<b>Total Facilities</b>	<b>3611.17</b> <b>(Rupees Three Thousand Six Hundred and Eleven crore and Seventeen lakh only)</b>		

*Details of facilities in Annexure 1*

### Detailed Rationale & Key Rating Drivers

*The ratings assigned to the bank facilities of Tamil Nadu Newsprint and Papers Limited (TNPL) continue to factor the strong operational track record with TNPL being one of the largest integrated players with a well-established distribution network in PWP industry and strong raw material sourcing capabilities. The ratings take note of the scaling up operations on the board business and improvement in profitability aided by improved realisations.*

*The ratings are, however, constrained by subdued profitability margins with board unit still reporting losses at net levels even with ramp up of productions. The ratings are also constrained by the moderate capital structure and dependence on refinancing of debt obligations. Nevertheless, comfort is drawn financial flexibility that TNPL enjoys, with access to minimally utilised working capital lines and track record of availing debt of longer tenures to ease out repayments.*

#### Rating Sensitivities

##### Positive Factors

- *Improvement in overall profitability*
- *The company is taking up a large capital expenditure to establish in-house pulping capacity and enhancing PWP capacity in its unit II. Ability to complete the project in time and realizing desired benefits out of the same*

##### Negative Factors

- *Any moderation in profitability leading to lower accruals thereby affecting capital structure*
- *Any significant cost or time overrun in the above mentioned project*

### Detailed description of Key rating drivers

#### **Key rating Strengths**

##### **Strong operational track record in PWP industry with integrated nature of operations**

TNPL has been operational for over three decades and has emerged as one of the leading manufacturers of PWP in India. PWP accounts for 69% of TNPL's total income in FY19. TNPL operates an integrated pulp and paper mill (PWP Unit) at Karur District of Tamil Nadu with three paper machines aggregating to a total installed capacity of 4 lakh Tonnes Per Annum (TPA). The unit has a pulping capacity of 1,180 tpd as on March 31, 2019.

The company also developed captive power plants along with its units and the plant at Unit I and Unit II have a capacity of 103.62 MW and 30 MW respectively as on March 31, 2019. Unit I is self-sufficient in terms of both its pulp and power requirements. This unit also has an in-house cement plant which uses lime sludge waste and fly ash produced during the paper production to produce cement. The company markets the cement produced under the brand name of "TNPL cement" in Karur and its vicinity. Such high level of integration has enabled the company to consistently keep its costs under control over the years. Besides this, the company also has wind farms with a capacity of 35.5 MW located in Tirunelveli district of Tamil Nadu.

The PWP unit has been operating at consistently high capacity utilisations over the last few years and the unit achieved 100% capacity utilisation in the past four financial years except during FY18 where utilisation dropped to 88% due to drought situation prevalent in Tamil Nadu, resulting in shortage of water. However, utilisation has picked up during FY19 to 108% with normal availability water.

***Well-established distribution network in PWP industry and strong raw material sourcing capabilities***

The company has significant presence in the domestic PWP market supported by network of dealers across India. Being one of the largest players in the domestic paper industry along with long track record, TNPL has been able to establish strong relationship with its customers. TNPL also acts a key supplier for paper for text books and other material to the Government of Tamil Nadu. TNPL is also the largest exporter of PWP in the country and export constituted about 19% of the net sales during FY19 (17% during FY18).

In terms of raw material requirements, bagasse is the primary source of raw material for the company and TNPL sources bagasse from local sugar mills on barter basis in exchange for coal which is used to produce steam used in these sugar mills. Wood pulp contributes to the remaining share in the overall raw material mix and the company procures a major share of pulpwood from Tamil Nadu Forest Plantation Corporation Limited (TAFCON).

***Improved operational performance in FY19***

The company's capacity utilisation in the unit I has come to 108% in FY19 compared to the lower utilisation of 88% in FY18. Increased sales volume and realisation in both PWP and paper board segment has helped the company to report 32% growth in total operating income. Elevated realisation and reduction in dependence of imported pulp has slightly improved the operating margins in FY19.

**Key Rating Weaknesses:*****Change in raw material profile***

The share of Bagasse in the raw material mix has been broadly stable at around 61%-63% during the past years ended March 2016. However, towards the end of FY17 (March 2017) and during Q1FY18, the company had to rely more on imported pulp and imported waste paper (used in DIP), on account of water shortage leading to shut down of its pulping units. Commencement of paper board plant has also increased the dependence on imported pulp as it does not have in-house pulping facility. Since FY17, the share of bagasse in the raw material mix has come down and during FY19 the same was at 47%. Increased dependence on imported pulp and relatively lower profitability margins from the paper board segment have led to pressure on the overall profitability of TNPL.

***Exposure to volatility in raw material prices and foreign exchange rates***

The company is exposed to volatility associated with the raw material prices, fuel prices and forex risk. While the raw material price fluctuations are passed on to customers to an extent, the company has to absorb the fluctuations related to fuel prices and forex fluctuations.

***Moderately leveraged capital structure***

The capex projects undertaken by TNPL in the past were predominantly debt funded and hence the leverage levels of the company are moderately high. The overall gearing of the company has improved to 1.58x as on March 31, 2019 from 1.67x as on March 31, 2018. On the healthy accruals during FY19, the company's debt coverage indicators has improved. The company had a TD/GCA of 7.85 years and interest coverage of 2.90 times during FY19.

***Liquidity – Adequate***

The company's liquidity is adequate with Rs.818.88 crore of cash flow from operation in FY19, minimally utilised working capital limits and the refinancing of the near term loans with longer tenor debt. The company had cash credit limit of Rs.550 crore and the average utilisation on the same was around 50% for the past twelve months ended May 2019. Though the operation is working capital intensive, the company's fund-based working capital limit utilization was around 50% aided by favorable operating cycle at 17 days. The company had a cash balance of Rs.50.21 crore as on March 31, 2019. Expected tightly matched accruals in the ensuing year might pose refinancing risk for the company. However, the comfort is drawn from the ability of the company to raise longer tenor loans at competitive rates.

**Analytical approach:** Standalone

**About the company**

TNPL was promoted by the Government of Tamil Nadu (GoTN) and the Industrial Development Bank of India (IDBI) in 1979 to manufacture Newsprint / Printing & Writing paper (PWP) using bagasse as the primary raw material. In 2004, IDBI offloaded its stake in TNPL and since then GoTN has become the single largest stake holder in the company. GoTN holds 35.32% stake as on June 30, 2019. The company now operates two plant and has presence in the PWP and MCB business and is one of the largest players in the domestic paper and paper products industry.

The company has a strong management team wherein the MD is appointed by the Government of Tamil Nadu and he is supported by well experienced executives handling key functions in the organization.

Brief Financials (Rs. crore)	FY18 (A)	FY19 (A)
Total operating income	3151.66	4110.05

### About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

### Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
