### Detailed Rationale & Key Rating Drivers

The ratings assigned to the bank facilities of Yasho Industries Limited (YIL) continues to derive strength from experience of the promoters in the chemical industry, diversified product portfolio catering to varied end user industry and wide geographic coverage with exports contribution large part of the income.

YIL reported moderation in its Total Operating Income for FY20. The moderation was on account of muted average sales realization which declined on back of decline in key material prices. However, the sales volume continue to remain largely similar. Operating Profit margin witnessed improvement during FY20 on back of improved product mix, coupled with decline in average prices of key raw material which were not fully passed on to its customers. During Q1FY20, income was impacted owing to government-imposed lockdown to curb the CoVID 19 spread. However, as indicated by management, both domestic and export demand has picked up and capacity utilization have reached near to pre CoVID levels. Rating also favorably factors in the recently concluded capex to elevate the capacity and provide cushion to operating profit margins owing to benefits deriving from economies of scale. Further, the debt coverage indicators like Total Debt to Gross Cash Accruals continued to remain moderate.

The rating strengths continue to remain tempered by modest scale of YIL with presence in highly competitive industry setup, exposure to volatility in key raw material prices which are derivative of crude oil and foreign exchange fluctuations. Foreign exchange fluctuation risk is partially mitigated owing to natural hedge enjoyed by company owing to large portion of income being generated by exports. Although the leverage position improved on back of accretion to reserves, same continues to remain elevated.

### Rating Sensitivities

#### Positive Factors

- Ability to improve scale of operations beyond Rs.400 crore on sustained basis
- PBILDT margin over 14.5% on sustained basis.
- Improvement in Total Debt / CFO below 4.0x on sustained basis.

#### Negative Factors

- Any large debt funded capex thereby deteriorating its Total Debt/CFO beyond 5.0x.
- Weakening of Interest coverage below 2.0x on sustained basis.
- Any change in prevailing pollution control/ environmental norms and/or regulatory ban on production & sales of certain chemicals thereby significantly impacting its business and profitability.

### Detailed description of the key rating drivers

#### Key Rating Strengths

##### **Established track record and experienced promoters**

YIL was founded by Mr. Vinod Jhaveri (Currently CFO and Whole Time Director) in 1992 as Vasu Preservatives Private Limited. Family members of Mr. Vinod Jhaveri are involved in the operations of YIL with Mr. Parag Jhaveri being the Chairman and Managing Director of YIL. Mr Parag Jhaveri has over 3 decades of experience in the chemicals industry. He looks after the overall management of the company and is supported by a team of professionals. Under the promoters' leadership, over the past two decades, YIL has transformed from a manufacturer of aroma and speciality chemicals to a publicly listed diversified

<sup>1</sup> Complete definitions of the ratings assigned are available at [www.careratings.com](http://www.careratings.com) and in other CARE publications.

manufacturer of chemicals broadly classified into food anti-oxidants, rubber accelerators, lubricants, aroma and speciality chemicals having a diversified geographic presence.

***Diversified product portfolio and end user applications coupled with wide geographic reach***

YIL manufactures a diverse product portfolio. The rubber range (used in manufacturing of tyres, conveyor belts etc.), Aroma range (used in personal care products and fragrances) and the Antioxidant range (used in edible oils, animal feeds etc.) are the key contributors to Total Operating Income followed by the speciality chemicals and Lubricant chemicals. With a diversified product profile, YIL is distanced from risks pertaining to any particular industry ensuring stability in revenue streams. Further, exports constituted 57% of Total Operating Income in FY20 (59% in FY19). In Q1FY21, YIL shown improvement in its export sales over Q1FY20, achieving 64% of total income from exports sales. YIL has presence across diverse export markets such as the USA, United Kingdom, Iran, Australia, South Africa, Singapore, Germany, UAE etc. which further enhances the diversification benefit.

***Established manufacturing facilities, further enhanced by adding new unit***

YIL has 3 manufacturing units located in Vapi, Gujarat. Post completion of capital expenditure, Unit 1, unit 2 and Unit 3 have an installed capacity of 3450 MTPA, 4550 MTPA and 1200 MTPA respectively. The manufacturing facilities are located close to the port located near Mumbai. Unit 1 is designed for manufacturing of aroma chemicals, food antioxidant chemicals and rubber chemicals (non Sulphur based) & speciality range of chemicals. Unit 2 is mainly designed for processing and manufacturing of rubber chemicals (Sulphur based) and lubricant additive range of chemicals. The company has successfully commissioned Unit 3 in May 2020. Unit 3 contains a warehousing facility for finished goods and small facility for manufacturing of speciality industrial chemicals facility. In FY20, units have operated at healthy capacity utilisation levels of 92% and 72% for Unit 1 and Unit 2 respectively [Based on post enhanced capacities for Unit 2]. CARE positively takes note of the timely completion of the large capital expenditure completed in the current financial year.

***Improvement in PAT and GCA, despite decline in the operating income***

YIL reported decline in its TOI by 13.49% during FY20. The decline was on account of moderation in average sales realization as the key materials are derivative of crude oil. Given the pandemic impact started early in global market, demand for the product witnessed moderation particularly in Q4FY20 which led to further moderation in average sales realization. Despite the decline in TOI, YIL was able to improve upon its operating profit margin which witnessed the expansion of over 200bps for FY20. Improved operating profit margin was attributed to change in product mix towards to high margin yielding products coupled with lower key raw material cost. Similar trend was witnessed during Q1FY21. Increase in Exports sales helped company achieve moderate performance in Q1FY21 despite Covid-19 impact. The Gross cash accruals too improved in congruence to operating profit margin and higher depreciation. Going forward, ability of YIL to improve its scale of operations will continue to remain a key rating sensitivity.

***Key Rating Weaknesses***

***The moderation in the leverage indicators; albeit coverage indicators improve marginally***

The overall gearing as on March 31, 2020 stood at 3.95 times as against 4.83 times as on March 31, 2019. Despite improvement, the overall gearing continues to remain elevated. Similarly, the debt coverage indicators also continued to remain suppressed with TD/GCA ratio of 7.20 times in FY20 (7.62 times in FY19). The interest coverage (PBILDT/interest) improved marginally from 2.54 in FY19 to 2.70 in FY20. The total debt as on March 31, 2020 has increased to Rs.168.65 crore from Rs.150.51 crore on March 31, 2019 on account of increase in working capital borrowing to meet increased working capital requirement and increase in term loan to fund capex. Since the capital expenditure has been completed, incremental cash flows are expected to lead to improvement in YIL's debt coverage indicators going forward.

***Working capital intensive nature of operations***

YIL has maintain sufficient inventory is required to meet customer orders in a timely manner and limit the exposure to raw material price fluctuations. Since key raw materials are imported and are subject to price volatility, YIL has limited bargaining power against its suppliers thus creating the need to maintain sufficient inventory. Limited bargaining power against suppliers also leads to limited ability to stretch payables. In FY20, YIL's operating cycle elongated to 125 days as compared to 104 days in FY19. The elevation in operating cycle is attributed to sizable decline in TOI (impacting denominator) while marginal increase in both finished goods inventory and receivables as on Mar. 31, 2020. The stretched operating cycle leads to high utilization of working capital limits.

***Exposed to volatility in raw material prices and forex risks***

Since, the majority of the raw materials are crude oil derivatives; YIL is exposed to volatility in raw material prices. Apart from the crude oil based commodities, YIL is also vulnerable to clove oil price volatility (used in aroma chemicals). The company is

also exposed to foreign exchange risk. Natural hedge partly mitigates forex fluctuation risks, but risks continue due to exist due to timing mismatches that may arise.

#### **Liquidity: Adequate**

Liquidity of YIL is adequate marked by sufficient cash accruals against long term obligations. Against the debt repayment obligation of Rs.13.44 crore in FY21, YIL is expected to achieve GCA in range of 19 – 22 crore in FY21. The GCA stood at Rs.5.76 crore in Q1FY21, which has shown consistent improvement over years. YIL has cash and cash equivalents of Rs.8.37 crore as on March 31, 2020. The utilization of its fund based working capital limits remained at 84.74% over the trailing twelve months ended August 2020. Company has availed moratorium for principal deferment from March, 2020 to August, 2020.

### About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

### Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating. Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
