manufacturing & fabric trading activities majority of which has been gained by them in the due course of their association with this company. The extensive experience of the promoters enables them to establish strong marketing connects and production process excellence for SIL.

Comfortable capital structure: SIL's capital structure remained comfortable although it has deteriorated marginally mainly on account of increase in overall borrowings mainly due to additional term loan availed to part fund the expansion undertaken coupled with increase in working capital requirement (addition of Rs. 4.93 Cr secured OD from PNB during FY19). The overall gearing remained below unity during past three balance sheet dates ended March 31, 2019.

About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
