Details of instruments/facilities in Annexure-1

Detailed Rationale & Key Rating Drivers

The ratings assigned to various debt instruments of Union Bank of India (UBI) are based on the majority ownership by Government of India (GoI) and GoI's demonstrated capital support. In order to better govern the public sector banks, GoI had announced the amalgamation of relatively smaller and weaker banks with larger banks and the merger was effective from April 01, 2020 with Andhra Bank Limited (ABL) and Corporation Bank Limited (CBL) getting amalgamated into UBI which is the anchor bank. Post the merger, the size of the bank has increased significantly and UBI is the fifth largest bank in India in terms of asset size.

The ratings also factor in the long standing track record of operations, position of the bank in the financial sector as one of the large sized banks, its established franchise with an extensive branch network spread across the country, comfortable liquidity profile, strong resource profile and moderate advances profile.

The ratings remain constrained on account of the bank's moderate profitability, moderate capital buffers as compared to peer public sector banks and moderate asset quality parameters. Continued ownership and support from GoI, asset quality, profitability and capital adequacy are key rating sensitivities.

Rating Sensitivities

Positive: Factors that could individually or collectively, lead to positive rating action/upgrade:

- Improvement in asset quality parameters with Gross NPA Ratio less than 5% on a sustained basis
- Increase in profitability with ROTA of above 1% on a sustained basis along with improvement in capitalisation levels

Negative: Factors that could individually or collectively, lead to negative rating action/downgrade:

- Reduction in government support and ownership below 50%
- Worsening of asset quality parameters: Net NPA ratio of over 8% on a sustained basis
- Sustained deterioration in profitability
- Decline in capitalization levels

Impact of Covid-19 on the bank's profitability and asset quality:

In terms with the RBI's 'Covid 19 Regulatory Package' on 'Asset Classification and Provisioning', the bank had extended moratorium on payment of installment and / or interest as applicable, falling due between March 1, 2020 and August 31, 2020. As at September 30, 2020, the bank had Covid-related provisions of Rs.1,187 crore which stood in excess of the regulatory provisioning of 10%.

RBI came out with a resolution framework on August 06, 2020, to address borrower stress concerns on account of Covid-19. The circular provides for additional provisioning of 10% of the re-negotiated debt exposure. Going forward, the ability of the bank to limit incremental slippages and maintaining healthy capitalisation levels and profitability would key rating sensitivities.

Detailed description of the key rating drivers

Key Rating Strengths

Majority ownership by GoI and continued capital support

The bank's credit profile derives considerable comfort and demonstrated support from GoI in terms of capital infusion, management and governance. CARE expects GoI to continue support to UBI in times of stress on account of its majority shareholding (89.07% as on September 30, 2020) and the position of UBI in the financial sector as one of the largest banks in India. GoI has been providing continuous capital support to public sector banks and infused Rs.4,112 crore of equity capital in UBI as a part of GoI's Rs.2.11 lakh recapitalization programme for public sector banks. Further, GoI is expected to continue its majority shareholding in the bank and continued support is a key rating sensitivity.

¹ Complete definition of the ratings assigned are available at www.careratings.com and other CARE publications

Long standing track record and established franchise

The Ministry of Finance (MoF), in consultation with Reserve Bank of India (RBI) on August 30, 2019, announced a set of reforms for public sector banks (PSBs), including consolidation, capital infusion and measures to improve governance standards. As part of consolidation, MoF decided amalgamation of 6 PSBs into 4 anchor PSBs subject to regulatory approvals and approval by the boards of respective banks. Accordingly, Andhra Bank and Corporation Bank amalgamated into UBI w.e.f. April 01, 2020, with UBI being the anchor bank. The merged bank has a pan India network of 9,590 branches and 13,287 ATMs of September 30, 2020. The asset size of the merged bank stood at Rs.10,27,13,220 crore as on September 30, 2020, almost doubling in size as compared to the asset size of Rs.5,40,087 crore (standalone) as on March 31, 2020, further increasing the stature of the bank. The bank has overseas branches in Hong Kong, Sydney and Dubai, in addition to representative office in Abu Dhabi. Operations in UK are through its wholly owned subsidiary, Union Bank of India (UK) Ltd.

Improved capitalization levels

During FY20 (refers to period from April 01 to March 31), the bank received Rs.11,768 crore from GOI towards preferential allotment of equity shares, which helped the bank to report Capital Adequacy Ratio (CAR) (standalone) of 12.81% as on March 31, 2020 (P.Y.:11.78%), Tier I CAR of 10.75% (P.Y.:9.48%) and CET-1 Ratio of 9.40% (P.Y.:8.02%). Post-merger, the bank shifted securities from HFT to AFS resulting in increase in the risk weighted assets (RWA) of the bank. As a result, the bank reported CAR of 12.01% (Tier I CAR: 9.74%) and Common Equity Tier I (CET I) ratios 8.60% as on April 01, 2020 as against minimum regulatory requirement of CAR of 10.875%, Tier I CAR of 8.875% and CET I ratio of 7.375%. The bank reported CAR of 12.38% (Tier I CAR: 10.05%) and CET I Ratio of 8.91% as on September 30, 2020.

Although the bank has maintained steady capitalisation levels over the years with periodic capital infusion by GOI; the CAR as on September 30, 2020 was slightly moderate as compared to its peer public sector banks. Further, any stress in asset quality would require additional provisioning which would impact the capital adequacy levels of the bank. The bank has a board resolution to raise capital funds of up to Rs.10,300 crore subject to equity capital not exceeding Rs.6,800 crore and Tier II bonds / AT I bonds not exceeding Rs.9,400 crore with necessary approvals. The envisaged infusion of equity would help the capital buffers of the bank in the near term and allow the bank to absorb any stress in asset quality and would remain a key rating sensitivity.

Stable funding and adequate liquidity profile

The bank has an established liability franchise and a healthy deposit rollover rate and capital raising ability provide comfort. The bank expanded its deposit base post merger to Rs.8,86,098 crore as on September 30, 2020, as against Rs.4,50,668 crore as on March 31, 2020 with Current Account Savings Account (CASA) proportion of 34.60% as on September 30, 2020 as compared to 35.59% (standalone) as on March 31, 2020.

The liquidity position of the bank was comfortable with well-matched asset liability maturity (ALM) profile as on March 31, 2020 with positive cumulative mismatches in all time buckets up to 5 years. The bank had excess SLR investments of Rs.68,233 crore as on March 31, 2020. The bank's Liquidity Coverage Ratio (LCR) stood at 185.42% as on March 31, 2020 (128.76% as on March 31 2019). Since April 01, 2020, the LCR is being computed on a daily basis as per RBI guidelines for the amalgamated entity. The average LCR for the quarter ended September 30, 2020 is 178.69%, and is well above the minimum requirement as prescribed by RBI of 80% for the quarter ended September 30, 2020.

Moderate advances profile

During FY20, the bank saw credit growth at 6.10% with net advances of Rs.3,15,049 crore (standalone) as on March 31, 2020 as against Rs.296,932 crore as on March 31, 2019. The merged bank reported net advances of Rs.5,99,830 crore as on April 01, 2020 and Rs.5,79,02,990 crore as on September 30, 2020. As on March 31, 2020, the Retail, Agriculture and MSME (RAM) segment constituted 52% of total advances. Post-merger, the RAM segment constituted around 55.7% of total advances while large corporate & other advances constituted the remaining of total gross advances as on September 30, 2020.

The retail loan portfolio grew from Rs.57,092 crore as on March 31, 2019 to Rs.60,519 crore as on March 31, 2020 and Rs.1,17,231 crore as on September 30, 2020. Home loans, having the highest share in retail, grew by 4.34%. Priority sector advances constituted 44.93% of the Adjusted Net Bank Credit (ANBC) against the RBI mandate of 40%.

Key Rating Weaknesses

Modest profitability parameters

During FY20, the bank reported a net loss of Rs.2,898 crore (standalone) as compared to net loss of Rs.2,948 crore during FY19 and net loss of Rs.5,247 crore during FY18. While the operating profit increased by 22% during FY20, the credit costs of the bank remained at elevated levels over the last three years which has resulted in the bank reporting loss. During FY20, NPA provisions stood at Rs.9,304 crore as compared to Rs.11,435 crore for the previous year.

UBI (amalgamated) reported Profit After Tax (PAT) of Rs.849 crore for H1FY21 (refers to period from April 01 to September 30) with operating profit of Rs.8,769 crore.

Moderate asset quality parameters

As on March 31, 2019, the bank reported Gross NPA (GNPA) ratio, Net NPA (NNPA) ratio and Net NPA to Net-worth (NNPA/NW) ratio of 14.98%, 6.85% and 106.73% respectively. The amalgamation of Andhra Bank and Corporation Bank with Union Bank of India came into effect from April 01, 2020. Accordingly, the bank made a harmonization provisioning of Rs.3,655 crore in its books with regard to the impact of divergence in asset classification practices across the three banks as on March 31, 2020. (Rs.2,510 crore relating to UBI, Rs.200 crore relating to Corporation Bank and Rs.945 crore relating to Andhra Bank).

The bank reported GNPA, NNPA and Net NPA to Net-worth ratios of 14.15%, 5.49% and 74.62%, respectively, as on March 31, 2020 (on a standalone basis). Post-merger, the GNPA deteriorated to 14.66%, while the NNPA improved to 5.24%. PCR stood at 78.18%. As on September 30, 2020, the bank reported GNPA and NNPA ratios of 14.71% and 4.13% respectively. During FY20, the bank made a cash recovery of Rs.4,267 crore in addition to up gradation of accounts to the tune of Rs.1,871 crore. Provision Coverage Ratio (PCR) improved to 83.16% as on September 30, 2020 compared to 66.24% as on March 31, 2019. The bank has made a total provision towards IBC (Insolvency and Bankruptcy Code) accounts to the tune of Rs.6,940 crore, with a 99.5% coverage.

Liquidity Profile: Strong

The asset liability maturity (ALM) profile as on March 31, 2020 had positive cumulative mismatches in all the time buckets. The bank had excess SLR investments of Rs.43,169 crore as on March 31, 2020, which provided the bank adequate liquidity. In addition, the bank has access to borrowing from RBI's Liquidity Adjustment Facility (LAF) and Marginal Standing Facility (MSF) along with cash reserves with RBI which provide comfort in meeting any liquidity pressures.

Analytical approach: The ratings are based on standalone profile of the bank (merged entity) and continue to factor in strong support from Government of India, which holds majority shareholding in the bank.

About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

Disclaimer

CARE's ratings are opinions on credit quality and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating. Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
